

STS Term Master Checklist

BEST SME 2021 B.V.

PRIME COLLATERALISED SECURITIES (PCS) EU SAS

4 October 2021 (amended as at 23 March 2023)

Analyst: Mark Lewis – +44 (0) 203 440 5002

This is the STS Term Master Checklist for STS Term Verifications.

This STS Term Master Checklist must be read together with the PCS Procedures Manual and the PCS Term Evidentiary Standards Manual. This document is based upon the draft materials received by PCS as at the date of this document. Any references in this document are to the prospectus unless otherwise stated.

PCS comments in this STS Term Master Checklist are based on PCS' interpretation of the STS Regulation (the "Regulation") informed by (a) the text of the Regulation itself, (b) the EBA guidelines and recommendations issued in accordance with Article 19(2) of the Regulation (the "EBA Guidelines") and (c) any relevant national competent authorities interpretation of the STS criteria to the extent known to PCS.

It is important that the reader of this checklist reviews and understands the disclaimer referred to on the following page.

4 October 2021

STS Disclaimer

Neither an STS Verification, nor a CRR Assessment, nor an LCR Assessment is a recommendation to buy, sell or hold securities. None are investment advice whether generally or as defined under Markets in Financial Instruments Directive (2004/39/EC) and none are a credit rating whether generally or as defined under the Credit Rating Agency Regulation (1060/2009/EC).

PCS UK and PCS EU are authorised respectively by the UK Financial Conduct Authority and the French *Autorité des Marchés Financiers* as third parties verifying STS compliance pursuant to article 28 of the Regulation (EU) 2017/2402 of the European Parliament and of the Council of 12 December 2017 (the "**STS Regulation**").

Neither CRR Assessments or LCR Assessments are endorsed or regulated by any regulatory and/or supervisory authority nor, other than as set out above, are the PCS Association or either of its subsidiaries, PCS UK and PCS EU, regulated by any regulator and/or supervisory authority including the Belgian Financial Services and Markets Authority, the United Kingdom Financial Conduct Authority, the French *Autorité des Marchés Financiers* or the European Securities and Markets Authority.

By assessing the STS or CRR status of any securities or financing, neither the PCS Association nor PCS UK nor PCS EU express any views about the creditworthiness of these securities or financings or their suitability for any existing or potential investor or as to whether there will be a ready, liquid market for these securities or financings.

Equally, by completing (either positively or negatively) any STS or CRR status assessment of certain instruments, no statement of any kind is made as to the value or price of these instruments or the appropriateness of the interest rate they carry (if any).

In the provision of any STS Verification or CRR Assessment or LCR Assessment, PCS has based its decision on information provided directly and indirectly by the originator or sponsor of the relevant securitisation. Specifically, it has relied on statements made in the relevant prospectus or deal sheet, documentation and/or in certificates provided by, or on behalf of, the originator or sponsor in accordance with PCS' published procedures for the relevant PCS verification or assessment. You should make yourself familiar with these procedures to understand fully how any PCS service is completed. These can be found in the PCS website www.pcsmarket.org (the "**PCS Website**"). Neither the PCS Association nor PCS UK nor PCS EU undertake their own direct verification of the underlying facts stated in the prospectus, deal sheet, documentation or certificates for the relevant instruments and the completion of any STS Verification or CRR Assessment or LCR Assessment is not a confirmation or implication that the information provided to it by or on behalf of the originator or sponsor is accurate or complete.

The PCS entities take reasonable measures to ensure the quality and accuracy of the information on the PCS Website. However, neither the PCS Association nor PCS UK nor PCS EU can be held liable in any way for the inaccuracy or incompleteness of any information that is available on or through the PCS Website. In addition, neither the PCS Association nor PCS UK nor PCS EU can in any way be held liable or responsible for the content of any other website linked to the PCS Website.

To understand the meaning and limitations of any STS Verification you must read the General Disclaimer that appears on the PCS Website.

When entering any of the "Transaction" sections of the PCS Website, you will be asked to declare that you are allowed to do so under the legislation of your country. The circulation and distribution of information regarding securitisation instruments (including securities) that is available on the PCS Website may be restricted in certain jurisdictions. Persons receiving any information or documents with respect to or in connection with instruments (including securities) available on the PCS Website are required to inform themselves of and to observe all applicable restrictions.

Prime Collateralised Securities (PCS) STS Verification

Individual(s) undertaking the assessment	Mark Lewis
Date of Verification	4 October 2021
The transaction to be verified (the “Transaction”)	BEST SME 2021 B.V.
Issuer	BEST SME 2021 B.V.
Originator and Seller	Coöperatieve Rabobank U.A.
Arranger	Coöperatieve Rabobank U.A.
Transaction Legal Counsel	Allen & Overy
Rating Agencies	Fitch and Moody’s
Stock Exchange	Euronext Amsterdam
Target Closing Date	4 October 2021

PCS confirms that all checklist points have been verified as detailed in the associated comment box in the checklist below.

A summary of the checklist points by article is set out in the table of contents on the next page together with a reference to the respective article contents. To examine a specific article from the list below, please click on the article description to be taken directly to the relevant section of the checklist.

Within the checklist, the relevant legislative text is set out in blue introductory boxes with specific criteria for our verification listed underneath. For the full legislative text please refer back to the blue boxes.

The checklist contains links to relevant EBA guidelines set out in the back of this document.

Article	Summary of article contents	Checklist Points	
Article 20 – Simplicity			
20(1)	True sale	1, 2	✓
20(2)	Severe clawback (part a)	2a	✓
20(3)	Severe clawback (part b)	2b	✓
20(4)	True sale with intermediate steps	3	✓
20(5)	Assignment perfection	4	✓
20(6)	Encumbrances to enforceability of true sale	5	✓
20(7)	Eligibility criteria, active portfolio management, and exposure transferred after closing	6 - 8	✓
20(8)	Homogeneity, enforceability, full recourse, periodic payment streams, no transferable securities	9 - 14	✓
20(9)	No securitisation positions	15	✓
20(10)	Origination, underwriting standards, unverified residential loans, assessment of creditworthiness, originator expertise	16 - 21	✓
20(11)	No undue delay after selection, no exposures in default or to credit-impaired or insolvent debtors/quarantors, portion of restructured debtors, adverse credit history, higher pool risk	22 - 30	✓
20(12)	At least one payment made	31	✓
20(13)	No predominant dependence on the sale of asset	32	✓
Article 21 – Standardisation			
21(1)	Risk retention	33	✓
21(2)	Appropriate mitigation of interest-rate and currency risks and disclosure, no further derivatives and hedging derivatives according to common standards	34 - 39	✓
21(3)	Referenced interest payments	40	✓
21(4)	Requirements in the event of enforcement or delivery of acceleration notice: no cash trap, sequential amortisation, no reversal, no automatic liquidation	41 - 44	✓
21(5)	Non-sequential priority of payments	45	✓
21(6)	Early amortisation provisions/triggers for termination of revolving period	46 - 50	✓
21(7)	Duties, responsibilities, and replacement of transaction parties	51 - 53	✓
21(8)	Expertise of the servicer	54, 55	✓
21(9)	Remedies and actions by servicer related to delinquency and default of debtor, priorities of payments, triggers for changes, obligation to report	56 - 61	✓
21(10)	Resolution of investor conflicts and fiduciary party responsibilities and duties	62, 63	✓
Articles 22 and 7 – Transparency			
22(1)	Historical asset data	64 - 66	✓
22(2)	AUP/asset verification	67, 68	✓
22(3)	Liability cashflow model	69, 70	✓
22(4)	Environmental performance of asset	71	✓
22(5)	Responsibility for article 7, information disclosure before pricing and 15 days after closing	72 - 75	✓
7(1)	Transparency requirements: underlying loan data, documentation, priority of payments, transaction summary, STS notification, investor report, inside information, significant event report, simultaneous, without delay	76 - 101	✓
7(2)	Transparency requirements: securitisation repository, designation of responsible entity,	102, 103	✓

<p>1. The title to the underlying exposures shall be acquired by the SSPE by means of a true sale or assignment or transfer with the same legal effect in a manner that is enforceable against the seller or any other third party.</p>		
Verified?		Yes
PCS Comment		
<p>The Receivables to be sold and assigned by the Seller to the Issuer will result from Loans granted to Borrowers which, pursuant to the policies of the Seller, qualify as 'small and medium sized enterprises (SME)' in the Netherlands. The Loans may be unsecured or secured by various forms of collateral over various types of assets.</p> <p>The Receivables to be assigned on the Closing Date, will be assigned in accordance with article 3:94(3) of the Dutch Civil Code, without notification of the assignment to the Borrowers (stille cessie) by means of a notarial deed of assignment or private deed of assignment which will be registered with the Dutch tax authorities. Legal title will pass upon (i) the notarial deed being executed before the notary or (ii) registration of the private Deed of Assignment and Pledge. Furthermore, any New Receivables to be assigned on a Notes Payment Date during the Revolving Period, will be assigned in accordance with article 3:94(3) of the Dutch Civil Code as well.</p> <p>For the purpose of compliance with article 20(1) of the EU Securitisation Regulation, the Seller and the Issuer confirm that pursuant to the Receivables Purchase Agreement the Issuer will purchase and accept from the Seller the assignment of the Receivables by means of a registered Deed of Assignment and Pledge as a result of which legal title to the Receivables is transferred to the Issuer and such purchase and assignment will be enforceable against the Seller and third parties of the Seller, subject to any applicable bankruptcy laws or similar laws affecting the rights of creditors and as a result thereof the requirement stemming from article 20(5) of the EU Securitisation Regulation is not applicable (see also section 7.1 (Purchase, Repurchase and Sale)).</p> <p>For the purpose of compliance with article 20(2) of the EU Securitisation Regulation, the Seller and the Issuer confirm that the Dutch Bankruptcy Act (Faillissementswet) does not contain severe clawback provisions as referred to in article 20(2) of the EU Securitisation Regulation and the Seller will represent on the relevant purchase date to the Issuer in the Receivables Purchase Agreement that (a) it has its seat in the Netherlands and (b) it is not subject to any intervention, resolution or recovery measures described in Regulation (EU) No 806/2014 of 15 July 2014 establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism and a Single Resolution Fund and Chapter 3a.2 of the Wft and Chapter 6 of the Wft respectively and has not been dissolved (ontbonden) or declared bankrupt (failliet verklaard).</p> <p>See sections 4.4, 5.9, 7.1, 2.6 and 1.2.</p> <p>PCS has been provided with the transaction legal opinion by Allen & Overy a reputable law firm in the Netherlands.</p> <p>"True sale" is not a legal concept but a rating agency creation. The essence of a "true sale" is that the property in the securitised assets has legally moved from the originator/seller to the SSPE in such a way that the SSPE's ownership will be recognised as a matter of law, including and especially in the case of the insolvency of the originator/seller. In a "true sale" the insolvency officer and creditors of the insolvent originator/seller are not able to satisfy the claims of the originator/seller's creditor out of the proceeds of the securitised assets. Following a "true sale" there is no legal device by which the assets can automatically revert to the originator/seller's ownership. Such automatic reversion is associated with security interests and anathema to a "true sale".</p> <p>This is clearly stated in the wording of the Regulation (20.1). The expression "transfer to the same effect" indicates that, as long as the conditions in the preceding paragraph are met, the Regulation does not seek to limit the type of legal devices which can be used to effect such transfer of title. The issue of "true sale" is separate from the issue of "clawback". "Clawback" refers to legal processes through which, in the insolvency of the seller of an asset, an insolvency officer is entitled to reverse the sale – even in cases where a "true sale" has taken place.</p> <p>All European jurisdictions, to PCS' knowledge, have rules allowing for clawbacks. Clawbacks are usually rules to avoid a company heading towards insolvency from "defrauding" its existing creditors either by selling assets at very low prices (to friends and relations) or unfairly preferring certain creditors over others.</p> <p>The Regulation (20.1) therefore does not require STS "true sales" to be clawback-proof, since this would mean that no European securitisation could ever be STS. It does require the sale not to be subject to "severe clawback". The Regulation does not define "severe clawback" but gives an example (20.2) where a clawback may occur. The Regulation (20.3) also explicitly excludes from the definition of "severe clawback" the traditional European basis for such devices which all come under the general category of "preferences". PCS further notes that the examples (20.2 and 20.3) refer to the insolvency law of a jurisdiction and therefore believes that clawback risk is to be assessed on a jurisdictional basis rather than on a transactional basis. Finally, PCS does not believe and nor is there</p>		

	<p>any evidence that the legislators or regulatory authorities are seeking to craft a higher standard than that which has been used for decades by the market and was the basis for the legislative text. Based on the above considerations, PCS believes that transfers from a jurisdiction meeting the following criteria – absent any other indications – shall not fall within the definition of “severe clawback”:</p> <ul style="list-style-type: none"> • Clawback requires an unfair preference “defrauding” creditors • Clawback puts the burden of proof on the insolvency officer or creditors – in other words it cannot be automatic nor require the purchaser to prove their innocence. <p>Since “severe clawback” is a jurisdictional concept, in analysing this issue PCS will therefore first seek to determine the Seller’s jurisdiction for the purposes of insolvency proceedings affecting the originator. As confirmed in the above-mentioned opinion, the laws of The Netherlands would apply in the case of insolvency procedures affecting the Seller, since The Netherlands is the (regulatory) home member state of the Seller.</p> <p>On the basis of the Winding-up Directive, the administrative or judicial authorities of the home member state of the Seller, being Dutch, shall alone be empowered to decide on the implementation of one or more reorganisation measures in a bank, including branches in other member states, or the opening of winding-up proceedings concerning such bank.</p> <p>The second step would be to determine whether the laws of the relevant jurisdiction contains severe claw back provisions in their insolvency legislation.</p> <p>In the case of the Transaction, title to the assets is transferred by assignment.</p> <p>The legal opinion from Allen & Overy confirms that this assignment meets the definition of “true sale” outlined above.</p> <p>Dutch insolvency laws provide for clawback in the cases of preferences and transactions at an undervalue and require the insolvency officer to prove that case. Therefore, and as confirmed by the Opinions, the transfer is not, in our opinion, subject to “severe clawback”.</p>

PCS Comment		
<p>Notification to the borrowers is not applicable to perfect the transfer of legal title by means of an assignment and pledge. See section 4.4. STS-securitisation statements (a)</p> <p>Criterion 4 requires two steps:</p>		

	<ul style="list-style-type: none"> - To determine whether the transfer of the assets is by means of an unperfected assignment; and - If it is, whether the transaction contains the requisite triggers. <p>Although the transfer is not notified to the borrowers, the legal opinion confirms that such notification is not required to fully perfect the transfer of ownership in the loans to the SSPE. Accordingly, this transaction does not operate by way of an unperfected assignment and the issue of triggers does not arise.</p>

<p>20.7. The underlying exposures transferred from, or assigned by, the seller to the SSPE shall meet pre-determined, clear and documented eligibility criteria which do not allow for active portfolio management of those exposures on a discretionary basis. For the purpose of this paragraph, substitution of exposures that are in breach of representations and warranties shall not be considered active portfolio management. Exposures transferred to the SSPE after the closing of the transaction shall meet the eligibility criteria applied to the initial underlying exposures.</p>		
STS criteria		SEE RELATED EBA GUIDELINES
<p>6. The underlying exposures transferred from, or assigned by, the seller to the SSPE shall meet pre-determined, clear and documented eligibility criteria....</p>		
Verified?		Yes
<p>PCS Comment</p> <p>See Section 7.2, Representations and Warranties including in particular item (h) regarding compliance together with the Loan Criteria as detailed in Section 7.3.</p> <p>The EBA Guidelines clarify that “clear” does not mean easily readable or comprehended by a non-expert. In the Regulation a criterion is “clear” when a court or tribunal could determine whether, presumably in all cases, the criterion is met for each asset. In the Regulation, “clear” is about certainty of determination.</p> <p>PCS has read the eligibility criteria in the Prospectus. As they are mandatory, they meet the “predetermined” requirement. As they are in the Prospectus and in the Receivables Purchase Agreement they meet the “documented” requirement. PCS has also concluded that they allow determination in each case and so meet the “clear” requirement.</p>		
7	STS criteria	SEE RELATED EBA GUIDELINES

Verified?		Yes
PCS Comment		
<p>See section 4.4, STS-securitisation statements (f)</p> <p>See 6.1, data tables and homogeneity factor, article 2 3 (a) (i) applies.</p> <p>See section 6.3 Origination and Servicing.</p> <p>The definition of “homogeneity” in the Regulation is to be the subject of a Regulatory Technical Standard (“RTS”). Being set out in an RTS, rather than a guideline or recommendation issued by the EBA, the definition of “homogeneity” will be legally binding on all regulatory authorities.</p> <p>Although a final draft of such RTS has been formally adopted by the European Commission, PCS notes that such RTS has not yet come into force. It is not necessary, as a technical legal matter, for the RTS to come into force before STS securitisations are issued. In the absence of the RTS, market participants must turn to the text of the Regulation to interpret what “homogeneity” means. In interpreting the expression, PCS has based itself on the text of the Regulation, its knowledge of the intent of the legislators – including, crucially, the legislators belief that the STS Regulation was justified by the excellent performance of most “plain vanilla” European securitisations and the draft RTS adopted by the European Commission.</p> <p>Based on the above, it seems clear to PCS that the Regulation would not seek to exclude from the STS category securitisations that have performed extremely well and are universally considered “homogenous” by market participants. This does not exonerate any transaction from being analysed against this criterion but does set the background for such analysis.</p> <p>Turning, for guidance, to the draft RTS adopted by the European Commission, four elements require examination: (a) “similar underwriting standards”, (b) “similar servicing standards”, (c) same asset class and (d) relevant risk factors.</p> <p>Until the RTS is finally approved and following the guiding principles of the EBA, we note that “similar underwriting standards” must mean something like the same type of underwriting approach, looking at the same types of data points to calculate the same type of credit risk. It cannot mean “exactly the same underwriting criteria”, since this would make it impossible for any securitisation ever to have a “homogenous” pool</p> <p>In the Transaction, the loans were underwritten on a similar basis, they are being serviced on the same platform, they are a single asset class – SME loans – and, based on the EBA’s suggested approach, the loans are all originated in the same jurisdiction.</p> <p>PCS also takes great comfort from the fact that transactions containing pools with similar characteristics are considered to be “homogenous” by a wide variety of market participants.</p>

Definitions:

“AUP”: the agreed upon procedures through which an external firm verifies certain aspects of the asset pool.

“COMI”: centre of main interest – broadly, the legal jurisdiction where the insolvency of the seller of assets will be primarily determined.

“Issuer Notification”: the notification provided by the originator or sponsor pursuant to article 27 of the STS Regulation.

“Jurisdiction List”: the list of jurisdictions where it has been determined that severe clawback provisions do not apply.

“Legal Opinion”: an opinion signed by a law firm qualified in the relevant jurisdiction and acting for the originator or the arranger where the law firm sets out the reasons why, in its opinion and subject to customary assumptions and qualifications, the assets are transferred in such a way as to meet the STS Criterion for “true sale” or the same type of opinion for prior sales together with an opinion on the enforceability of the underlying assets.

“Marketing Documents”: Documents prepared by or on behalf of the originator and used in the marketing of the transaction with potential investors.

“Model”: a liability cash flow model which precisely represents the contractual relationship between the underlying exposures and the payments flowing between the originator, sponsor, investors, other third parties and the SSPE.

“Prospectus/Deal Sheet”: the prospectus, or for a deal where no prospectus needs to be drawn up, the deal sheet envisaged by article 7.1(c) of the STS Regulation.

“Prospectus Regulation”: Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC.

“Transaction Document”: a document entered into in relation to the transaction binding on one or more parties connected to the transaction.

1,	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
2	EBA Final non-ABCP STS Guidelines – statements on background and rationale	
<p>True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</p> <p>16. The criterion specified in Article 20(1) aims to ensure that the underlying exposures are beyond the reach of, and are effectively ring-fenced and segregated from, the seller, its creditors and its liquidators, including in the event of the seller's insolvency, enabling an effective recourse to the ultimate claims for the underlying exposures.</p> <p>22. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) how to substantiate the confidence of third parties with respect to compliance with Article 20(1): it is understood that this should be achieved by providing a legal opinion. While the guidance does not explicitly require the provision of a legal opinion in all cases, the guidance expects a legal opinion to be provided as a general rule, and omission to be an exception;</p> <p>(b) the triggers to effect the perfection of the transfer if assignments are perfected at a later stage than at the closing of the transaction.</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</p> <p>True sale, assignment or transfer with the same legal effect</p> <p>10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:</p> <p>(a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;</p> <p>(b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;</p> <p>(c) assessment of clawback risks and re-characterisation risks</p> <p>11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.</p> <p>12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.</p>		

2a	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</p> <p>17. The criterion in Article 20(2) is designed to ensure the enforceability of the transfer of legal title in the event of the seller's insolvency. More specifically, if the underlying exposures sold to the SSPE could be reclaimed for the sole reason that their transfer was effected within a certain period before the seller's insolvency, or if the SSPE could prevent the reclaim only by proving that it was unaware of the seller's insolvency at the time of transfer, such clauses would expose investors to a high risk that the underlying exposures would not effectively back their contractual claims. For this reason, Article 20(2) specifies that such clauses constitute severe clawback provisions, which may not be contained in STS securitisation.</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</p> <p>True sale, assignment or transfer with the same legal effect</p> <p>10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:</p> <ul style="list-style-type: none"> (a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale; (b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework; (c) assessment of clawback risks and re-characterisation risks. <p>11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.</p> <p>12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.</p>		

2b	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</p> <p>18. Whereas, pursuant to Article 20(2), contractual terms and conditions attached to the transfer of title that expose investors to a high risk that the securitised assets will be reclaimed in the event of the seller's insolvency should not be permissible in STS securitisations, such prohibition should not include the statutory provisions granting the right to a liquidator or a court to invalidate the transfer of title with the aim of preventing or combating fraud, as referred to in Article 20(3).</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</p> <p><i>True sale, assignment or transfer with the same legal effect</i></p> <p>10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:</p> <p>(a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;</p> <p>(b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;</p> <p>(c) assessment of clawback risks and re-characterisation risks.</p> <p>11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.</p> <p>12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.</p>		

3	BACK TO CHECKLIST
Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
19. Article 20(4) specifies that, where the transfer of title occurs not directly between the seller and the SSPE but through one or more intermediary steps involving further parties, the requirements relating to the true sale, assignment or other transfer with the same legal effect, apply at each step.	
EBA Final non-ABCP STS Guidelines	
4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))	
<i>True sale, assignment or transfer with the same legal effect</i>	
10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:	
(a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;	
(b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;	
(c) assessment of clawback risks and re-characterisation risks.	
11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.	
12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.	

4	BACK TO CHECKLIST
Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))	
20. The objective of the criterion in Article 20(5) is to minimise legal risks related to unperfected transfers in the context of an assignment of the underlying exposures, by specifying a minimum set of events subsequent to closing that should trigger the perfection of the transfer of the underlying exposures.	
22. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:	
(a) how to substantiate the confidence of third parties with respect to compliance with Article 20(1): it is understood that this should be achieved by providing a legal opinion. While the guidance does not explicitly require the provision of a legal opinion in all cases, the guidance expects a legal opinion to be provided as a general rule, and omission to be an exception;	
(b) the triggers to effect the perfection of the transfer if assignments are perfected at a later stage than at the closing of the transaction.	
EBA Final non-ABCP STS Guidelines	
4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))	
<i>Severe deterioration in the seller credit quality standing</i>	
13. For the purposes of Article 20(5) of Regulation (EU) 2017/2402, the transaction documentation should identify, with regard to the trigger of 'severe deterioration in the seller credit quality standing', credit quality thresholds that are objectively observable and related to the financial health of the seller.	
<i>Insolvency of the seller</i>	
14. For the purposes of Article 20(5) of Regulation (EU) 2017/2402, the trigger of 'insolvency of the seller' should refer, at least, to events of legal insolvency as defined in national legal frameworks.	

5	<i>Article 20 - Requirements relating to simplicity</i>	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>21. The objective of the criterion in Article 20(6), which requires the seller to provide the representations and warranties confirming to the seller's best knowledge that the transferred exposures are neither encumbered nor otherwise in a condition that could potentially adversely affect the enforceability of the transfer of title, is to ensure that the underlying exposures are not only beyond the reach not only of the seller but equally of its creditors, and to allocate the commercial risk of the encumbrance of the underlying exposures to the seller.</p>		
EBA Final non-ABCP STS Guidelines		

6	<i>Article 20 - Requirements relating to simplicity</i>	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))		
<p>23. The objective of this criterion in Article 20(7) is to ensure that the selection and transfer of the underlying exposures in the securitisation is done in a manner which facilitates in a clear and consistent fashion the identification of which exposures are selected for/transferred into the securitisation, and to enable the investors to assess the credit risk of the asset pool prior to their investment decisions.</p>		
EBA Final non-ABCP STS Guidelines		
4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))		
<i>Clear eligibility criteria</i>		
<p>17. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, the criteria should be understood to be 'clear' where compliance with them is possible to be determined by a court or tribunal, as a matter of law or fact or both.</p>		

7	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</p> <p>24. Consistently with this objective, the active portfolio management of the exposures in the securitisation should be prohibited, given that it adds a layer of complexity and increases the agency risk arising in the securitisation by making the securitisation's performance dependent on both the performance of the underlying exposures and the performance of the management of the transaction. The payments of STS securitisations should depend exclusively on the performance of the underlying exposures.</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</p> <p>Active portfolio management</p> <p>15. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, active portfolio management should be understood as portfolio management to which either of the following applies:</p> <p>(a) the portfolio management makes the performance of the securitisation dependent both on the performance of the underlying exposures and on the performance of the portfolio management of the securitisation, thereby preventing the investor from modelling the credit risk of the underlying exposures without considering the portfolio management strategy of the portfolio manager;</p> <p>(b) the portfolio management is performed for speculative purposes aiming to achieve better performance, increased yield, overall financial returns or other purely financial or economic benefit.</p> <p>16. The techniques of portfolio management that should not be considered active portfolio management include:</p> <p>(a) substitution or repurchase of underlying exposures due to the breach of representations or warranties;</p> <p>(b) substitution or repurchase of the underlying exposures that are subject to regulatory dispute or investigation to facilitate the resolution of the dispute or the end of the investigation;</p> <p>(c) replenishment of underlying exposures by adding underlying exposures as substitutes for amortised or defaulted exposures during the revolving period;</p> <p>(d) acquisition of new underlying exposures during the 'ramp up' period to line up the value of the underlying exposures with the value of the securitisation obligation(e) repurchase of underlying exposures in the context of the exercise of clean-up call options, in accordance with Article 244(3)(g) of Regulation (EU) 2017/2401;</p> <p>(f) repurchase of defaulted exposures to facilitate the recovery and liquidation process with respect to those exposures;</p> <p>(g) repurchase of underlying exposures under the repurchase obligation in accordance with Article 20(13) of Regulation (EU) 2017/2402.</p>		

8	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</p> <p>25. Revolving periods and other structural mechanisms resulting in the inclusion of exposures in the securitisation after the closing of the transaction may introduce the risk that exposures of lesser quality can be transferred into the pool. For this reason, it should be ensured that any exposure transferred into the securitisation after the closing meets the eligibility criteria, which are no less strict than those used to structure the initial pool of the securitisation.</p> <p>26. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) the purpose of the requirement on the portfolio management, and the provision of examples of techniques which should not be regarded as active portfolio management: this criterion should be considered without prejudice to the existing requirements with respect to the similarity of the underwriting standards in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, which requires that all the underlying exposures in a securitisation be underwritten according to similar underwriting standards;</p> <p>(b) interpretation of the term ‘clear’ eligibility criteria;</p> <p>(c) clarification with respect to the eligibility criteria that need to be met with respect to the exposures transferred to the SSPE after the closing.</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</p> <p><i>Eligibility criteria to be met for exposures transferred to the SSPE after the closing of the transaction</i></p> <p>18. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, ‘meeting the eligibility criteria applied to the initial underlying exposures’ should be understood to mean eligibility criteria that comply with either of the following:</p> <p>(a) with regard to normal securitisations, they are no less strict than the eligibility criteria applied to the initial underlying exposures at the closing of the transaction;</p> <p>(b) with regard to securitisations that issue multiple series of securities including master trusts, they are no less strict than the eligibility criteria applied to the initial underlying exposures at the most recent issuance, with the results that the eligibility criteria may vary from closing to closing, with the agreement of securitisation parties and in accordance with the transaction documentation.</p> <p>19. Eligibility criteria to be applied to the underlying exposures in accordance with paragraph 18 should be specified in the transaction documentation and should refer to eligibility criteria applied at exposure level.</p>		
9	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))</p> <p>27. The criterion on the homogeneity as specified in the first subparagraph of Article 20(8) has been further clarified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402.</p>		
EBA Final non-ABCP STS Guidelines		

10, 11	<p>Article 20 - Requirements relating to simplicity</p> <p>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></p> <p>Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))</p> <p>28. The objective of the criterion specified in the third sentence in the first subparagraph and in the second subparagraph of Article 20(8) is to ensure that the underlying exposures contain valid and binding obligations of the debtor/guarantor, including rights to payments or to any other income from assets supporting such payments that result in a periodic and well-defined stream of payments to the investors.</p> <p>30. To facilitate consistent interpretation of this criterion, a clarification should be provided with respect to:</p> <p>(a) interpretation of the term 'contractually binding and enforceable obligations';</p> <p>EBA Final non-ABCP STS Guidelines</p> <p>4.3 Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))</p> <p><i>Contractually binding and enforceable obligations</i></p> <p>20. For the purposes of Article 20(8) of Regulation (EU) 2017/2402, 'obligations that are contractually binding and enforceable, with full recourse to debtors and, where applicable, guarantors' should be understood to refer to all obligations contained in the contractual specification of the underlying exposures that are relevant to investors because they affect any obligations by the debtor and, where applicable, the guarantor to make payments or provide security.</p>	BACK TO CHECKLIST
-----------	--	-----------------------------------

12, 13	<p>Article 20 - Requirements relating to simplicity</p> <p>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></p> <p>Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))</p> <p>30 (b) a non-exhaustive list of examples of exposures types that should be considered to have defined periodic payment streams. The individual examples are without prejudice to applicable requirements, such as the requirement with respect to the defaulted exposures in accordance with Article 20(11) of Regulation (EU) 2017/2402 and the requirement with respect to the residual value in accordance with Article 20(13) of that regulation.</p> <p>EBA Final non-ABCP STS Guidelines</p> <p>4.3 Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))</p> <p><i>Exposures with periodic payment streams</i></p> <p>21. For the purposes of Article 20(8) of Regulation (EU) 2017/2402, exposures with defined periodic payment streams should include:</p> <p>(a) exposures payable in a single instalment in the case of revolving securitisation, as referred to in Article 20(12) of Regulation (EU) 2017/2402;</p> <p>(b) exposures related to credit card facilities;</p> <p>(c) exposures with instalments consisting of interest and where the principal is repaid at the maturity, including interest-only mortgages;</p> <p>(d) exposures with instalments consisting of interest and repayment of a portion of the principal, where either of the following conditions is met:</p> <p style="padding-left: 20px;">(i) the remaining principal is repaid at the maturity;</p> <p style="padding-left: 20px;">(ii) the repayment of the principal is dependent on the sale of assets securing the exposure, in accordance with Article 20(13) of Regulation (EU) 2017/2402 and paragraphs 47 to 49;</p> <p>(e) exposures with temporary payment holidays as contractually agreed between the debtor and the lender.</p>	BACK TO CHECKLIST
-----------	--	-----------------------------------

14	BACK TO CHECKLIST
Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))	
29. The objective of the criterion specified in the third subparagraph is that the underlying exposures do not include transferable securities, as they may add to the complexity of the transaction and of the risk and due diligence analysis to be carried out by the investor.	
EBA Final non-ABCP STS Guidelines	

15	BACK TO CHECKLIST
Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
No resecuritisation (Article 20(9))	
31. The objective of this criterion is to prohibit resecuritisation subject to derogations for certain cases or for resecuritisation as specified in Regulation (EU) 2017/2402. This is a lesson learnt from the financial crisis, when resecuritisations were structured into highly leveraged structures in which notes of lower credit quality could be re-packaged and credit enhanced, resulting in transactions whereby small changes in the credit performance of the underlying assets had severe impacts on the credit quality of the resecuritisation bonds. The modelling of the credit risk arising in these bonds proved very difficult, also due to high levels of correlations arising in the resulting structures.	
32. The criterion is deemed sufficiently clear and does not require any further clarification.	
EBA Final non-ABCP STS Guidelines	

16	BACK TO CHECKLIST
Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
Underwriting standards (Article 20(10))	
33. The objective of the criterion specified in the first subparagraph of Article 20(10) is to prevent cherry picking and to ensure that the exposures that are to be securitised do not belong to exposure types that are outside the ordinary business of the originator, i.e. types of exposures in which the originator or original lender may have less expertise and/or interest at stake. This criterion is focused on disclosure of changes to the underwriting standards and aims to help the investors assess the underwriting standards pursuant to which the exposures transferred into securitisation have been originated.	
EBA Final non-ABCP STS Guidelines	

17	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Underwriting standards (Article 20(10))		
37. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:		
(a) the term ‘similar exposures’, with reference to requirements specified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402;		
(b) the term ‘no less stringent underwriting standards’: independently of the guidance provided in these guidelines, it is understood that, in the spirit of restricting the ‘originate-to-distribute’ model of underwriting, where similar exposures exist on the originator’s balance sheet, the underwriting standards that have been applied to the securitised exposures should also have been applied to similar exposures that have not been securitised, i.e. the underwriting standards should have been applied not solely to securitised exposures;		
EBA Final non-ABCP STS Guidelines		
4.4 Underwriting standards, originator’s expertise (Article 20(10))		
<i>No less stringent underwriting standards</i>		
23. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the underwriting standards applied to securitised exposures should be compared to the underwriting standards applied to similar exposures at the time of origination of the securitised exposures.		
24. Compliance with this requirement should not require either the originator or the original lender to hold similar exposures on its balance sheet at the time of the selection of the securitised exposures or at the exact time of their securitisation, nor should it require that similar exposures were actually originated at the time of origination of the securitised exposures.		

18	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Underwriting standards (Article 20(10))</p> <p>37 (c) clarification of the requirement to disclose material changes from prior underwriting standards to potential investors without undue delay: the guidance clarifies that this requirement should be forward-looking only, referring to material changes to the underwriting standards after the closing of the securitisation. The guidance clarifies the interactions with the requirement for similarity of the underwriting standards set out in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, which requires that all the underlying exposures in securitisation be underwritten according to similar underwriting standards;</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.4 Underwriting standards, originator's expertise (Article 20(10))</p> <p><i>Disclosure of material changes from prior underwriting standards</i></p> <p>25. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, material changes to the underwriting standards that are required to be fully disclosed should be understood to be those material changes to the underwriting standards that are applied to the exposures that are transferred to, or assigned by, the SSPE after the closing of the securitisation in the context of portfolio management as referred to in paragraphs 15 and 16.</p> <p>26. Changes to such underwriting standards should be deemed material where they refer to either of the following types of changes to the underwriting standards:</p> <p>(a) changes which affect the requirement of the similarity of the underwriting standards further specified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402;</p> <p>(b) changes which materially affect the overall credit risk or expected average performance of the portfolio of underlying exposures without resulting in substantially different approaches to the assessment of the credit risk associated with the underlying exposures.</p> <p>27. The disclosure of all changes to underwriting standards should include an explanation of the purpose of such changes.</p> <p>28. With regard to trade receivables that are not originated in the form of a loan, reference to underwriting standards in Article 20(10) should be understood to refer to credit standards applied by the seller to short-term credit generally of the type giving rise to the securitised exposures and proposed to its customers in relation to the sales of its products and services.</p>		

19	BACK TO CHECKLIST
Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
Underwriting standards (Article 20(10))	
<p>34. The objective of the criterion specified in the second subparagraph of Article 20(10) is to prohibit the securitisation of self-certified mortgages for STS purposes, given the moral hazard that is inherent in granting such types of loans.</p> <p>37 (d) the scope of the criterion with respect to the specific types of residential loans as referred to in the second subparagraph of Article 20(10) and to the nature of the information that should be captured by this criterion;</p>	
EBA Final non-ABCP STS Guidelines	
4.4 Underwriting standards, originator’s expertise (Article 20(10))	
Residential loans	
<p>29. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the pool of underlying exposures should not include residential loans that were both marketed and underwritten on the premise that the loan applicant or intermediaries were made aware that the information provided might not be verified by the lender.</p> <p>30. Residential loans that were underwritten but were not marketed on the premise that the loan applicant or intermediaries were made aware that the information provided might not be verified by the lender, or become aware after the loan was underwritten, are not captured by this requirement.</p> <p>31. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the ‘information’ provided should be considered to be only relevant information. The relevance of the information should be based on whether the information is a relevant underwriting metric, such as information considered relevant for assessing the creditworthiness of a borrower, for assessing access to collateral and for reducing the risk of fraud.</p> <p>32. Relevant information for general non-income-generating residential mortgages should normally be considered to constitute income, and relevant information for income-generating residential mortgages should normally be considered to constitute rental income. Information that is not useful as an underwriting metric, such as mobile phone numbers, should not be considered relevant information.</p>

Article 20 - Requirements relating to simplicity	
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
Underwriting standards (Article 20(10))	
<p>35. The objective of the criterion specified in the third subparagraph of Article 20(10) is to ensure that the assessment of the borrower’s creditworthiness is based on robust processes. It is expected that the application of this article will be limited in practice, given that the STS is limited to originators based in the EU, and the criterion is understood to cover only exposures originated by the EU originators to borrowers in non-EU countries.</p> <p>37. (e) clarification of the criterion with respect to the assessment of a borrower’s creditworthiness based on equivalent requirements in third countries;</p>	
EBA Final non-ABCP STS Guidelines	

21	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
Underwriting standards (Article 20(10))		
36. The objective of the criterion specified in the fourth subparagraph of Article 20(10) is for the originator or original lender to have an established performance history of credit claims or receivables similar to those being securitised, and for an appropriately long period of time.		
37. (f) identification of criteria on which the expertise of the originator or the original lender should be determined:		
(i) when assessing if the originator or the original lender has the required expertise, some general principles should be set out against which the expertise should be assessed. The general principles have been designed to allow a robust qualitative assessment of the expertise. One of these principles is the regulatory authorisation: this is to allow for more flexibility in such qualitative assessments of the expertise if the originator or the original lender is a prudentially regulated institution which holds regulatory authorisations or permissions that are relevant with respect to origination of similar exposures. The regulatory authorisation in itself should, however, not be a guarantee that the originator or original lender has the required expertise;		
(ii) irrespective of such general principles, specific criteria should be developed, based on specifying a minimum period for an entity to perform the business of originating similar exposures, compliance with which would enable the entity to be considered to have a sufficient expertise. Such expertise should be assessed at the group level, so that possible restructuring at the entity level would not automatically lead to non-compliance with the expertise criterion. It is not the intention of such specific criteria to form an impediment to the entry of new participants to the market. Such entities should also be eligible for compliance with the expertise criterion, as long as their management body and senior staff with managerial responsibility for origination of similar exposures, have sufficient experience over a minimum specified period.		
38. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.		
EBA Final non-ABCP STS Guidelines		
4.4 Underwriting standards, originator's expertise (Article 20(10))		
Similar exposures		
22. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, exposures should be considered to be similar when one of the following conditions is met:		
(a) the exposures belong to one of the following asset categories referred to in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402:		
(i) residential loans secured with one or several mortgages on residential immovable property, or residential loans fully guaranteed by an eligible protection provider among those referred to in Article 20(1) of Regulation (EU) No 575/2013 qualifying for credit quality step 2 or above as set out in Part Three, Title II, Chapter 2 of that regulation;		
(ii) commercial loans secured with one or several mortgages on commercial immovable property or other commercial premises;		
(iii) credit facilities provided to individuals for personal, family or household consumption purposes;		
(iv) auto loans and leases;		
(v) credit card receivables;		
(vi) trade receivables;		
(b) the exposures fall under the asset category of credit facilities provided to micro-, small-, medium-sized and other types of enterprises and corporates including loans and leases, as referred to in Article 2(d) of the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, as underlying exposures of a certain type of obligor;		
(c) where they do not belong to any of the asset categories referred to in points (a) and (b) of this paragraph and as referred to in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous for the purposes of Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, the underlying exposures share similar characteristics with respect to the type of obligor, ranking of security rights, type of immovable property and/or jurisdiction.		
<i>Criteria for determining the expertise of the originator or original lender</i>		
34. For the purposes of determining whether an originator or original lender has expertise in originating exposures of a similar nature to those securitised in accordance with Article 20(10) of Regulation (EU) 2017/2402, both of the following should apply:		

(a) the members of the management body of the originator or original lender and the senior staff, other than the members of the management body, responsible for managing the originating of exposures of a similar nature to those securitised should have adequate knowledge and skills in the origination of exposures of a similar nature to those securitised;

(b) any of the following principles on the quality of the expertise should be taken into account:

(i) the role and duties of the members of the management body and the senior staff and the required capabilities should be adequate;

(ii) the experience of the members of the management body and the senior staff gained in previous positions, education and training should be sufficient;

(iii) the involvement of the members of the management body and the senior staff within the governance structure of the function of originating the exposures should be appropriate;

(iv) in the case of a prudentially regulated entity, the regulatory authorisations or permissions held by the entity should be deemed relevant to origination of exposures of a similar nature to those securitised.

35. An originator or original lender should be deemed to have the required expertise when either of the following applies:

(a) the business of the entity, or of the consolidated group to which the entity belongs for accounting or prudential purposes, has included the originating of exposures similar to those securitised, for at least five years;

(b) where the requirement referred to in point (a) is not met, the originator or original lender should be deemed to have the required expertise where they comply with both of the following:

(i) at least two of the members of the management body have relevant professional experience in the origination of exposures similar to those securitised, at a personal level, of at least five years;

(ii) senior staff, other than members of the management body, who are responsible for managing the entity's originating of exposures similar to those securitised, have relevant professional experience in the origination of exposures of a similar nature to those securitised, at a personal level, of at least five years.

36. For the purposes of demonstrating the number of years of professional experience, the relevant expertise should be disclosed in sufficient detail and in accordance with the applicable confidentiality requirements to permit investors to carry out their obligations under Article 5(3)(c) of Regulation (EU) 2017/2402.

23	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))</p> <p>39. The objective of the criterion in Article 20(11) is to ensure that STS securitisations are not characterised by underlying exposures whose credit risk has already been affected by certain negative events such as disputes with credit-impaired debtors or guarantors, debt restructuring processes or default events as identified by the EU prudential regulation. Risk analysis and due diligence assessments by investors become more complex whenever the securitisation includes exposures subject to certain ongoing negative credit risk developments. For the same reasons, STS securitisations should not include underlying exposures to credit-impaired debtors or guarantors that have an adverse credit history. In addition, significant risk of default normally rises as rating grades or other scores are assigned that indicate highly speculative credit quality and high likelihood of default, i.e. the possibility that the debtor or guarantor is not able to meet its obligations becomes a real possibility. Such exposures to credit-impaired debtors or guarantors should therefore also not be eligible for STS purposes.</p> <p>40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) Interpretation of the term ‘exposures in default’: given the differences in interpretation of the term ‘default’, the interpretation of this criterion should refer to additional guidance on this term provided in the existing delegated regulations and guidelines developed by the EBA, while taking into account the limitation of scope of that additional guidance to certain types of institutions;</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))</p> <p>Exposures in default</p> <p>37. For the purposes of the first subparagraph of Article 20(11) of Regulation (EU) 2017/2402, the exposures in default should be interpreted in the meaning of Article 178(1) of Regulation (EU) 575/2013, as further specified by the Delegated Regulation on the materiality threshold for credit obligations past due developed in accordance with Article 178 of that Regulation, and by the EBA Guidelines on the application of the definition of default developed in accordance with Article 178(7) of that regulation.</p> <p>38. Where an originator or original lender is not an institution and is therefore not subject to Regulation (EU) 575/2013, the originator or original lender should comply with the guidance provided in the previous paragraph to the extent that such application is not deemed to be unduly burdensome. In that case, the originator or original lender should apply the established processes and the information obtained from debtors on origination of the exposures, information obtained from the originator in the course of its servicing of the exposures or in the course of its risk management procedure or information notified to the originator by a third party.</p>		

24	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
<p>No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))</p> <p>39. The objective of the criterion in Article 20(11) is to ensure that STS securitisations are not characterised by underlying exposures whose credit risk has already been affected by certain negative events such as disputes with credit-impaired debtors or guarantors, debt-restructuring processes or default events as identified by the EU prudential regulation. Risk analysis and due diligence assessments by investors become more complex whenever the securitisation includes exposures subject to certain ongoing negative credit risk developments. For the same reasons, STS securitisations should not include underlying exposures to credit-impaired debtors or guarantors that have an adverse credit history. In addition, significant risk of default normally rises as rating grades or other scores are assigned that indicate highly speculative credit quality and high likelihood of default, i.e. the possibility that the debtor or guarantor is not able to meet its obligations becomes a real possibility. Such exposures to credit-impaired debtors or guarantors should therefore also not be eligible for STS purposes.</p> <p>40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(b) Interpretation of the term ‘exposures to a credit-impaired debtor or guarantor’: the interpretation should also take into account the interpretation provided in recital 26 of Regulation (EU) 2017/2402, according to which the circumstances specified in points (a) to (c) of Article 24(9) of that regulation are understood as specific situations of credit-impairedness to which exposures in the STS securitisation may not be exposed. Consequently, other possible circumstances of credit-impairedness that are not captured in points (a) to (c) should be outside the scope of this requirement. Moreover, taking into account the role of the guarantor as a risk bearer, it should be clarified that the requirement to exclude ‘exposures to a credit-impaired debtor or guarantor’ is not meant to exclude (i) exposures to a credit-impaired debtor when it has a guarantor that is not credit impaired; or (ii) exposures to a non-credit-impaired debtor when there is a credit-impaired guarantor;</p> <p>(c) Interpretation of the term ‘to the best knowledge of’: the interpretation should follow the wording of recital 26 of Regulation (EU) 2017/2402, according to which an originator or original lender is not required to take all legally possible steps to determine the debtor’s credit status but is only required to take those steps that the originator/original lender usually takes within its activities in terms of origination, servicing, risk management and use of information that is received from third parties. This should not require the originator or original lender to check publicly available information, or to check entries in at least one credit registry where an originator or original lender does not conduct such checks within its regular activities in terms of origination, servicing, risk management and use of information received from third parties, but rather relies, for example, on other information that may include credit assessments provided by third parties. Such clarification is important because corporates that are not subject to EU financial sector regulation and that are acting as sellers with respect to STS securitisation may not always check entries in credit registries and, in line with the best knowledge standard, should not be obliged to perform additional checks at origination of any exposure for the purposes of later fulfilling this criterion in terms of any credit-impaired debtors or guarantors;</p>		
EBA Final non-ABCP STS Guidelines		
<p>4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))</p> <p>Exposures to a credit-impaired debtor or guarantor</p> <p>39. For the purposes of Article 20(11) of Regulation (EU) 2017/2402, the circumstances specified in points (a) to (c) of that paragraph should be understood as definitions of credit-impairedness. Other possible circumstances of credit-impairedness that are not captured in points (a) to (c) should be considered to be excluded from this requirement.</p> <p>40. The prohibition of the selection and transfer to SSPE of underlying exposures ‘to a credit-impaired debtor or guarantor’ as referred to in Article 20(11) of Regulation (EU) 2017/2402 should be understood as the requirement that, at the time of selection, there should be a recourse for the full securitised exposure amount to at least one non-credit-impaired party, irrespective of whether that party is a debtor or a guarantor. Therefore, the underlying exposures should not include either of the following:</p> <p>(a) exposures to a credit-impaired debtor, when there is no guarantor for the full securitised exposure amount;</p> <p>(b) exposures to a credit-impaired debtor who has a credit-impaired guarantor.</p> <p>To the best of the originator’s or original lender’s knowledge</p> <p>41. For the purposes of Article 20(11) of Regulation (EU) 2017/2402, the ‘best knowledge’ standard should be considered to be fulfilled on the basis of information obtained only from any of the following combinations of sources and circumstances:</p> <p>(a) debtors on origination of the exposures;</p> <p>(b) the originator in the course of its servicing of the exposures or in the course of its risk management procedures;</p> <p>(c) notifications to the originator by a third party;</p> <p>(d) publicly available information or information on any entries in one or more credit registries of persons with adverse credit history at the time of origination of an underlying exposure, only to the extent that this information had already been taken into account in the context of (a), (b) and (c), and in accordance with the applicable regulatory and supervisory requirements, including with respect</p>		

to sound credit granting criteria as specified in Article 9 of Regulation (EU) 2017/2402. This is with the exception of trade receivables that are not originated in the form of a loan, with respect to which credit-granting criteria do not need to be met.

26	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:		
(d) Interpretation of the criterion with respect to the debtors and guarantors found on the credit registry: it is important to interpret this requirement in a narrow sense to ensure that the existence of a debtor or guarantor on the credit registry of persons with adverse credit history should not automatically exclude the exposure to that debtor/guarantor from compliance with this criterion. It is understood that this criterion should relate only to debtors and guarantors that are, at the time of origination of the exposure, considered entities with adverse credit history. Existence on a credit registry at the time of origination of the exposure for reasons that can be reasonably ignored for the purposes of the credit risk assessment (for example due to missed payments which have been resolved in the next two payment periods) should not be captured by this requirement. Therefore, this criterion should not automatically exclude from the STS framework exposures to all entities that are on the credit registries, taking into account that this would unintentionally exclude a significant number of entities given that different practices exist across EU jurisdictions with respect to entry requirements of such credit registries, and the fact that credit registries in some jurisdictions may contain both positive and negative information about the clients;		
EBA Final non-ABCP STS Guidelines		
4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<i>Exposures to credit-impaired debtors or guarantors that have undergone a debt-restructuring process</i>		
42. For the purposes of Article 20(11)(a) of Regulation (EU) 2017/2402, the requirement to exclude exposures to credit-impaired debtors or guarantors who have undergone a debt-restructuring process with regard to their non-performing exposures should be understood to refer to both the restructured exposures of the respective debtor or guarantor and those of its exposures that were not themselves subject to restructuring. For the purposes of this Article, restructured exposures which meet the conditions of points (i) and (ii) of that Article should not result in a debtor or guarantor becoming designated as credit-impaired.		

29	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<p>40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(d) Interpretation of the criterion with respect to the debtors and guarantors found on the credit registry: it is important to interpret this requirement in a narrow sense to ensure that the existence of a debtor or guarantor on the credit registry of persons with adverse credit history should not automatically exclude the exposure to that debtor/guarantor from compliance with this criterion. It is understood that this criterion should relate only to debtors and guarantors that are, at the time of origination of the exposure, considered entities with adverse credit history. Existence on a credit registry at the time of origination of the exposure for reasons that can be reasonably ignored for the purposes of the credit risk assessment (for example due to missed payments which have been resolved in the next two payment periods) should not be captured by this requirement. Therefore, this criterion should not automatically exclude from the STS framework exposures to all entities that are on the credit registries, taking into account that this would unintentionally exclude a significant number of entities given that different practices exist across EU jurisdictions with respect to entry requirements of such credit registries, and the fact that credit registries in some jurisdictions may contain both positive and negative information about the clients;</p>		
EBA Final non-ABCP STS Guidelines		
4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<i>Credit registry</i>		
<p>43. The requirement referred to in Article 20(11)(b) of Regulation (EU) 2017/2402 should be limited to exposures to debtors or guarantors to which both of the following requirements apply at the time of origination of the underlying exposure:</p> <p>(a) the debtor or guarantor is explicitly flagged in a credit registry as an entity with adverse credit history due to negative status or negative information stored in the credit registry;</p> <p>(b) the debtor or guarantor is on the credit registry for reasons that are relevant to the purposes of the credit risk assessment.</p>		

30	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:		
(e) Interpretation of the term 'significantly higher risk of contractually agreed payments not being made for comparable exposures': the term should be interpreted with a similar meaning to the requirement aiming to prevent adverse selection of assets referred to in Article 6(2) of Regulation (EU) 2017/2402, and further specified in the Article 16(2) of the Delegated Regulation specifying in greater detail the risk retention requirement in accordance with Article 6(7) of Regulation (EU) 2017/24027, given that in both cases the requirement (i) aims to prevent adverse selection of underlying exposures and (ii) relates to the comparison of the credit quality of exposures transferred to the SSPE and comparable exposures that remain on the originator's balance sheet. To facilitate the interpretation, a list is given of examples of how to achieve compliance with the requirement.		
EBA Final non-ABCP STS Guidelines		
4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
Risk of contractually agreed payments not being made being significantly higher than for comparable exposures		
44. For the purposes of Article 20(11)(c) of Regulation (EU) 2017/2402, the exposures should not be considered to have a 'credit assessment of a credit score indicating that the risk of contractually agreed payments not being made is significantly higher than for comparable exposures held by the originator which are not securitised' when the following conditions apply:		
(a) the most relevant factors determining the expected performance of the underlying exposures are similar;		
(b) as a result of the similarity referred to in point (a) it could reasonably have been expected, on the basis of indications such as past performance or applicable models, that, over the life of the transaction or over a maximum of four years, where the life of the transaction is longer than four years, their performance would not be significantly different.		
45. The requirement in the previous paragraph should be considered to have been met where either of the following applies:		
(a) the underlying exposures do not include exposures that are classified as doubtful, impaired, non-performing or classified to the similar effect under the relevant accounting principles;		
(b) the underlying exposures do not include exposures whose credit quality, based on credit ratings or other credit quality thresholds, significantly differs from the credit quality of comparable exposures that the originator originates in the course of its standard lending operations and credit risk strategy.		
31	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
At least one payment made (Article 20(12))		
41. STS securitisations should minimise the extent to which investors are required to analyse and assess fraud and operational risk. At least one payment should therefore be made by each underlying borrower at the time of transfer, since this reduces the likelihood of the loan being subject to fraud or operational issues, unless in the case of revolving securitisations in which the distribution of securitised exposures is subject to constant changes because the securitisation relates to exposures payable in a single instalment or with an initial legal maturity of an exposure of below one year.		
42. To facilitate consistent interpretation of this criterion, its scope and the types of payments referred to therein should be further clarified.		
EBA Final non-ABCP STS Guidelines		
4.6 At least one payment made (Article 20(12))		
Scope of the criterion		
46. For the purposes of Article 20(12) of Regulation (EU) 2017/2402, further advances in terms of an exposure to a certain borrower should not be deemed to trigger a new 'at least one payment' requirement with respect to such an exposure.		
At least one payment		
47. For the purposes of Article 20(12) of Regulation (EU) 2017/2402, the payment referred to in the requirement according to which 'at least one payment' should have been made at the time of transfer should be a rental, principal or interest payment or any other kind of payment.		

32	Article 20 - Requirements relating to simplicity	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
No predominant dependence on the sale of assets (Article 20(13))		
<p>43. Dependence of the repayment of the holders of the securitisation positions on the sale of assets securing the underlying exposures increases the liquidity risks, market risks and maturity transformation risks to which the securitisation is exposed. It also makes the credit risk of the securitisation more difficult for investors to model and assess.</p> <p>44. The objective of this criterion is to ensure that the repayment of the principal balance of exposures at the contract maturity – and therefore repayment of the holders of the securitisation positions – is not intended to be predominantly reliant on the sale of assets securing the underlying exposures, unless the value of the assets is guaranteed or fully mitigated by a repurchase obligation.</p> <p>45. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the term 'predominant dependence' on the sale of assets securing the underlying exposures should be further interpreted:</p> <p>(i) when assessing whether the repayment of the holders of the securitisation positions is or is not predominantly dependent on the sale of assets, the following three aspects should be taken into account: (i) the principal balance at contract maturity of underlying exposures that depend on the sale of assets securing those underlying exposures to repay the balance; (ii) the distribution of maturities of such exposures across the life of the transaction, which aims to reduce the risk of correlated defaults due to idiosyncratic shocks; and (iii) the granularity of the pool of exposures, which aims to promote sufficient distribution in sale dates and other characteristics that may affect the sale of the underlying exposures.</p> <p>(i) no types of securitisations should be excluded ex ante from the compliance with this criterion and from the STS securitisation as long as they meet all the requirements specified in the guidance. For example, this criterion does not aim to exclude leasing transactions and interest-only residential mortgages from STS securitisation, provided they comply with the guidance provided and all other applicable STS requirements. However, it is expected that commercial real estate transactions, or securitisations where the assets are commodities (e.g. oil, grain, gold), or bonds whose maturity dates fall after the maturity date of the securitisation, would not meet these requirements, as in all these cases it is expected that the repayment is predominantly reliant on the sale of the assets, that other possible ways to repay the securitisation positions are substantially limited, and that the granularity of the portfolio is low.</p> <p>46. With respect to the exemption provided in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402, it should be ensured that the entity providing the guarantee or the repurchase obligation of the assets securing the underlying exposures is not an empty-shell or defaulted entity, so that it has sufficient loss absorbency to exercise the guarantee of the repurchase of the assets.</p>		
EBA Final non-ABCP STS Guidelines		
4.7 No Predominant dependence on the sale of assets		
<i>Predominant dependence on the sale of assets</i>		
<p>48. For the purposes of Article 20(13) of Regulation (EU) 2017/2402, transactions where all of the following conditions apply, at the time of origination of the securitisation in cases of amortising securitisation or during the revolving period in cases of revolving securitisation, should be considered not predominantly dependent on the sale of assets securing the underlying exposures, and therefore allowed:</p> <p>(a) the contractually agreed outstanding principal balance, at contract maturity of the underlying exposures that depend on the sale of the assets securing those underlying exposures to repay the principal balance, corresponds to no more than 50% of the total initial exposure value of all securitisation positions of the securitisation;</p> <p>(b) the maturities of the underlying exposures referred to in point (a) are not subject to material concentrations and are sufficiently distributed across the life of the transaction;</p> <p>(c) the aggregate exposure value of all the underlying exposures referred to in point (a) to a single obligor does not exceed 2% of the aggregate exposure value of all underlying exposures in the securitisation.</p> <p>49. Where there are no underlying exposures in the securitisation that depend on the sale of assets to repay their outstanding principal balance at contract maturity, the requirements in paragraph 48 should not apply.</p>		
<i>Exemption provided in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402</i>		
<p>50. The exemption referred to in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402 with regard to the repayment of holders of securitisation positions whose underlying exposures are secured by assets, the value of which is guaranteed or fully mitigated by a repurchase obligation of either the assets securing the underlying exposures or of the underlying exposures themselves by another third party or parties, the seller or the third parties should meet both of the following conditions:</p> <p>(a) they are not insolvent;</p> <p>(b) there is no reason to believe that the entity would not be able to meet its obligations under the guarantee or the repurchase obligation.</p>

34	BACK TO CHECKLIST
Article 21 - Requirements relating to standardisation	
EBA Final non-ABCP STS Guidelines – statements on background and rationale	
Appropriate mitigation of interest-rate and currency risks (Article 21(2))	
<p>49. The objective of this criterion is to reduce any payment risk arising from different interest-rate and currency profiles of assets and liabilities. Mitigating or hedging interest-rate and currency risks arising in the transaction enhances the simplicity of the transaction, since it helps investors to model those risks and their impact on the credit risk of the securitisation investment.</p> <p>50. It should be clarified that hedging (through derivative instruments) is only one possible way of addressing the risks mentioned. Whichever measure is applied for the risk mitigation, it should, however, be subject to specific conditions so that it can be considered to appropriately mitigate the risks mentioned.</p> <p>51. One of these conditions aims to prohibit derivatives that do not serve the purpose of hedging interest-rate or currency risk from being included in the pool of underlying exposures or entered into by the SSPE, given that derivatives add to the complexity of the transaction and to the complexity of the risk and due diligence analysis to be carried out by the investor. Derivatives hedging interest-rate or currency risk enhance the simplicity of the transaction, since hedged transactions do not require investors to engage in the modelling of currency and interest-rate risks.</p> <p>52. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) conditions that the measures should comply with so that they can be considered to appropriately mitigate the interest-rate and currency risks;</p> <p>(b) clarification with respect to the scope of derivatives that should and should not be captured by this criterion;</p> <p>(c) clarification of the term 'common standards in international finance'.</p>	
EBA Final non-ABCP STS Guidelines	
5.1 Appropriate mitigation of interest-rate and currency risks (Article 21(2))	
Appropriate mitigation of interest-rate and currency risks	
<p>51. For the purposes of Article 21(2) of Regulation (EU) 2017/2402 in order for the interest-rate and currency risks arising from the securitisation to be considered 'appropriately mitigated', it should be sufficient that a hedge or mitigation is in place, on condition that it is not unusually limited with the effect that it covers a major share of the respective interest-rate or currency risks under relevant scenarios, understood from an economic perspective. Such a mitigation may also be in the form of derivatives or other mitigating measures including reserve funds, over collateralisation, excess spread or other measures.</p> <p>52. Where the appropriate mitigation of interest-rate and currency risks is carried out through derivatives, all of the following requirements should apply:</p> <p>(a) the derivatives should be used only for genuine hedging of asset and liability mismatches of interest rates and currencies, and should not be used for speculative purposes;</p> <p>(b) the derivatives should be based on commonly accepted documentation, including International Swaps or Derivatives Association (ISDA) or similar established national documentation standards;</p> <p>(c) the derivative documentation should provide, in the event of the loss of sufficient creditworthiness of the counterparty below a certain level, measured either on the basis of the credit rating or otherwise, that the counterparty is subject to collateralisation requirements or makes a reasonable effort for its replacement or guarantee by another counterparty.</p>	

	53. Where the mitigation of interest-rate and currency risks referred to in Article 21(2) of Regulation (EU) 2017/2402 is carried out not through derivatives but by other risk-mitigating measures, those measures should be designed to be sufficiently robust. When such risk-mitigating measures are used to mitigate multiple risks at the same time, the disclosure required by Article 21(2) of Regulation (EU) 2017/2402 should include an explanation of how the measures hedge the interest-rate risks and currency risks on one hand, and other risks on the other hand.

EBA Final non-ABCP STS Guidelines		
<p>5.1 Appropriate mitigation of interest-rate and currency risks (Article 21(2))</p> <p>Common standards in international finance</p> <p>56. For the purposes of Article 21(2) of Regulation (EU) 2017/2402, common standards in international finance should include ISDA or similar established national documentation standards.</p>		

40	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Referenced interest payments (Article 21(3))</p> <p>53. The objective of this criterion is to prevent securitisations from making reference to interest rates that cannot be observed in the commonly accepted market practice. The credit risk and cash flow analysis that investors must be able to carry out should not involve atypical, complex or complicated rates or variables that cannot be modelled on the basis of market experience and practice.</p> <p>54. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the scope of the criterion (by specifying the common types and examples of interest rates captured by this criterion);</p> <p>(b) the term ‘complex formulae or derivatives’.</p>		
EBA Final non-ABCP STS Guidelines		
<p>5.2 Referenced interest payments (Article 21(3))</p> <p>Referenced rates</p> <p>57. For the purposes of Article 21(3) of Regulation (EU) 2017/2402, interest rates that should be considered to be an adequate reference basis for referenced interest payments should include all of the following:</p> <p>(a) interbank rates including the Libor, Euribor and other recognised benchmarks;</p> <p>(b) rates set by monetary policy authorities, including FED funds rates and central banks’ discount rates;</p> <p>(c) sectoral rates reflective of a lender’s cost of funds, including standard variable rates and internal interest rates that directly reflect the market costs of funding of a bank or a subset of institutions, to the extent that sufficient data are provided to investors to allow them to assess the relation of the sectoral rates to other market rates.</p> <p>Complex formulae or derivatives</p> <p>58. For the purposes of Article 21(3) of Regulation (EU) 2017/2402, a formula should be considered to be complex when it meets the definition of an exotic instrument by the Global Association of Risk Professionals (GARP), which is a financial asset or instrument with features that make it more complex than simpler, plain vanilla, products. A complex formula or derivative should not be deemed to exist in the case of the mere use of interest-rate caps or floors.</p>		

41	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Requirements in case of enforcement or delivery of an acceleration notice (Article 21(4))</p> <p>55. The objective of this criterion is to prevent investors from being subjected to unexpected repayment profiles and to provide appropriate legal comfort regarding their enforceability, for instances where an enforcement or an acceleration notice has been delivered.</p> <p>56. STS securitisations should be such that the required investor’s risk analysis and due diligence do not have to factor in complex structures of the payment priority that are difficult to model, nor should the investor be exposed to complex changes in such structures throughout the life of the transaction. Therefore, it should be ensured that junior noteholders do not have inappropriate payment preference over senior noteholders that are due and payable.</p> <p>57. In addition, taking into account that market risk on the underlying collateral constitutes an element of complexity in the risk and due diligence analysis to be carried out by investors, the objective is also to ensure that the performance of STS securitisations does not rely, due to contractual triggers, on the automatic liquidation at market price of the underlying collateral.</p> <p>58. To facilitate consistent interpretation of this criterion, the scope and operational functioning of conditions specified under letters (a), (b) and (d) of Article 21(4) should be specified further.</p>		
EBA Final non-ABCP STS Guidelines		
<p>5.3 Requirements in the event of enforcement or delivery of an acceleration notice (Article 21(4))</p> <p><i>Exceptional circumstances</i></p> <p>59. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, a list of ‘exceptional circumstances’ should, to the extent possible, be included in the transaction documentation.</p> <p>60. Given the nature of ‘exceptional circumstances’ and in order to allow some flexibility with respect to potential unusual circumstances requiring that cash be trapped in the SSPE in the best interests of investors, where a list of ‘exceptional circumstances’ is included in the transaction documentation in accordance with paragraph 59, such a list should be non-exhaustive.</p> <p><i>Amount trapped in the SSPE in the best interests of investors</i></p> <p>61. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, the amount of cash to be considered as trapped in the SSPE should be that agreed by the trustee or other representative of the investors who is legally required to act in the best interests of the investors, or by the investors in accordance with the voting provisions set out in the transaction documentation.</p> <p>62. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, it should be permissible to trap the cash in the SSPE in the form of a reserve fund for future use, as long as the use of the reserve fund is exclusively limited to the purposes set out in Article 21(4)(a) of Regulation (EU) 2017/2402 or to orderly repayment to the investors.</p>		

42	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Requirements in case of enforcement or delivery of an acceleration notice (Article 21(4))</p> <p>55. The objective of this criterion is to prevent investors from being subjected to unexpected repayment profiles and to provide appropriate legal comfort regarding their enforceability, for instances where an enforcement or an acceleration notice has been delivered.</p> <p>56. STS securitisations should be such that the required investor's risk analysis and due diligence do not have to factor in complex structures of the payment priority that are difficult to model, nor should the investor be exposed to complex changes in such structures throughout the life of the transaction. Therefore, it should be ensured that junior noteholders do not have inappropriate payment preference over senior noteholders that are due and payable.</p> <p>57. In addition, taking into account that market risk on the underlying collateral constitutes an element of complexity in the risk and due diligence analysis to be carried out by investors, the objective is also to ensure that the performance of STS securitisations does not rely, due to contractual triggers, on the automatic liquidation at market price of the underlying collateral.</p> <p>58. To facilitate consistent interpretation of this criterion, the scope and operational functioning of conditions specified under letters (a), (b) and (d) of Article 21(4) should be specified further.</p>		
EBA Final non-ABCP STS Guidelines		
<p>5.3 Requirements in the event of enforcement or delivery of an acceleration notice (Article 21(4))</p> <p>Repayment</p> <p>63. The requirements in Article 21(4)(b) of Regulation (EU) 2017/2402 should be understood as covering only the repayment of the principal, without covering the repayment of interest.</p> <p>64. For the purposes of Article 21(4)(b) of Regulation (EU) 2017/2402, non-sequential payments of principal in a situation where an enforcement or an acceleration notice has been delivered should be prohibited. Where there is no enforcement or acceleration event, principal receipts could be allowed for replenishment purposes pursuant to Article 20(12) of that Regulation.</p>

47,	EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
48,	Early amortisation provisions/triggers for termination of the revolving period (Article 21(6))	
49,	61. The objective of this criterion is to ensure that, in the presence of a revolving period mechanism, investors are sufficiently protected from the risk that principal amounts may not be fully repaid. In all such transactions, irrespective of the nature of the revolving mechanism, investors should be protected by a minimum set of early amortisation triggers or triggers for the termination of the revolving period that should be included in the transaction documentation.	
50	62. In order to facilitate the consistent interpretation of this criterion, interactions of this criterion with the criterion under Article 21(7)(b) with respect to the insolvency-related event with respect to the servicer should be further clarified.	
EBA Final non-ABCP STS Guidelines		
5.5 Early amortisation provisions/triggers for termination of the revolving period (Article 21(6))		
<i>Insolvency-related event with regard to the servicer</i>		
67. For the purposes of Article 21(6)(b) of Regulation (EU) 2017/2402, an insolvency-related event with respect to the servicer should lead to both of the following:		
(a) it should enable the replacement of the servicer in order to ensure continuation of the servicing;		
(b) it should trigger the termination of the revolving period.		

51,	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
52,	EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
53	Transaction Documentation (Article 21(7))	
63. The objective of this criterion is to help provide full transparency to investors, assist investors in the conduct of their due diligence and prevent investors from being subject to unexpected disruptions in cash flow collections and servicing, as well as to provide investors with certainty about the replacement of counterparties involved in the securitisation transaction.		
64. This criterion is considered sufficiently clear and no further guidance is considered necessary.		
EBA Final non-ABCP STS Guidelines		

54	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Expertise of the Servicer (Article 21(8))</p> <p>65. The objective of this criterion is to ensure that all the conditions are in place for the proper functioning of the servicing function, taking into account the crucial importance of servicing in securitisation and the central nature of this function within any securitisation transaction.</p> <p>66. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <ul style="list-style-type: none"> (a) criteria for determining the expertise of the servicer; (b) criteria for determining well-documented and adequate policies, procedures and risk management controls of the servicer. <p>67. The criteria for the expertise of the servicer should correspond to those for the expertise of the originator or the original lender. Newly established entities should be allowed to perform the tasks of servicing, as long as the back-up servicer has the appropriate experience. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.</p>		
EBA Final non-ABCP STS Guidelines		
<p>5.8 Expertise of the servicer (Article 21(8))</p> <p><i>Criteria for determining the expertise of the servicer</i></p> <p>68. For the purposes of determining whether a servicer has expertise in servicing exposures of a similar nature to those securitised in accordance with Article 21(8) of Regulation (EU) 2017/2402, both of the following should apply:</p> <ul style="list-style-type: none"> (a) the members of the management body of the servicer and the senior staff, other than members of the management body, responsible for servicing exposures of a similar nature to those securitised should have adequate knowledge and skills in the servicing of exposures similar to those securitised; (b) any of the following principles on the quality of the expertise should be taken into account in the determination of the expertise: <ul style="list-style-type: none"> (i) the role and duties of the members of the management body and the senior staff and the required capabilities should be adequate; (ii) the experience of the members of the management body and the senior staff gained in previous positions, education and training should be sufficient; (iii) the involvement of the members of the management body and the senior staff within the governance structure of the function of servicing the exposures should be appropriate; (iv) in the case of a prudentially regulated entity, the regulatory authorisations or permissions held by the entity should be deemed relevant to the servicing of similar exposures to those securitised. <p>69. A servicer should be deemed to have the required expertise where either of the following applies:</p> <ul style="list-style-type: none"> (a) the business of the entity, or of the consolidated group, to which the entity belongs, for accounting or prudential purposes, has included the servicing of exposures of a similar nature to those securitised, for at least five years; (b) where the requirement referred to in point (a) is not met, the servicer should be deemed to have the required expertise where they comply with both of the following: <ul style="list-style-type: none"> (i) at least two of the members of its management body have relevant professional experience in the servicing of exposures of a similar nature to those securitised, at personal level, of at least five years; (ii) senior staff, other than members of the management body, who are responsible for managing the entity's servicing of exposures of a similar nature to those securitised, have relevant professional experience in the servicing of exposures of a similar nature to those securitised, at a personal level, of at least five years; (iii) the servicing function of the entity is backed by the back-up servicer compliant with point (a). <p>70. For the purpose of demonstrating the number of years of professional experience, the relevant expertise should be disclosed in sufficient detail and in accordance with the applicable confidentiality requirements to permit investors to carry out their obligations under Article 5(3)(c) of Regulation (EU) 2017/2402.</p> <p><i>Exposures of similar nature</i></p> <p>71. For the purposes of Article 21(8) of Regulation (EU) 2017/2402, interpretation of the term 'exposures of similar nature' should follow the interpretation provided in paragraph 23 above.</p>		

55	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Expertise of the Servicer (Article 21(8))</p> <p>65. The objective of this criterion is to ensure that all the conditions are in place for the proper functioning of the servicing function, taking into account the crucial importance of servicing in securitisation and the central nature of this function within any securitisation transaction.</p> <p>66. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) criteria for determining the expertise of the servicer;</p> <p>(b) criteria for determining well-documented and adequate policies, procedures and risk management controls of the servicer.</p> <p>67. The criteria for the expertise of the servicer should correspond to those for the expertise of the originator or the original lender. Newly established entities should be allowed to perform the tasks of servicing, as long as the back-up servicer has the appropriate experience. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.</p>		
EBA Final non-ABCP STS Guidelines		
<p>Expertise of the Servicer (Article 21(8))</p> <p><i>Well-documented and adequate policies, procedures and risk management controls</i></p> <p>72. For the purposes of Article 21(8) of Regulation (EU) 2017/2402, the servicer should be considered to have well documented and adequate policies, procedures and risk management controls relating to servicing of exposures' where either of the following conditions is met:</p> <p>(a) The servicer is an entity that is subject to prudential and capital regulation and supervision in the Union and such regulatory authorisations or permissions are deemed relevant to the servicing;</p> <p>(b) The servicer is an entity that is not subject to prudential and capital regulation and supervision in the Union, and a proof of existence of well-documented and adequate policies and risk management controls is provided that also includes a proof of adherence to good market practices and reporting capabilities. The proof should be substantiated by an appropriate third-party review, such as by a credit rating agency or external auditor.</p>		

56,	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
57	EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
<p>Remedies and actions related to delinquency and default of debtor (Article 21(9))</p> <p>68. Investors should be in a position to know, when they receive the transaction documentation, what procedures and remedies are planned in the event that adverse credit events affect the underlying exposures of the securitisation. Transparency of remedies and procedures, in this respect, allows investors to model the credit risk of the underlying exposures with less uncertainty. In addition, clear, timely and transparent information on the characteristics of the waterfall determining the payment priorities is necessary for the investor to correctly price the securitisation position.</p> <p>69. To facilitate consistent interpretation of this criterion, the terms ‘in clear and consistent terms’ and ‘clearly specify’ should be further clarified.</p>		
EBA Final non-ABCP STS Guidelines		
<p>5.7 Remedies and actions related to delinquency and default of debtor (Article 21(9))</p> <p><i>Clear and consistent terms</i></p> <p>For the purposes of Article 21(9) of Regulation (EU) 2017/2402, to ‘set out clear and consistent terms’ and to ‘clearly specify’ should be understood as requiring that the same precise terms are used throughout the transaction documentation in order to facilitate the work of investors.</p>		

62,	Article 21 - Requirements relating to standardisation	BACK TO CHECKLIST
63	EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
<p>Resolution of conflicts between different classes of investors</p> <p>70. The objective of this criterion is to help ensure clarity for securitisation noteholders of their rights and ability to control and enforce on the underlying credit claims or receivables. This should make the decision-making process more effective, for instance in circumstances where enforcement rights on the underlying assets are being exercised.</p> <p>71. To facilitate consistent interpretation of this criterion, the term ‘clear provisions that facilitate the timely resolution of conflicts between different classes of investors’ should be further interpreted.</p>		
EBA Final non-ABCP STS Guidelines		
<p>5.8 Resolution of conflicts between different classes of investors (Article 20(10))</p> <p><i>Clear provisions facilitating the timely resolution of conflicts between different classes of investors</i></p> <p>73. For the purposes of Article 21(10) of Regulation (EU) 2017/2402, provisions of the transaction documentation that ‘facilitate the timely resolution of conflicts between different classes of investors’, should include provisions with respect to all of the following:</p> <ul style="list-style-type: none"> (a) the method for calling meetings or arranging conference calls; (b) the maximum timeframe for setting up a meeting or conference call; (c) the required quorum; (d) the minimum threshold of votes to validate such a decision, with clear differentiation between the minimum thresholds for each type of decision; (e) where applicable, a location for the meetings which should be in the Union. <p>74. For the purposes of Article 21(10) of Regulation (EU) 2017/2402, where mandatory statutory provisions exist in the applicable jurisdiction that set out how conflicts between investors have to be resolved, the transaction documentation may refer to these provisions.</p>		

64,	Article 22 - Requirements relating to transparency	BACK TO CHECKLIST
65,	EBA Final non-ABCP STS Guidelines – statements on background and rationale	
66	Data on historical default and loss performance (Article 22(1))	
<p>72. The objective is to provide investors with sufficient information on an asset class to conduct appropriate due diligence and to provide access to a sufficiently rich data set to enable a more accurate calculation of expected loss in different stress scenarios. These data are necessary for investors to carry out proper risk analysis and due diligence, and they contribute to building confidence and reducing uncertainty regarding the market behaviour of the underlying asset class. New asset classes entering the securitisation market, for which a sufficient track record of performance has not yet been built up, may not be considered transparent in that they cannot ensure that investors have the appropriate tools and knowledge to carry out proper risk analysis.</p>		
<p>73. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p>		
<p>(a) its application to external data;</p>		
<p>(b) the term ‘substantially similar exposures’.</p>		
EBA Final non-ABCP STS Guidelines		
6.1 Data on historical default and loss performance (Article 22(1))		
Data		
<p>75. For the purposes of Article 22(1) of Regulation (EU) 2017/2402, where the seller cannot provide data in line with the data requirements contained therein, external data that are publicly available or are provided by a third party, such as a rating agency or another market participant, may be used, provided that all of the other requirements of that article are met.</p>		
Substantially similar exposures		
<p>76. For the purposes of Article 22(1) of Regulation (EU) 2017/2402, the term ‘substantially similar exposures’ should be understood as referring to exposures for which both of the following conditions are met:</p>		
<p>(a) the most relevant factors determining the expected performance of the underlying exposures are similar;</p>		
<p>(b) as a result of the similarity referred to in point (a) it could reasonably have been expected, on the basis of indications such as past performance or applicable models, that, over the life of the transaction, or over a maximum of four years, where the life of the transaction is longer than four years, their performance would not be significantly different.</p>		
<p>77. The substantially similar exposures should not be limited to exposures held on the balance sheet of the originator.</p>		

67,	Article 22 - Requirements relating to transparency	BACK TO CHECKLIST
68	EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
<p>Verification of a sample of the underlying exposures (Article 22(2))</p> <p>74. The objective of the criterion is to provide a level of assurance that the data on and reporting of the underlying credit claims or receivables is accurate and that the underlying exposures meet the eligibility criteria, by ensuring checks on the data to be disclosed to the investors by an external entity not affected by a potential conflict of interest within the transaction.</p> <p>75. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <ul style="list-style-type: none"> (a) requirements on the sample of the underlying exposures subject to external verification; (b) requirements on the party executing the verification; (c) scope of the verification; (d) requirement on the confirmation of the verification. 		
EBA Final non-ABCP STS Guidelines		
<p>6.2 Verification of a sample of the underlying exposures (Article 22(2))</p> <p><i>Sample of the underlying exposures subject to external verification</i></p> <p>78. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, the underlying exposures that should be subject to verification prior to the issuance should be a representative sample of the provisional portfolio from which the securitised pool is extracted and which is in a reasonably final form before issuance.</p> <p><i>Party executing the verification</i></p> <p>79. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, an appropriate and independent party should be deemed to be a party that meets both of the following conditions:</p> <ul style="list-style-type: none"> (a) it has the experience and capability to carry out the verification; (b) it is none of the following: <ul style="list-style-type: none"> (i) a credit rating agency; (ii) a third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402; (iii) an entity affiliated to the originator. <p><i>Scope of the verification</i></p> <p>80. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, the verification to be carried out based on the representative sample, applying a confidence level of at least 95%, should include both of the following:</p> <ul style="list-style-type: none"> (a) verification of the compliance of the underlying exposures in the provisional portfolio with the eligibility criteria that are able to be tested prior to issuance; (b) verification of the fact that the data disclosed to investors in any formal offering document in respect of the underlying exposures is accurate. <p><i>Confirmation of the verification</i></p> <p>81. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, confirmation that this verification has occurred and that no significant adverse findings have been found should be disclosed.</p>		

69,	Article 22 - Requirements relating to transparency	BACK TO CHECKLIST
70	EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>	
<p>Liability cashflow model (Article 22(3))</p> <p>76. The objective of this criterion is to assist investors in their ability to appropriately model the cash flow waterfall of the securitisation on the liability side of the SSPE.</p> <p>77. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) interpretation of the term ‘precise’ representation of the contractual relationships;</p> <p>(b) implications when the model is provided by third parties.</p>		
EBA Final non-ABCP STS Guidelines		
<p>Liability cash flow model (Article 22(3))</p> <p>Precise representation of the contractual relationship</p> <p>82. For the purposes of Article 22(3) of Regulation (EU) 2017/2402, the representation of the contractual relationships between the underlying exposures and the payments flowing among the originator, sponsor, investors, other parties and the SSPE should be considered to have been done ‘precisely’ where it is done accurately and with an amount of detail sufficient to allow investors to model payment obligations of the SSPE and to price the securitisation accordingly. This may include algorithms that permit investors to model a range of different scenarios that will affect cash flows, such as different prepayment or default rates.</p> <p>Third parties</p> <p>83. For the purposes of Article 22(3) of Regulation (EU) 2017/2402, where the liability cash flow model is developed by third parties, the originator or sponsor should remain responsible for making the information available to potential investors.</p>		

71	Article 22 - Requirements relating to transparency	BACK TO CHECKLIST
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
<p>Environmental performance of assets (Article 22(4))</p> <p>78. It should be clarified that this is a requirement of disclosure about the energy efficiency of the assets when this information is available to the originator, sponsor or SSPE, rather than a requirement for a minimum energy efficiency of the assets.</p> <p>79. To facilitate consistent interpretation of this criterion, the term ‘available information related to the environmental performance’ should be further clarified.</p>		
EBA Final non-ABCP STS Guidelines		
<p>Environmental performance of assets (Article 22(4))</p> <p>Available information related to the environmental performance</p> <p>84. This requirement should be applicable only if the information on the energy performance certificates for the assets financed by the underlying exposures is available to the originator, sponsor or the SSPE and captured in its internal database or IT systems. Where information is available only for a proportion of the underlying exposures, the requirement should apply only in respect of the proportion of the underlying exposures for which information is available.</p>
