

STS Term Master Checklist

DELAMARE CARDS MTN ISSUER PLC

of Series 2020-1

PRIME COLLATERALISED SECURITIES (PCS) UK LIMITED

30th July 2020

Analyst: Fazel Ahmed +44 (0) 203 866 5004

This is the STS Term Master Checklist for STS Term Verifications.

This STS Term Checklist must be read together with the PCS Procedures Manual and the PCS Term Evidentiary Standards Manual. This document is based upon the materials received by PCS as at the date of this document. Any references in this document are to the base prospectus dated 28 July 2020 unless otherwise stated.

PCS comments in this STS Term Master Checklist are based on PCS' interpretation of the STS Regulation (the "Regulation") informed by (a) the text of the Regulation itself, (b) the EBA guidelines and recommendations issued in accordance with Article 19(2) of the Regulation (the "EBA Guidelines") and (c) any relevant national competent authorities interpretation of the STS criteria to the extent known to PCS.

It is important that the reader of this checklist reviews and understands the disclaimer referred to on the following page.

30th July 2020

STS Disclaimer

Neither an STS Verification, nor a CRR Assessment, nor an LCR Assessment is a recommendation to buy, sell or hold securities. None are investment advice whether generally or as defined under Markets in Financial Instruments Directive (2004/39/EC) and none are a credit rating whether generally or as defined under the Credit Rating Agency Regulation (1060/2009/EC).

PCS UK and PCS EU are authorised respectively by the UK Financial Conduct Authority and the French *Autorité des Marchés Financiers* as third parties verifying STS compliance pursuant to article 28 of the Regulation (EU) 2017/2402 of the European Parliament and of the Council of 12 December 2017 (the "**STS Regulation**").

Neither CRR Assessments or LCR Assessments are endorsed or regulated by any regulatory and/or supervisory authority nor, other than as set out above, are the PCS Association or either of its subsidiaries, PCS UK and PCS EU, regulated by any regulator and/or supervisory authority including the Belgian Financial Services and Markets Authority, the United Kingdom Financial Conduct Authority, the French *Autorité des Marchés Financiers* or the European Securities and Markets Authority.

By assessing the STS or CRR status of any securities or financing, neither the PCS Association nor PCS UK nor PCS EU express any views about the creditworthiness of these securities or financings or their suitability for any existing or potential investor or as to whether there will be a ready, liquid market for these securities or financings.

Equally, by completing (either positively or negatively) any STS or CRR status assessment of certain instruments, no statement of any kind is made as to the value or price of these instruments or the appropriateness of the interest rate they carry (if any).

In the provision of any STS Verification or CRR Assessment or LCR Assessment, PCS has based its decision on information provided directly and indirectly by the originator or sponsor of the relevant securitisation. Specifically, it has relied on statements made in the relevant prospectus or deal sheet, documentation and/or in certificates provided by, or on behalf of, the originator or sponsor in accordance with PCS' published procedures for the relevant PCS verification or assessment. You should make yourself familiar with these procedures to understand fully how any PCS service is completed. These can be found in the PCS website www.pcsmarket.org (the "**PCS Website**"). Neither the PCS Association nor PCS UK nor PCS EU undertake their own direct verification of the underlying facts stated in the prospectus, deal sheet, documentation or certificates for the relevant instruments and the completion of any STS Verification or CRR Assessment or LCR Assessment is not a confirmation or implication that the information provided to it by or on behalf of the originator or sponsor is accurate or complete.

The PCS entities take reasonable measures to ensure the quality and accuracy of the information on the PCS Website. However, neither the PCS Association nor PCS UK nor PCS EU can be held liable in any way for the inaccuracy or incompleteness of any information that is available on or through the PCS Website. In addition, neither the PCS Association nor PCS UK nor PCS EU can in any way be held liable or responsible for the content of any other website linked to the PCS Website.

To understand the meaning and limitations of any STS Verification you must read the General Disclaimer that appears on the PCS Website.

When entering any of the "Transaction" sections of the PCS Website, you will be asked to declare that you are allowed to do so under the legislation of your country. The circulation and distribution of information regarding securitisation instruments (including securities) that is available on the PCS Website may be restricted in certain jurisdictions. Persons receiving any information or documents with respect to or in connection with instruments (including securities) available on the PCS Website are required to inform themselves of and to observe all applicable restrictions.

Prime Collateralised Securities (PCS) STS Verification

Individual(s) undertaking the assessment	Fazel Ahmed
Date of Assessment /Version	30 July 2020
The transaction to be assessed (the “Transaction”)	Issue of Series 2020-1, DELAMARE CARDS MTN ISSUER PLC
Issuer	DELAMARE CARDS MTN ISSUER PLC
Originators	Tesco Personal Finance PLC
Seller	Tesco Personal Finance PLC
Arranger/Dealer	Citigroup
Transaction Legal Counsel	Allen & Overy LLP
Rating Agencies	S&P and Fitch
Stock Exchange	Irish Stock Exchange
Closing Date	30 July 2020

PCS confirms that all checklist points have been verified as detailed in the associated comment box in the checklist below.

A summary of the checklist points by article is set out in the table on the next page together with a reference to summary headings of the respective article contents. To examine a specific article section from the list below in further detail, please click on the article description in the table below to be taken directly to the relevant section of the detailed checklist.

Article	Summary of article contents	Checklist Points	
Article 20 – Simplicity			
20(1)	True sale	1, 2	✓
20(2)	Severe clawback (part 1)	2	✓
20(3)	Severe clawback (part 2)	2	✓
20(4)	True sale with intermediate steps	3	✓
20(5)	Assignment perfection	4	✓
20(6)	Encumbrances to enforceability of true sale	5	✓
20(7)	Eligibility criteria and active portfolio management	6 - 8	✓
20(8)	Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities	9 - 14	✓
20(9)	No securitisation positions	15	✓
20(10)	Origination, underwriting standards and expertise, unverified home loans	16 - 21	✓
20(11)	No undue delay after selection, no exposures in default and to credit-impaired or insolvent debtors/quarantors, portion of restructured debtors, adverse credit history, higher pool risk	22 - 30	✓
20(12)	At least one payment made	31	✓
20(13)	No predominant dependence on the sale of asset	32	✓
Article 21 – Standardisation			
21(1)	Risk retention	33	✓
21(2)	Appropriate mitigation of interest-rate and currency risks, disclosure, no further derivatives, hedging derivatives according to common standards	34 - 39	✓
21(3)	Referenced interest payments	40	✓
21(4)	Requirements in the event of enforcement or delivery of an acceleration notice: no cash trap, sequential amortisation, no automatic liquidation	41 - 44	✓
21(5)	Non-sequential priority of payments	45	✓
21(6)	Early amortisation provisions/triggers for termination of revolving period	46 - 50	✓
21(7)	Duties, responsibilities and replacement of transaction parties	51 - 53	✓
21(8)	Expertise of the servicer	54, 55	✓
21(9)	Remedies and actions by Servicer related to delinquency and default of debtor, priorities of payments, triggers for changes, obligation to report	56 - 61	✓
21(10)	Resolution of investor conflicts and fiduciary party responsibilities and duties	62, 63	✓
Articles 22 and 7 – Transparency			
22(1)	Historical asset data	64 - 66	✓
22(2)	AUP/asset verification	67, 68	✓
22(3)	Liability cashflow model	69, 70	✓
22(4)	Environmental performance of asset	71	✓
22(5)	Responsibility for article 7 and information disclosure before pricing and 15 days after closing	72 - 75	✓
7(1)	Transparency requirements: availability of reports, documentation, underlying loan data	76 - 101	✓
7(2)	Transparency requirements: designation of responsible entity, securitisation repository	102, 103	✓

Article 20 - Requirements relating to simplicity		
20.1. The title to the underlying exposures shall be acquired by the SSPE by means of a true sale or assignment or transfer with the same legal effect in a manner that is enforceable against the seller or any other third party. The transfer of the title to the SSPE shall not be subject to severe clawback provisions in the event of the seller's insolvency.		
STS criteria		
1. The title to the underlying exposures shall be acquired by the SSPE by means of a true sale or assignment or transfer with the same legal effect in a manner that is enforceable against the seller or any other third party.		
Verified?		Yes
PCS Comment		
<p>See Programme Overview, Receivables Trust</p> <p>See Risk Factors- B. Risks related to the underlying assets, Transfer of benefit of Receivables</p> <p>The transfer by the Transferor to the Receivables Trustee of the benefit of the Receivables is governed by English law or Scots law, as applicable, and takes effect in equity only, except in the case of Receivables which are governed by Scots law, in which case the transfer takes effect under a declaration of trust which is governed by Scots law pursuant to which the beneficial interest in the Scottish Receivables as trust property is vested in the Receivables Trustee.</p> <p>Confirmation of true sale i.e. enforceability of assignment, an assessment of the re-characterisation risks is provided in the Legal Opinion.</p> <p>PCS has been provided with and reviewed the legal opinion of [Allen & Overy LLP, CMS Cameron McKenna Nabarro Olswang LLP], and NI (Tughans)</p> <p>“True sale” is not a legal concept but a rating agency creation.</p> <p>The essence of a “true sale” is that the property in the securitised assets has legally moved from the originator(s)/seller to the SSPE in such a way that the SSPE’s ownership will be recognised as a matter of law, including and especially in the case of the insolvency of the originator(s)/seller. In a “true sale” the insolvency officer and creditors of the insolvent originator/seller are not able to satisfy the claims of the originator/seller’s creditor out of the proceeds of the securitised assets. Following a “true sale” there is no legal device by which the assets can automatically revert to the originator/seller’s ownership. Such automatic reversion is associated with security interests and anathema to a “true sale”.</p> <p>This is clearly stated in the wording of the Regulation (20.1). The expression “transfer to the same effect” indicates that, as long as the conditions in the preceding paragraph are met, the Regulation does not seek to limit the type of legal devices which can be used to effect such transfer of title.</p> <p>The issue of “true sale” is separate from the issue of “clawback”. “Clawback” refers to legal processes through which, in the insolvency of the seller of an asset, an insolvency officer is entitled to reverse the sale – even in cases where a “true sale” has taken place.</p> <p>All European jurisdictions to PCS’ knowledge, have rules allowing for clawbacks. Clawbacks are usually rules to avoid a company heading towards insolvency from “defrauding” its existing creditors either by selling assets at very low prices (to friends and relations) or unfairly preferring certain creditors over others.</p> <p>The Regulation (20.1) therefore does not require STS “true sales” to be fully clawback-proof since this would mean that no European securitisation could ever be STS. It does require the sale not to be subject to “severe clawback”. The Regulation does not define “severe clawback” but gives an example (20.2) where a clawback may occur.</p> <p>The Regulation (20.3) also explicitly excludes from the definition of “severe clawback” the traditional European basis for such devices which all come under the general category of “preferences”.</p>		

PCS further notes that the examples (20.2 and 20.3) refer to the insolvency law of a jurisdiction and therefore believes that clawback risk is to be assessed on a jurisdictional basis rather than on a transactional basis.

Finally, PCS does not believe and nor is there any evidence that the legislators or regulatory authorities are seeking to craft a higher standard than that which has been used for decades by the market and was the basis for the legislative text.

Based on the above considerations, PCS believes that transfers from a jurisdiction meeting the following criteria – absent any other indications – shall not fall within the definition of “severe clawback”:

- Clawback requires an unfair preference “defrauding” creditors;
- Clawback puts the burden of proof on the insolvency officer or creditors – in other words it cannot be automatic nor require the purchaser to prove their innocence.

Since “severe clawback” is a jurisdictional concept, in analysing this issue PCS will therefore first seek to determine the Originator’s jurisdiction for the purposes of insolvency law. This would be its centre of main interest or “COMI”.

The second step would be to determine whether the relevant COMI contains severe claw back provisions in its insolvency legislation.

Although the determination of a COMI can be a technically fraught analysis of international conflicts of law, PCS notes that in the vast majority of securitisations there is no real issue as the COMI is self-evident.

In the case of the Transaction, title to the assets is transferred, in the case of English and Northern Irish assets by means of an equitable assignment and, in the case of Scottish assets, by a transfer of the beneficial interest only. The legal opinions from Allen & Overy LLP collectively confirm that an equitable assignment and a Scottish assignation meets the definition of “true sale” outlined above.

In the case of Tesco Personal Finance PLC, a United Kingdom credit institution with the totality of its business in the United Kingdom providing inter alia retail banking services in the United Kingdom, the COMI is without meaningful doubt the United Kingdom.

United Kingdom insolvency law provides for clawback in the cases of preferences and transactions at an undervalue and require the insolvency officer to prove that case. Therefore, and as confirmed by the Opinions, the transfer is not, in our opinion, subject to “severe clawback”.

EBA Final non-ABCP STS Guidelines – statements on *background and rationale*

True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))

16. The criterion specified in Article 20(1) aims to ensure that the underlying exposures are beyond the reach of, and are effectively ring-fenced and segregated from, the seller, its creditors and its liquidators, including in the event of the seller’s insolvency, enabling an effective recourse to the ultimate claims for the underlying exposures.

22. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:

- (a) how to substantiate the confidence of third parties with respect to compliance with Article 20(1): it is understood that this should be achieved by providing a legal opinion. While the guidance does not explicitly require the provision of a legal opinion in all cases, the guidance expects a legal opinion to be provided as a general rule, and omission to be an exception;
- (b) the triggers to effect the perfection of the transfer if assignments are perfected at a later stage than at the closing of the transaction.

EBA Final non-ABCP STS Guidelines

4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))

True sale, assignment or transfer with the same legal effect

10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:

- (a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller’s insolvency, with the same legal effect as that achieved by means of true sale;

(b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;

(c) assessment of clawback risks and re-characterisation risks

11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.

12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.

Legislative text		BACK TO TABLE OF CONTENTS
Article 20 - Requirements relating to simplicity		
<p>20.2. For the purpose of paragraph 1, any of the following shall constitute severe clawback provisions:</p> <p>(a) provisions which allow the liquidator of the seller to invalidate the sale of the underlying exposures solely on the basis that it was concluded within a certain period before the declaration of the seller's insolvency;</p> <p>(b) provisions where the SSPE can only prevent the invalidation referred to in point (a) if it can prove that it was not aware of the insolvency of the seller at the time of sale.</p>		
STS criteria		
Verified?	Yes	
PCS Comment		
Neither provision applies.		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))		
<p>17. The criterion in Article 20(2) is designed to ensure the enforceability of the transfer of legal title in the event of the seller's insolvency. More specifically, if the underlying exposures sold to the SSPE could be reclaimed for the sole reason that their transfer was effected within a certain period before the seller's insolvency, or if the SSPE could prevent the reclaim only by proving that it was unaware of the seller's insolvency at the time of transfer, such clauses would expose investors to a high risk that the underlying exposures would not effectively back their contractual claims. For this reason, Article 20(2) specifies that such clauses constitute severe clawback provisions, which may not be contained in STS securitisation.</p>		
EBA Final non-ABCP STS Guidelines		
4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))		
<i>True sale, assignment or transfer with the same legal effect</i>		
<p>10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:</p> <p>(a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;</p> <p>(b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;</p> <p>(c) assessment of clawback risks and re-characterisation risks.</p> <p>11. <p>Section, Overview of the Receivables, Notification Events:</p> <p>Section "OTHER TRIGGERS " - Notification Events which states that:</p> <p>Notification events include:</p> <ul style="list-style-type: none"> - the occurrence of an Insolvency Event in relation to the Transferor; - any execution, distress or diligence is levied against, or an encumbrancer takes possession of, the whole or any material part of the property, undertaking or assets of the Transferor or any event occurs which under the laws of any jurisdiction has a similar or analogous effect, and such action is not discharged within 14 days; and - the Transferor (or the Servicer on behalf of the Transferor) fails to pay any sum due from it to the Receivables Trustee in respect of the Designated Accounts within five Business Days of the due date thereof or the date of demand, if payable on demand, as specified in the RSD, and such failure is not remedied within ten Business Days after the Receivables Trustee has given notice thereof to the Transferor. <p>A Notice of Assignment or Scottish Assignment may be given following a Notification Event or such other action taken as is necessary to perfect the assignment or transfer of any of the Receivables to the Receivables Trustee.</p> <p>Criterion 4 requires two steps:</p> <ul style="list-style-type: none"> - To determine whether the transfer of the assets is by means of an unperfected assignment; and - If it is, whether the transaction contains the requisite triggers. <p>In the absence of any definition of "an assignment perfected at a later stage" in the Regulation or the EBA Guidelines and without additional views from the UK Financial Conduct Authority it is not possible to determine with finality whether an English equitable assignment is "unperfected" within the meaning of the Regulation – as distinguished from the meaning of the English rules of equity.</p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))		

20. The objective of the criterion in Article 20(5) is to minimise legal risks related to unperfected transfers in the context of an assignment of the underlying exposures, by specifying a minimum set of events subsequent to closing that should trigger the perfection of the transfer of the underlying exposures.

22. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:

(a) how to substantiate the confidence of third parties with respect to compliance with Article 20(1): it is understood that this should be achieved by providing a legal opinion. While the guidance does not explicitly require the provision of a legal opinion in all cases, the guidance expects a legal opinion to be provided as a general rule, and omission to be an exception;

(b) the triggers to effect the perfection of the transfer if assignments are perfected at a later stage than at the closing of the transaction.

EBA Final non-ABCP STS Guidelines

4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))

Severe deterioration in the seller credit quality standing

13. For the purposes of Article 20(5) of Regulation (EU) 2017/2402, the transaction documentation should identify, with regard to the trigger of 'severe deterioration in the seller credit quality standing', credit quality thresholds that are objectively observable and related to the financial health of the seller.

Insolvency of the seller

14. For the purposes of Article 20(5) of Regulation (EU) 2017/2402, the trigger of 'insolvency of the seller' should refer, at least, to events of legal insolvency as defined in national legal frameworks.

PCS Comment		
<p>The below have been reviewed within the context of the EBA guidelines and are acceptable as they are not made for speculative purposes or to enhance the portfolio performance.</p> <p>See section, The Receivables, Redesignation and removal of Accounts</p> <p>Each Designated Account will continue to be a Designated Account until such time as it becomes a Cancelled Account, a Zero Balance Account, a Defaulted Account or until the Transferor reclassifies it as being no longer a Designated Account (each of the foregoing a Redesignated Account). See also section, The Receivables – Discount Option Receivables and Defaulted Receivables</p> <p>In the case of a Cancelled Account, a Defaulted Account or a Zero Balance Account, such account shall automatically become a Redesignated Account as at the date on which it becomes a Cancelled Account, Defaulted Account or a Zero Balance Account, as the case may be.</p> <p>Except in the case of Cancelled Accounts, Defaulted Accounts or Zero Balance Accounts, a Designated Account will become a Redesignated Account as of such date (the Removal Date) as is specified by the Transferor to the Receivables Trustee in the two circumstances outlined below.</p> <p>The EBA Guidelines set out seven devices to repurchase securitised assets which are not to be considered indicative of “active portfolio management”. To the extent that a transaction only contains some or all of those seven devices and does not provide any other form of repurchase, then the STS criterion will be met. If the transaction should contain a repurchase device that is not included in the EBA’s list, then an analysis will need to be conducted as to whether this additional device offends against the principles set out in the EBA Guidelines (15.a and b) as defining “active portfolio management”.</p> <p>PCS has reviewed all the repurchase devices set out in the Prospectus and these are acceptable within the context of the EBA final guidelines.</p>		
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))		
<p>24. Consistently with this objective, the active portfolio management of the exposures in the securitisation should be prohibited, given that it adds a layer of complexity and increases the agency risk arising in the securitisation by making the securitisation’s performance dependent on both the performance of the underlying exposures and the performance of the management of the transaction. The payments of STS securitisations should depend exclusively on the performance of the underlying exposures.</p>		
EBA Final non-ABCP STS Guidelines		
4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))		
Active portfolio management		
<p>15. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, active portfolio management should be understood as portfolio management to which either of the following applies:</p> <p>(a) the portfolio management makes the performance of the securitisation dependent both on the performance of the underlying exposures and on the performance of the portfolio management of the securitisation, thereby preventing the investor from modelling the credit risk of the underlying exposures without considering the portfolio management strategy of the portfolio manager;</p>		

- (b) the portfolio management is performed for speculative purposes aiming to achieve better performance, increased yield, overall financial returns or other purely financial or economic benefit.
16. The techniques of portfolio management that should not be considered active portfolio management include:
- (a) substitution or repurchase of underlying exposures due to the breach of representations or warranties;
 - (b) substitution or repurchase of the underlying exposures that are subject to regulatory dispute or investigation to facilitate the resolution of the dispute or the end of the investigation;
 - (c) replenishment of underlying exposures by adding underlying exposures as substitutes for amortised or defaulted exposures during the revolving period;
 - (d) acquisition of new underlying exposures during the 'ramp up' period to line up the value of the underlying exposures with the value of the securitisation obligation(e) repurchase of underlying exposures in the context of the exercise of clean-up call options, in accordance with Article 244(3)(g) of Regulation (EU) 2017/2401;
 - (f) repurchase of defaulted exposures to facilitate the recovery and liquidation process with respect to those exposures;
 - (g) repurchase of underlying exposures under the repurchase obligation in accordance with Article 20(13) of Regulation (EU) 2017/2402.

Article 20 - Requirements relating to simplicity		
<p>20.7. The underlying exposures transferred from, or assigned by, the seller to the SSPE shall meet pre-determined, clear and documented eligibility criteria which do not allow for active portfolio management of those exposures on a discretionary basis. For the purpose of this paragraph, substitution of exposures that are in breach of representations and warranties shall not be considered active portfolio management. Exposures transferred to the SSPE after the closing of the transaction shall meet the eligibility criteria applied to the initial underlying exposures.</p>		
STS criteria		
8. Exposures transferred to the SSPE after the closing of the transaction shall meet the eligibility criteria applied to the initial underlying exposures.		
Verified?		Yes
PCS Comment		
<p>Refer to criterion 6 above. The transaction allows for offers to be made ongoing. The representations and eligibility criteria apply to each offer.</p> <p>This criterion is a future event criterion. In other words, it cannot be either met or failed at the outset of the transaction. But if, at a later stage, it is not met, then the Originator will need to inform ESMA and the STS status of the securitisation will be lost.</p> <p>Therefore, as a technical matter, this criterion is not applicable at the closing of a transaction. However, PCS will nevertheless look to see if there is a covenant on the part of the originator to comply in the future with this requirement whilst noting, at the same time, that the absence of any such covenant – although possibly unsettling for some investors – would not invalidate the STS status of the transaction at closing.</p> <p>PCS has identified the existence of such a covenant in the Prospectus.</p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Eligibility criteria for the underlying exposures, active portfolio management (Article 20.7)		
<p>25. Revolving periods and other structural mechanisms resulting in the inclusion of exposures in the securitisation after the closing of the transaction may introduce the risk that exposures of lesser quality can be transferred into the pool. For this reason, it should be ensured that any exposure transferred into the securitisation after the closing meets the eligibility criteria, which are no less strict than those used to structure the initial pool of the securitisation.</p> <p>26. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) the purpose of the requirement on the portfolio management, and the provision of examples of techniques which should not be regarded as active portfolio management: this criterion should be considered without prejudice to the existing requirements with respect to the similarity of the underwriting standards in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, which requires that all the underlying exposures in a securitisation be underwritten according to similar underwriting standards;</p> <p>(b) interpretation of the term ‘clear’ eligibility criteria;</p> <p>(c) clarification with respect to the eligibility criteria that need to be met with respect to the exposures transferred to the SSPE after the closing.</p>		
EBA Final non-ABCP STS Guidelines		
4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20.7)		
<i>Eligibility criteria to be met for exposures transferred to the SSPE after the closing of the transaction</i>		
<p>18. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, ‘meeting the eligibility criteria applied to the initial underlying exposures’ should be understood to mean eligibility criteria that comply with either of the following:</p> <p>(a) with regard to normal securitisations, they are no less strict than the eligibility criteria applied to the initial underlying exposures at the closing of the transaction;</p>		

(b) with regard to securitisations that issue multiple series of securities including master trusts, they are no less strict than the eligibility criteria applied to the initial underlying exposures at the most recent issuance, with the results that the eligibility criteria may vary from closing to closing, with the agreement of securitisation parties and in accordance with the transaction documentation.

19. Eligibility criteria to be applied to the underlying exposures in accordance with paragraph 18 should be specified in the transaction documentation and should refer to eligibility criteria applied at exposure level.

9	Legislative text	BACK TO TABLE OF CONTENTS
Article 20 - Requirements relating to simplicity		
<p>20.8. The securitisation shall be backed by a pool of underlying exposures that are homogeneous in terms of asset type, taking into account the specific characteristics relating to the cash flows of the asset type including their contractual, credit risk and prepayment characteristics. A pool of underlying exposures shall only comprise one asset type. The underlying exposures shall contain obligations that are contractually binding and enforceable, with full recourse to debtors and, where applicable, guarantors.</p>

Verified?		Yes
PCS Comment		
<p>The RTS on homogeneity can be fully met on the basis of:</p> <p>origination - TESCO PERSONAL FINANCE PLC'S CREDIT CARD PORTFOLIO, Account Origination</p> <p>servicing - See section SERVICING OF RECEIVABLES</p> <p>asset class –TESCO PERSONAL FINANCE PLC'S CREDIT CARD PORTFOLIO and THE RECEIVABLES.</p> <p>homogeneity factor UK jurisdiction, Eligible Accounts (e) and (f)</p> <p>The definition of “homogeneity” in the Regulation is to be the subject of a Regulatory Technical Standard (“RTS”). Being set out in an RTS, rather than a guideline or recommendation issued by the EBA, the definition of “homogeneity” will be legally binding on all regulatory authorities.</p> <p>The definition of “homogeneity” in the Regulation is also the subject of a Regulatory Technical Standard (“RTS”). Being set out in an RTS, rather than a guideline or recommendation issued by the EBA, the definition of “homogeneity” will be legally binding on all regulatory authorities. Such RTS has been formally adopted by the European Commission on 28 May 2019.</p> <p>In interpreting the expression, PCS has based itself on the text of the Regulation, its knowledge of the intent of the legislators – including, crucially, the legislators belief that the STS Regulation was justified by the excellent performance of most “plain vanilla” European securitisations and the RTS adopted by the European Commission.</p> <p>Based on the above, it seems clear to PCS that the Regulation would not seek to exclude from the STS category securitisations that have performed extremely well and are universally considered “homogenous” by market participants. This does not exonerate any transaction from being analysed against this criterion but does set the background for such analysis.</p> <p>Turning, for guidance, to the RTS adopted by the European Commission, in principle, four elements require examination: (a) “similar underwriting standards”, (b) “similar servicing standards”, (c) “same asset class” and (d) “relevant risk factors”. Consumer loans are though considered sufficiently homogeneous and do not need to meet also a specific homogeneity factor.</p> <p>Following the guiding principles of the EBA, we note that “similar underwriting standards” must mean something like the same type of underwriting approach, looking at the same types of data points to calculate the same type of credit risk. It cannot mean “exactly the same underwriting criteria”, since this would make it impossible for any securitisation ever to have a “homogenous” pool.</p> <p><i>In the Transaction, the credit card accounts were underwritten on a similar basis, they are being serviced by Tesco Personal Finance PLC, they are a single asset class – credit card accounts / receivables to individuals – and, based on the EBA’s suggested approach, the credit card accounts and receivables are all originated in the same jurisdiction.</i></p> <p><i>PCS also takes great comfort from the fact that transactions containing pools with similar characteristics have always been considered to be “homogenous” by a wide consensus of market participants.</i></p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))		

27. The criterion on the homogeneity as specified in the first subparagraph of Article 20(8) has been further clarified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402.

4.3 Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))		
Exposures with periodic payment streams		
21. For the purposes of Article 20(8) of Regulation (EU) 2017/2402, exposures with defined periodic payment streams should include:		
(a) exposures payable in a single instalment in the case of revolving securitisation, as referred to in Article 20(12) of Regulation (EU) 2017/2402;		
(b) exposures related to credit card facilities;		
(c) exposures with instalments consisting of interest and where the principal is repaid at the maturity, including interest-only mortgages;		
(d) exposures with instalments consisting of interest and repayment of a portion of the principal, where either of the following conditions is met:		
(i) the remaining principal is repaid at the maturity;		
(ii) the repayment of the principal is dependent on the sale of assets securing the exposure, in accordance with Article 20(13) of Regulation (EU) 2017/2402 and paragraphs 47 to 49;		
(e) exposures with temporary payment holidays as contractually agreed between the debtor and the lender.

EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
No resecuritisation (Article 20(9))		
<p>31. The objective of this criterion is to prohibit resecuritisation subject to derogations for certain cases or for resecuritisation as specified in Regulation (EU) 2017/2402. This is a lesson learnt from the financial crisis, when resecuritisations were structured into highly leveraged structures in which notes of lower credit quality could be re-packaged and credit enhanced, resulting in transactions whereby small changes in the credit performance of the underlying assets had severe impacts on the credit quality of the resecuritisation bonds. The modelling of the credit risk arising in these bonds proved very difficult, also due to high levels of correlations arising in the resulting structures.</p> <p>32. The criterion is deemed sufficiently clear and does not require any further clarification.</p>

EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Underwriting standards (Article 20(10))		
<p>37. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the term 'similar exposures', with reference to requirements specified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402;</p> <p>(b) the term 'no less stringent underwriting standards': independently of the guidance provided in these guidelines, it is understood that, in the spirit of restricting the 'originate-to-distribute' model of underwriting, where similar exposures exist on the originator's balance sheet, the underwriting standards that have been applied to the securitised exposures should also have been applied to similar exposures that have not been securitised, i.e. the underwriting standards should have been applied not solely to securitised exposures;</p>		
EBA Final non-ABCP STS Guidelines		
4.4 Underwriting standards, originator's expertise (Article 20(10))		
<i>No less stringent underwriting standards</i>		
<p>23. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the underwriting standards applied to securitised exposures should be compared to the underwriting standards applied to similar exposures at the time of origination of the securitised exposures.</p> <p>24. Compliance with this requirement should not require either the originator or the original lender to hold similar exposures on its balance sheet at the time of the selection of the securitised exposures or at the exact time of their securitisation, nor should it require that similar exposures were actually originated at the time of origination of the securitised exposures.</p>

<p>Amendments to Credit Card Agreements and Credit Card Guidelines The Transferor may amend the terms and conditions of the Credit Card Agreements and the Credit Card Guidelines. Such amendments may include reducing or increasing the amount of monthly minimum required payments or amendments to Periodic Finance Charges or other charges assessed on Designated Accounts (see "Risk Factors — Ability to change terms of the Credit Card Agreements"). When changing any term, TPF, depending on the type of change and the reason for it, may be required to permit the cardholder to terminate the agreement without penalty. Where a cardholder terminates the agreement, the cardholder will still be contractually required to repay the outstanding balance on the account. For purposes of Article 20(10) of the Securitisation Regulation, any material changes to the underwriting standards set out in the Credit Card Guidelines will be disclosed to investors in accordance with the securities law requirements applicable to the notes then in issue.</p> <p>B. Risks related to the underlying assets</p> <p>Ability to change terms of the Credit Card Agreements</p> <p>In addition, the Transferor may change the standard form terms and conditions of its Credit Card Agreements or its usual policies, procedures and practices relating to the operation of its general credit card business (the Credit Card Guidelines) (including, without limitation, the reduction of the required minimum monthly payment and the calculation of the amount or the timing of finance charges, credit card fees, and charge-offs), provided such change (i) would not, in the reasonable belief of the Transferor, cause a Pay Out Event to occur and (ii) is made applicable to the comparable segment of revolving credit card accounts owned and serviced by the Transferor which have characteristics the same as or substantially similar to the Designated Accounts which are subject to such change (unless the Transferor may not do so by the terms of an endorsement, sponsorship or other agreement between the Transferor and an unrelated third party or by the terms of the relevant Credit Card Agreement).</p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Underwriting standards (Article 20(10))		
<p>37 (c) clarification of the requirement to disclose material changes from prior underwriting standards to potential investors without undue delay: the guidance clarifies that this requirement should be forward-looking only, referring to material changes to the underwriting standards after the closing of the securitisation. The guidance clarifies the interactions with the requirement for similarity of the underwriting standards set out in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, which requires that all the underlying exposures in securitisation be underwritten according to similar underwriting standards;</p>		
EBA Final non-ABCP STS Guidelines		
4.4 Underwriting standards, originator's expertise (Article 20(10))		
Disclosure of material changes from prior underwriting standards		
<p>25. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, material changes to the underwriting standards that are required to be fully disclosed should be understood to be those material changes to the underwriting standards that are applied to the exposures that are transferred to, or assigned by, the SSPE after the closing of the securitisation in the context of portfolio management as referred to in paragraphs 15 and 16.</p>		

26. Changes to such underwriting standards should be deemed material where they refer to either of the following types of changes to the underwriting standards:

(a) changes which affect the requirement of the similarity of the underwriting standards further specified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402;

(b) changes which materially affect the overall credit risk or expected average performance of the portfolio of underlying exposures without resulting in substantially different approaches to the assessment of the credit risk associated with the underlying exposures.

27. The disclosure of all changes to underwriting standards should include an explanation of the purpose of such changes.

28. With regard to trade receivables that are not originated in the form of a loan, reference to underwriting standards in Article 20(10) should be understood to refer to credit standards applied by the seller to short-term credit generally of the type giving rise to the securitised exposures and proposed to its customers in relation to the sales of its products and services.

<p>See the section on. TESCO PERSONAL FINANCE PLC'S CREDIT CARD PORTFOLIO, Account Origination</p> <p>Applications are consistent with the format that is generally used by bank credit card issuers in the UK and require prospective cardholders to provide information on, among other things, the applicant's income, employment status and residence. Online applications are hosted on Tescobank.com with data directly entered by the customer. Application details are screened for creditworthiness and money laundering checks by a combination of system-based checking, external credit bureau data and manual verification, where appropriate. External credit bureau data is taken from Experian Limited, located in Nottingham, England (Experian) and TransUnion, formerly Callcredit Limited, a private company located in Leeds, England. System-based application checking includes the use of a database maintained by Experian and widely used in the UK credit card industry to attempt to detect fraudulent applications.</p> <p>The credit scoring system provides an indication of an applicant's likelihood to repay his or her obligations. The credit scoring system applies information about applicants from various sources, including Tesco Clubcard data, the electoral roll, credit reference data, records of county court judgments and a fraud avoidance referencing database maintained by Experian, as well as information supplied by the applicant on the application form. The data is then assessed using proprietary scoring variables to select suitable applicants. TPF determines the credit score that is required for acceptance of a particular application based on a variety of factors, including the product applied for, the manner in which the application was made and the risk tolerance of TPF pertaining at the time of scoring. The risk tolerance may be adjusted based on factors such as economic conditions, campaign objectives, competition and the analysis of historical data. An applicant whose application is approved is assigned an initial credit limit based on factors including the applicant's affordability, credit score, income level, the product they are applying for and whether they have requested a balance transfer.</p> <p>Credit limits are adjusted based on TPF's continuing evaluation of cardholders' credit behaviour and suitability using Triad, an account management system developed by Fair Isaac Corporation, an independent firm experienced in developing customer behaviour models.</p> <p>Credit bureau, payment and behavioural information in respect of an account is systematically evaluated on a monthly basis by TPF. If this information evidences positive performance over a period of time, TPF may adjust an account's credit limit proactively or reactively following a request from the cardholder</p> <p>TESCO PERSONAL FINANCE PLC'S CREDIT CARD PORTFOLIO</p> <p>Account Use and Maintenance</p> <p>....."Credit limits are both increased and decreased based on the continuing evaluation of accountholders' credit behaviour and suitability. Credit limits may be adjusted at the request of the accountholder, subject to continuous evaluation of credit behaviour and suitability. In addition, Tesco Bank may also adjust the account's credit limit downwards automatically based on a variety of different risk characteristics and the performance of the account. All credit limit amendments are made subject to Rules 6.7.7, 6.7.8 and 6.7.9 of the FCA's Consumer Credit sourcebook"</p> <p>See section, REGULATORY CONSIDERATIONS,</p> <p>1. EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Underwriting standards (Article 20(10))		
36. The objective of the criterion specified in the fourth subparagraph of Article 20(10) is for the originator or original lender to have an established performance history of credit claims or receivables similar to those being securitised, and for an appropriately long period of time.		
37 (f) identification of criteria on which the expertise of the originator or the original lender should be determined:		
(i) when assessing if the originator or the original lender has the required expertise, some general principles should be set out against which the expertise should be assessed. The general principles have been designed to allow a robust qualitative assessment of the expertise. One of these principles is the regulatory authorisation: this is to allow for more flexibility in such qualitative assessments of the expertise if the originator or the original lender is a prudentially regulated institution which holds regulatory authorisations or permissions that are relevant with respect to origination of similar exposures. The regulatory authorisation in itself should, however, not be a guarantee that the originator or original lender has the required expertise;		
(ii) irrespective of such general principles, specific criteria should be developed, based on specifying a minimum period for an entity to perform the business of originating similar exposures, compliance with which would enable the entity to be considered to have a sufficient expertise. Such expertise should be assessed at the group level, so that possible restructuring at the entity level would not automatically lead to non-compliance with the expertise criterion. It is not the intention of such specific criteria to form an impediment to the entry of new participants to the market. Such entities should also be eligible for compliance with the expertise criterion, as long as their management body and senior staff with managerial responsibility for origination of similar exposures, have sufficient experience over a minimum specified period.		
38. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.		
EBA Final non-ABCP STS Guidelines		
4.4 Underwriting standards, originator’s expertise (Article 20(10))		
Similar exposures		
22. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, exposures should be considered to be similar when one of the following conditions is met:		
(a) the exposures belong to one of the following asset categories referred to in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402:		
(i) residential loans secured with one or several mortgages on residential immovable property, or residential loans fully guaranteed by an eligible protection provider among those referred to in Article 201(1) of Regulation (EU) No 575/2013 qualifying for credit quality step 2 or above as set out in Part Three, Title II, Chapter 2 of that regulation;		
(ii) commercial loans secured with one or several mortgages on commercial immovable property or other commercial premises;		

- (iii) credit facilities provided to individuals for personal, family or household consumption purposes;
- (iv) auto loans and leases;
- (v) credit card receivables;
- (vi) trade receivables;

(b) the exposures fall under the asset category of credit facilities provided to micro-, small-, medium-sized and other types of enterprises and corporates including loans and leases, as referred to in Article 2(d) of the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, as underlying exposures of a certain type of obligor;

(c) where they do not belong to any of the asset categories referred to in points (a) and (b) of this paragraph and as referred to in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous for the purposes of Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, the underlying exposures share similar characteristics with respect to the type of obligor, ranking of security rights, type of immovable property and/or jurisdiction.

Criteria for determining the expertise of the originator or original lender

34. For the purposes of determining whether an originator or original lender has expertise in originating exposures of a similar nature to those securitised in accordance with Article 20(10) of Regulation (EU) 2017/2402, both of the following should apply:

(a) the members of the management body of the originator or original lender and the senior staff, other than the members of the management body, responsible for managing the origination of exposures of a similar nature to those securitised should have adequate knowledge and skills in the origination of exposures of a similar nature to those securitised;

(b) any of the following principles on the quality of the expertise should be taken into account:

- (i) the role and duties of the members of the management body and the senior staff and the required capabilities should be adequate;
- (ii) the experience of the members of the management body and the senior staff gained in previous positions, education and training should be sufficient;
- (iii) the involvement of the members of the management body and the senior staff within the governance structure of the function of originating the exposures should be appropriate;
- (iv) in the case of a prudentially regulated entity, the regulatory authorisations or permissions held by the entity should be deemed relevant to origination of exposures of a similar nature to those securitised.

35. An originator or original lender should be deemed to have the required expertise when either of the following applies:

(a) the business of the entity, or of the consolidated group to which the entity belongs for accounting or prudential purposes, has included the originating of exposures similar to those securitised, for at least five years;

(b) where the requirement referred to in point (a) is not met, the originator or original lender should be deemed to have the required expertise where they comply with both of the following:

- (i) at least two of the members of the management body have relevant professional experience in the origination of exposures similar to those securitised, at a personal level, of at least five years;
- (ii) senior staff, other than members of the management body, who are responsible for managing the entity's origination of exposures similar to those securitised, have relevant professional experience in the origination of exposures of a similar nature to those securitised, at a personal level, of at least five years.

36. For the purposes of demonstrating the number of years of professional experience, the relevant expertise should be disclosed in sufficient detail and in accordance with the applicable confidentiality requirements to permit investors to carry out their obligations under Article 5(3)(c) of Regulation (EU) 2017/2402.

<p>See section REGULATORY CONSIDERATIONS</p> <p>Redesignation of Non-Compliant Accounts for the purposes of the LCR Regulation, Solvency II and/or the Securitisation Regulation</p> <p>The Transferor has also undertaken in the Receivables Securitisation Deed to use commercially reasonable efforts to procure that Accounts which it considers to be Non-Compliant Accounts are not included in any Offer to the Receivables Trustee after 27 July 2020 and that if any such Non-Compliant Accounts are identified after a review of the Securitised Portfolio by the Transferor as having been the subject of any Offer after 27 July 2020, that the Transferor will exercise its option to have such Non-Compliant Accounts redesignated and the related Receivables repurchased by the Transferor pursuant to the Receivables Securitisation Deed, subject to it being able to make the relevant certifications to the Receivables Trustee (being, inter alia, that (i) such redesignation and repurchase is necessary in order to comply with Article 13 (Level 2B securitisations) of the LCR Regulation, Article 177 of Solvency II, the Securitisation Regulation and/or in accordance with any official guidance issued in relation thereto, (ii) such redesignation would not, in the Transferor's reasonable belief cause a Pay Out Event to occur; and (iii) in its opinion, formed on the basis of due consideration, such proposed redesignation would not result in a downgrade or withdrawal of the current rating of any outstanding Associated Debt as at the relevant repurchase date).]</p> <p>See section The Receivables– Eligible Receivables</p> <p>The term Eligible Receivable means a Receivable which, as at the beginning of the day on the relevant Addition Date (or, in respect of Existing Receivables comprised in the Initial Offer, as at the date(s) on which such Existing Receivables were originally transferred to the Jersey Receivables Trustee), or in the case of Future Receivables, as at the Date of Processing relating to when such Future Receivable comes into existence:</p> <p>(e) is not a Receivable in a Defaulted Account;</p> <p>See section, Redesignation and removal of Designated Accounts:</p> <p>A Defaulted Account is a former Designated Account where all of the Receivables have been charged-off by the Servicer as uncollectable in line with its usual servicing procedures</p> <p>See section, The Receivables, Redesignation and removal of Accounts</p> <p>Each Designated Account will continue to be a Designated Account until such time as it becomes a Cancelled Account, a Zero Balance Account, a Defaulted Account or until the Transferor reclassifies it as being no longer a Designated Account (each of the foregoing a Redesignated Account).</p> <p>A Defaulted Account is a former Designated Account in respect of which the Servicer has written off the Receivables in such account as uncollectable in accordance with the Credit Card Guidelines or the Servicer's customary and usual servicing procedures for servicing credit card Receivables comparable to the Receivables assigned to the Receivables Trustee.</p> <p>In the case of a Cancelled Account, a Defaulted Account or a Zero Balance Account, such account shall automatically become a Redesignated Account as at the date on which it becomes a Cancelled Account, Defaulted Account or a Zero Balance Account, as the case may be.</p>		

Except in the case of Cancelled Accounts, Defaulted Accounts or Zero Balance Accounts, a Designated Account will become a Redesignated Account as of such date (the Removal Date) as is specified by the Transferor to the Receivables Trustee in the two circumstances outlined below.

See section, REGULATORY CONSIDERATIONS

1. Securitisation Regulation requirements

In this Base Prospectus:

(a) Regulatory Credit Impaired Account means an Account with an a cardholder who is a "credit-impaired obligor" within the meaning of Article 13(2)(j) of the LCR Regulation or paragraph 2(k) of Article 177 of Commission Delegated Regulation (EU) No 2015/35 of 10 October 2014 supplementing Directive 2009/138/EC of the European Parliament and of the Council on the taking-up and pursuit of business of Insurance and Reinsurance (Solvency II) and/or a "credit-impaired debtor" within the meaning of Article 20(11) of the Securitisation Regulation;

(b) Regulatory Defaulted Account means an Account which, is in "default" within the meaning of Article 13(2)(k) of the LCR Regulation and/or Article 20(11) of the Securitisation Regulation;

(c) Non-Compliant Account means an Account which is not compliant with Article 13 (Level 2B securitisations) of the LCR Regulation, or Article 177 of Solvency II, or the Securitisation Regulation and/or in accordance with any official guidance issued in relation thereto;

EBA Final non-ABCP STS Guidelines – statements on *background and rationale*

No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))

39. The objective of the criterion in Article 20(11) is to ensure that STS securitisations are not characterised by underlying exposures whose credit risk has already been affected by certain negative events such as disputes with credit-impaired debtors or guarantors, debt restructuring processes or default events as identified by the EU prudential regulation. Risk analysis and due diligence assessments by investors become more complex whenever the securitisation includes exposures subject to certain ongoing negative credit risk developments. For the same reasons, STS securitisations should not include underlying exposures to credit-impaired debtors or guarantors that have an adverse credit history. In addition, significant risk of default normally rises as rating grades or other scores are assigned that indicate highly speculative credit quality and high likelihood of default, i.e. the possibility that the debtor or guarantor is not able to meet its obligations becomes a real possibility. Such exposures to credit-impaired debtors or guarantors should therefore also not be eligible for STS purposes.

40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:

(a) Interpretation of the term 'exposures in default': given the differences in interpretation of the term 'default', the interpretation of this criterion should refer to additional guidance on this term provided in the existing delegated regulations and guidelines developed by the EBA, while taking into account the limitation of scope of that additional guidance to certain types of institutions;

EBA Final non-ABCP STS Guidelines

4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))

Exposures in default

37. For the purposes of the first subparagraph of Article 20(11) of Regulation (EU) 2017/2402, the exposures in default should be interpreted in the meaning of Article 178(1) of Regulation (EU) 575/2013, as further specified by the Delegated Regulation on the materiality threshold for credit obligations past due developed in accordance with Article 178 of that Regulation, and by the EBA Guidelines on the application of the definition of default developed in accordance with Article 178(7) of that regulation.

38. Where an originator or original lender is not an institution and is therefore not subject to Regulation (EU) 575/2013, the originator or original lender should comply with the guidance provided in the previous paragraph to the extent that such application is not deemed to be unduly burdensome. In that case, the originator or original lender should apply the established processes and the information obtained from debtors on origination of the exposures, information obtained from the originator in the course of its servicing of the exposures or in the course of its risk management procedure or information notified to the originator by a third party.

Securitisation Regulation requirements</p> <p>In this Base Prospectus:</p> <p>(a) Regulatory Credit Impaired Account means an Account with an Obligor a cardholder who is a "credit-impaired obligor" within the meaning of Article 13(2)(j) of the LCR Regulation or paragraph 2(k) of Article 177 of Commission Delegated Regulation (EU) No 2015/35 of 10 October 2014 supplementing Directive 2009/138/EC of the European Parliament and of the Council on the taking-up and pursuit of business of Insurance and Reinsurance (Solvency II) and/or a "credit-impaired debtor" within the meaning of Article 20(11) of the Securitisation Regulation;</p> <p>(b) Regulatory Defaulted Account means an Account which, is in "default" within the meaning of Article 13(2)(k) of the LCR Regulation and/or Article 20(11) of the Securitisation Regulation;</p> <p>(c) Non-Compliant Account means an Account which is not compliant with Article 13 (Level 2B securitisations) of the LCR Regulation, or Article 177 of Solvency II, or the Securitisation Regulation and/or in accordance with any official guidance issued in relation thereto;</p> <p>The note below applies to points from 24 to 29.</p> <p>Although the text of the STS Regulation is quite vague, the EBA guidelines on defining "credit impaired" debtors are very helpful.</p> <p>For PCS, the key points of the EBA guidelines on this issue are:</p> <ol style="list-style-type: none"> a. <u>First</u> that the three listed conditions of credit impaired status (set out in article 20.11 (a) to (c) of the Regulation) amount to a full definition of what it means to be "credit impaired". So that it is not necessary to reflect at what the term "credit impaired" could mean above and beyond those three items. b. <u>Secondly</u>, in relation to entries in a credit registry, the EBA is very clear that the criterion should not be interpreted as excluding debtors with any entry on a credit registry. Providing further guidance, the example given in the EBA Guidelines of a credit registry entry that would not be indicative of a "credit impaired" debtor is the example of a failure to pay that can "reasonably be ignored" for the purposes of credit assessment. 		

Therefore, the criterion, to be met, does not require the elimination from the pool of all debtors with any negative entry in a credit registry but only those whose entries it would not be reasonable to ignore for the purposes of credit assessments.

Absent any further clarification from the EBA or a national competent authority regarding what it is reasonable to ignore, a judgement would still be necessary in cases where the originator does include in the pool some debtors with some negative entries in a credit registry.

In making this judgement, PCS takes comfort from the intent of the legislators – including, crucially, the legislators’ belief that the STS Regulation was justified by the excellent performance of most “plain vanilla” European securitisation. It is clear to PCS that the “credit impaired” prohibition is driven by the desire of legislators to exclude from the STS category deals generally coming under the definition of “sub-prime”. Therefore, it is unreasonable to refuse STS status to a transaction considered by universal consensus to be a “prime/plain vanilla” transaction with no “sub-prime” aspects. Indeed, this approach seems to be the rationale behind the EBA Guidelines on this matter.

To determine whether this requirement is met, PCS has discussed this matter with the Seller and uses its knowledge of the market and market stakeholders as well as the explicit statements made in the prospectus and transaction documentation.

c. Thirdly, the EBA Guidelines on guaranteed obligations make it clear that the criterion is met so long as either the debtor or the guarantor are not “credit impaired”.

EBA Final non-ABCP STS Guidelines – statements on *background and rationale*

No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))

39. The objective of the criterion in Article 20(11) is to ensure that STS securitisations are not characterised by underlying exposures whose credit risk has already been affected by certain negative events such as disputes with credit-impaired debtors or guarantors, debt-restructuring processes or default events as identified by the EU prudential regulation. Risk analysis and due diligence assessments by investors become more complex whenever the securitisation includes exposures subject to certain ongoing negative credit risk developments. For the same reasons, STS securitisations should not include underlying exposures to credit-impaired debtors or guarantors that have an adverse credit history. In addition, significant risk of default normally rises as rating grades or other scores are assigned that indicate highly speculative credit quality and high likelihood of default, i.e. the possibility that the debtor or guarantor is not able to meet its obligations becomes a real possibility. Such exposures to credit-impaired debtors or guarantors should therefore also not be eligible for STS purposes.

40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:

(b) Interpretation of the term ‘exposures to a credit-impaired debtor or guarantor’: the interpretation should also take into account the interpretation provided in recital 26 of Regulation (EU) 2017/2402, according to which the circumstances specified in points (a) to (c) of Article 24(9) of that regulation are understood as specific situations of credit-impairedness to which exposures in the STS securitisation may not be exposed. Consequently, other possible circumstances of credit-impairedness that are not captured in points (a) to (c) should be outside the scope of this requirement. Moreover, taking into account the role of the guarantor as a risk bearer, it should be clarified that the requirement to exclude ‘exposures to a credit-impaired debtor or guarantor’ is not meant to exclude (i) exposures to a credit-impaired debtor when it has a guarantor that is not credit impaired; or (ii) exposures to a non-credit-impaired debtor when there is a credit-impaired guarantor;

(c) Interpretation of the term ‘to the best knowledge of’: the interpretation should follow the wording of recital 26 of Regulation (EU) 2017/2402, according to which an originator or original lender is not required to take all legally possible steps to determine the debtor’s credit status but is only required to take those steps that the originator/original lender usually takes within its activities in terms of origination, servicing, risk management and use of information that is received from third parties. This should not require the originator or original lender to check publicly available information, or to check entries in at least one credit registry where an originator or original lender does not conduct such checks within its regular activities in terms of origination, servicing, risk management and use of information received from third parties, but rather relies, for example, on other information that may include credit assessments provided by third parties. Such clarification is important because corporates that are not subject to EU financial sector regulation and that are acting as sellers with respect to STS securitisation may not always check entries in credit registries and, in line with the best knowledge standard, should not be obliged to perform additional checks at origination of any exposure for the purposes of later fulfilling this criterion in terms of any credit-impaired debtors or guarantors;

EBA Final non-ABCP STS Guidelines

4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))

Exposures to a credit-impaired debtor or guarantor

39. For the purposes of Article 20(11) of Regulation (EU) 2017/2402, the circumstances specified in points (a) to (c) of that paragraph should be understood as definitions of credit-impairedness. Other possible circumstances of credit-impairedness that are not captured in points (a) to (c) should be considered to be excluded from this requirement.

40. The prohibition of the selection and transfer to SSPE of underlying exposures 'to a credit-impaired debtor or guarantor' as referred to in Article 20(11) of Regulation (EU) 2017/2402 should be understood as the requirement that, at the time of selection, there should be a recourse for the full securitised exposure amount to at least one non-credit-impaired party, irrespective of whether that party is a debtor or a guarantor. Therefore, the underlying exposures should not include either of the following:

- (a) exposures to a credit-impaired debtor, when there is no guarantor for the full securitised exposure amount;
- (b) exposures to a credit-impaired debtor who has a credit-impaired guarantor.

To the best of the originator's or original lender's knowledge

41. For the purposes of Article 20(11) of Regulation (EU) 2017/2402, the 'best knowledge' standard should be considered to be fulfilled on the basis of information obtained only from any of the following combinations of sources and circumstances:

- (a) debtors on origination of the exposures;
- (b) the originator in the course of its servicing of the exposures or in the course of its risk management procedures;
- (c) notifications to the originator by a third party;
- (d) publicly available information or information on any entries in one or more credit registries of persons with adverse credit history at the time of origination of an underlying exposure, only to the extent that this information had already been taken into account in the context of (a), (b) and (c), and in accordance with the applicable regulatory and supervisory requirements, including with respect to sound credit granting criteria as specified in Article 9 of Regulation (EU) 2017/2402. This is with the exception of trade receivables that are not originated in the form of a loan, with respect to which credit-granting criteria do not need to be met.

EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<p>40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(d) Interpretation of the criterion with respect to the debtors and guarantors found on the credit registry: it is important to interpret this requirement in a narrow sense to ensure that the existence of a debtor or guarantor on the credit registry of persons with adverse credit history should not automatically exclude the exposure to that debtor/guarantor from compliance with this criterion. It is understood that this criterion should relate only to debtors and guarantors that are, at the time of origination of the exposure, considered entities with adverse credit history. Existence on a credit registry at the time of origination of the exposure for reasons that can be reasonably ignored for the purposes of the credit risk assessment (for example due to missed payments which have been resolved in the next two payment periods) should not be captured by this requirement. Therefore, this criterion should not automatically exclude from the STS framework exposures to all entities that are on the credit registries, taking into account that this would unintentionally exclude a significant number of entities given that different practices exist across EU jurisdictions with respect to entry requirements of such credit registries, and the fact that credit registries in some jurisdictions may contain both positive and negative information about the clients;</p>		
EBA Final non-ABCP STS Guidelines		
4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<i>Exposures to credit-impaired debtors or guarantors that have undergone a debt-restructuring process</i>		
42. For the purposes of Article 20(11)(a) of Regulation (EU) 2017/2402, the requirement to exclude exposures to credit-impaired debtors or guarantors who have undergone a debt-restructuring process with regard to their non-performing exposures should be understood to refer to both the restructured exposures of the respective debtor or guarantor and those of its exposures that were not themselves subject to restructuring. For the purposes of this Article, restructured exposures which meet the conditions of points (i) and (ii) of that Article should not result in a debtor or guarantor becoming designated as credit-impaired.

No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<p>40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(d) Interpretation of the criterion with respect to the debtors and guarantors found on the credit registry: it is important to interpret this requirement in a narrow sense to ensure that the existence of a debtor or guarantor on the credit registry of persons with adverse credit history should not automatically exclude the exposure to that debtor/guarantor from compliance with this criterion. It is understood that this criterion should relate only to debtors and guarantors that are, at the time of origination of the exposure, considered entities with adverse credit history. Existence on a credit registry at the time of origination of the exposure for reasons that can be reasonably ignored for the purposes of the credit risk assessment (for example due to missed payments which have been resolved in the next two payment periods) should not be captured by this requirement. Therefore, this criterion should not automatically exclude from the STS framework exposures to all entities that are on the credit registries, taking into account that this would unintentionally exclude a significant number of entities given that different practices exist across EU jurisdictions with respect to entry requirements of such credit registries, and the fact that credit registries in some jurisdictions may contain both positive and negative information about the clients;</p>		
EBA Final non-ABCP STS Guidelines		

4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))***Credit registry***

43. The requirement referred to in Article 20(11)(b) of Regulation (EU) 2017/2402 should be limited to exposures to debtors or guarantors to which both of the following requirements apply at the time of origination of the underlying exposure:

- (a) the debtor or guarantor is explicitly flagged in a credit registry as an entity with adverse credit history due to negative status or negative information stored in the credit registry;
- (b) the debtor or guarantor is on the credit registry for reasons that are relevant to the purposes of the credit risk assessment.

See criterion24 above.		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<p>40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(e) Interpretation of the term 'significantly higher risk of contractually agreed payments not being made for comparable exposures': the term should be interpreted with a similar meaning to the requirement aiming to prevent adverse selection of assets referred to in Article 6(2) of Regulation (EU) 2017/2402, and further specified in the Article 16(2) of the Delegated Regulation specifying in greater detail the risk retention requirement in accordance with Article 6(7) of Regulation (EU) 2017/24027, given that in both cases the requirement (i) aims to prevent adverse selection of underlying exposures and (ii) relates to the comparison of the credit quality of exposures transferred to the SSPE and comparable exposures that remain on the originator's balance sheet. To facilitate the interpretation, a list is given of examples of how to achieve compliance with the requirement.</p>		
EBA Final non-ABCP STS Guidelines		
4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))		
<i>Risk of contractually agreed payments not being made being significantly higher than for comparable exposures</i>		
44. For the purposes of Article 20(11)(c) of Regulation (EU) 2017/2402, the exposures should not be considered to have a 'credit assessment of a credit score indicating that the risk of contractually agreed payments not being made is significantly higher than for comparable exposures held by the originator which are not securitised' when the following conditions apply:		
(a) the most relevant factors determining the expected performance of the underlying exposures are similar;		

(b) as a result of the similarity referred to in point (a) it could reasonably have been expected, on the basis of indications such as past performance or applicable models, that, over the life of the transaction or over a maximum of four years, where the life of the transaction is longer than four years, their performance would not be significantly different.

45. The requirement in the previous paragraph should be considered to have been met where either of the following applies:

(a) the underlying exposures do not include exposures that are classified as doubtful, impaired, non-performing or classified to the similar effect under the relevant accounting principles;

(b) the underlying exposures do not include exposures whose credit quality, based on credit ratings or other credit quality thresholds, significantly differs from the credit quality of comparable exposures that the originator originates in the course of its standard lending operations and credit risk strategy.

Article 20 - Requirements relating to simplicity		
20.12. The debtors shall at the time of transfer of the exposures, have made at least one payment, except in the case of revolving securitisations backed by exposures payable in a single instalment or having a maturity of less than one year, including without limitation monthly payments on revolving credits.		
STS criteria		
31. The debtors shall at the time of transfer of the exposures, have made at least one payment, except in the case of revolving securitisations backed by exposures payable in a single instalment or having a maturity of less than one year, including without limitation monthly payments on revolving credits.		
Verified?		Yes
PCS Comment		
Exception applies to credit card accounts and receivables.		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
At least one payment made (Article 20(12))		
41. STS securitisations should minimise the extent to which investors are required to analyse and assess fraud and operational risk. At least one payment should therefore be made by each underlying borrower at the time of transfer, since this reduces the likelihood of the loan being subject to fraud or operational issues, unless in the case of revolving securitisations in which the distribution of securitised exposures is subject to constant changes because the securitisation relates to exposures payable in a single instalment or with an initial legal maturity of an exposure of below one year. 42. To facilitate consistent interpretation of this criterion, its scope and the types of payments referred to therein should be further clarified.		
EBA Final non-ABCP STS Guidelines		
4.6 At least one payment made (Article 20(12))		
Scope of the criterion		
46. For the purposes of Article 20(12) of Regulation (EU) 2017/2402, further advances in terms of an exposure to a certain borrower should not be deemed to trigger a new 'at least one payment' requirement with respect to such an exposure.		
At least one payment		
47. For the purposes of Article 20(12) of Regulation (EU) 2017/2402, the payment referred to in the requirement according to which 'at least one payment' should have been made at the time of transfer should be a rental, principal or interest payment or any other kind of payment.		

32	Legislative text	BACK TO TABLE OF CONTENTS
Article 20 - Requirements relating to simplicity		
<p>20.13. The repayment of the holders of the securitisation positions shall not have been structured to depend predominantly on the sale of assets securing the underlying exposures. This shall not prevent such assets from being subsequently rolled-over or refinanced.</p> <p>The repayment of the holders of the securitisation positions whose underlying exposures are secured by assets the value of which is guaranteed or fully mitigated by a repurchase obligation by the seller of the assets securing the underlying exposures or by another third party shall not be considered to depend on the sale of assets securing those underlying exposures.</p>		
STS criteria		
32. The repayment of the holders of the securitisation positions shall not have been structured to depend predominantly on the sale of assets securing the underlying exposures.		
Verified?		Yes
PCS Comment		
<p>In PCS' view, this requirement does not apply to unsecured credit cards as in this transaction.</p> <p>Accordingly, none of the assets in the pool display any predominant reliance on the sale of the assets.</p>		
EBA Final non-ABCP STS Guidelines – statements on background and rationale		
No predominant dependence on the sale of assets (Article 20(13))		
<p>43. Dependence of the repayment of the holders of the securitisation positions on the sale of assets securing the underlying exposures increases the liquidity risks, market risks and maturity transformation risks to which the securitisation is exposed. It also makes the credit risk of the securitisation more difficult for investors to model and assess.</p> <p>44. The objective of this criterion is to ensure that the repayment of the principal balance of exposures at the contract maturity – and therefore repayment of the holders of the securitisation positions – is not intended to be predominantly reliant on the sale of assets securing the underlying exposures, unless the value of the assets is guaranteed or fully mitigated by a repurchase obligation.</p> <p>45. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the term 'predominant dependence' on the sale of assets securing the underlying exposures should be further interpreted:</p> <p>(i) when assessing whether the repayment of the holders of the securitisation positions is or is not predominantly dependent on the sale of assets, the following three aspects should be taken into account: (i) the principal balance at contract maturity of underlying exposures that depend on the sale of assets securing those underlying exposures to repay the balance; (ii) the distribution of maturities of such exposures across the life of the transaction, which aims to reduce the risk of correlated defaults due to idiosyncratic shocks; and (iii) the granularity of the pool of exposures, which aims to promote sufficient distribution in sale dates and other characteristics that may affect the sale of the underlying exposures.</p> <p>(i) no types of securitisations should be excluded ex ante from the compliance with this criterion and from the STS securitisation as long as they meet all the requirements specified in the guidance. For example, this criterion does not aim to exclude leasing transactions and interest-only residential mortgages from STS securitisation, provided they comply with the guidance provided and all other applicable STS requirements. However, it is expected that commercial real estate transactions, or securitisations where the assets are commodities (e.g. oil, grain, gold), or bonds whose maturity dates fall after the maturity date of the securitisation, would not meet these requirements, as in all these cases it is expected that the repayment is predominantly reliant on the sale of the assets, that other possible ways to repay the securitisation positions are substantially limited, and that the granularity of the portfolio is low.</p> <p>46. With respect to the exemption provided in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402, it should be ensured that the entity providing the guarantee or the repurchase obligation of the assets securing the underlying exposures is not an empty-shell or defaulted entity, so that it has sufficient loss absorbency to exercise the guarantee of the repurchase of the assets.</p>		
EBA Final non-ABCP STS Guidelines		
4.7 No Predominant dependence on the sale of assets		
Predominant dependence on the sale of assets		
<p>48. For the purposes of Article 20(13) of Regulation (EU) 2017/2402, transactions where all of the following conditions apply, at the time of origination of the securitisation in cases of amortising securitisation or during the revolving period in cases of revolving securitisation, should be considered not predominantly dependent on the sale of assets securing the underlying exposures, and therefore allowed:</p>		

(a) the contractually agreed outstanding principal balance, at contract maturity of the underlying exposures that depend on the sale of the assets securing those underlying exposures to repay the principal balance, corresponds to no more than 50% of the total initial exposure value of all securitisation positions of the securitisation;

(b) the maturities of the underlying exposures referred to in point (a) are not subject to material concentrations and are sufficiently distributed across the life of the transaction;

(c) the aggregate exposure value of all the underlying exposures referred to in point (a) to a single obligor does not exceed 2% of the aggregate exposure value of all underlying exposures in the securitisation.

49. Where there are no underlying exposures in the securitisation that depend on the sale of assets to repay their outstanding principal balance at contract maturity, the requirements in paragraph 48 should not apply.

Exemption provided in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402

50. The exemption referred to in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402 with regard to the repayment of holders of securitisation positions whose underlying exposures are secured by assets, the value of which is guaranteed or fully mitigated by a repurchase obligation of either the assets securing the underlying exposures or of the underlying exposures themselves by another third party or parties, the seller or the third parties should meet both of the following conditions:

(a) they are not insolvent;

(b) there is no reason to believe that the entity would not be able to meet its obligations under the guarantee or the repurchase obligation.

20.14. EBA, in close cooperation with ESMA and EIOPA, shall develop draft regulatory standards further specifying which underlying exposures referred to in paragraph 8 are deemed to be homogeneous. EBA shall submit those draft regulatory standards to the Commission by 18 July 2018.

The Commission is empowered to supplement this Regulation by adopting the regulatory technical standards referred to in this paragraph in accordance with the procedure laid down in Articles 10 to 14 of Regulation (EU) No 1093/2010.

<p>No hedging required for Series 2020-1 , as the Class A1, A2, A3 and Class A4 Notes are Sterling floating rate notes. The relevant Loan Notes are also Sterling floating rate. See the FINAL TERMS DATED 28 July JULY 2020, (to the Base Prospectus dated 28 July July 2020).</p> <p>See also section TESCO PERSONAL FINANCE PLC'S CREDIT CARD PORTFOLIO</p> <p>Billing and Payment</p> <p>A number of charges and fees are assessed on card accounts in accordance with the terms and conditions of the product held. These fees include finance charges (interest), annual fees, cash withdrawal fees, late payment fees, returned payment fees, over limit fees, foreign exchange fees and insurance premiums. Finance charges on purchases, cash and balance transfers are calculated using the average daily balance method on the TS2 platform. Finance charges are calculated from the date of the transaction. Finance charges are assessed monthly and are posted to the customer's account, subject to terms and conditions relating to interest-free periods and finance charge waivers</p> <p>Interest rate methodology</p> <p>Interest on the credit card Receivables is calculated by reference to Tesco Personal Finance PLC's interest rate setting policies as determined from time to time. It should be noted that the yield on the credit card portfolio is a function of a number of items which includes interest charged. See further the definition of "Finance Charge Collections".</p> <p>Ability to change terms of the Credit Card Agreements</p> <p>The Transferor only assigns Receivables arising on Designated Accounts to the Receivables Trustee and does not assign all of its rights under Credit Card Agreements relating to the Designated Accounts. Accordingly, the Transferor retains the right to determine the monthly Periodic Finance Charges and other fees which will be applicable from time to time to the Designated Accounts, to alter the minimum monthly payment required on the Designated Accounts, to waive finance charges in respect of certain purchases from time to time and to change various other terms with respect to the Designated Accounts, including increasing or decreasing the annual percentage rate and changing the annual percentage rate from a fixed rate to a variable rate. A decrease in the monthly Periodic Finance Charges and a reduction in credit card or other fees would decrease the effective yield on the Designated Accounts and could result in the occurrence of an Early Redemption Event with respect to each Note Series.</p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Appropriate mitigation of interest-rate and currency risks (Article 21 (2))		
49. The objective of this criterion is to reduce any payment risk arising from different interest-rate and currency profiles of assets and liabilities. Mitigating or hedging interest-rate and currency risks arising in the transaction enhances the simplicity of the transaction, since it helps investors to model those risks and their impact on the credit risk of the securitisation investment.		
50. It should be clarified that hedging (through derivative instruments) is only one possible way of addressing the risks mentioned. Whichever measure is applied for the risk mitigation, it should, however, be subject to specific conditions so that it can be considered to appropriately mitigate the risks mentioned.		
51. One of these conditions aims to prohibit derivatives that do not serve the purpose of hedging interest-rate or currency risk from being included in the pool of underlying exposures or entered into by the SSPE, given that derivatives add to the complexity of the transaction and to the complexity of the risk and due diligence analysis to be carried out by the investor. Derivatives hedging interest-rate or currency risk enhance the simplicity of the transaction, since hedged transactions do not require investors to engage in the modelling of currency and interest-rate risks.		
52. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:		

- (a) conditions that the measures should comply with so that they can be considered to appropriately mitigate the interest-rate and currency risks;
- (b) clarification with respect to the scope of derivatives that should and should not be captured by this criterion;
- (c) clarification of the term 'common standards in international finance'.

EBA Final non-ABCP STS Guidelines

5.1 Appropriate mitigation of interest-rate and currency risks (Article 21(2))

Appropriate mitigation of interest-rate and currency risks

51. For the purposes of Article 21(2) of Regulation (EU) 2017/2402 in order for the interest-rate and currency risks arising from the securitisation to be considered 'appropriately mitigated', it should be sufficient that a hedge or mitigation is in place, on condition that it is not unusually limited with the effect that it covers a major share of the respective interest-rate or currency risks under relevant scenarios, understood from an economic perspective. Such a mitigation may also be in the form of derivatives or other mitigating measures including reserve funds, over collateralisation, excess spread or other measures.

52. Where the appropriate mitigation of interest-rate and currency risks is carried out through derivatives, all of the following requirements should apply:

- (a) the derivatives should be used only for genuine hedging of asset and liability mismatches of interest rates and currencies, and should not be used for speculative purposes;
- (b) the derivatives should be based on commonly accepted documentation, including International Swaps or Derivatives Association (ISDA) or similar established national documentation standards;
- (c) the derivative documentation should provide, in the event of the loss of sufficient creditworthiness of the counterparty below a certain level, measured either on the basis of the credit rating or otherwise, that the counterparty is subject to collateralisation requirements or makes a reasonable effort for its replacement or guarantee by another counterparty.

53. Where the mitigation of interest-rate and currency risks referred to in Article 21(2) of Regulation (EU) 2017/2402 is carried out not through derivatives but by other risk-mitigating measures, those measures should be designed to be sufficiently robust. When such risk-mitigating measures are used to mitigate multiple risks at the same time, the disclosure required by Article 21(2) of Regulation (EU) 2017/2402 should include an explanation of how the measures hedge the interest-rate risks and currency risks on one hand, and other risks on the other hand.

EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Referenced interest payments (Article 21 (3))		
53. The objective of this criterion is to prevent securitisations from making reference to interest rates that cannot be observed in the commonly accepted market practice. The credit risk and cash flow analysis that investors must be able to carry out should not involve atypical, complex or complicated rates or variables that cannot be modelled on the basis of market experience and practice.		
54. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:		
(a) the scope of the criterion (by specifying the common types and examples of interest rates captured by this criterion);		
(b) the term 'complex formulae or derivatives'.		
EBA Final non-ABCP STS Guidelines		

5.2 Referenced interest payments (Article 21 (3))

Referenced rates

57. For the purposes of Article 21(3) of Regulation (EU) 2017/2402, interest rates that should be considered to be an adequate reference basis for referenced interest payments should include all of the following:

(a) interbank rates including the Libor, Euribor and other recognised benchmarks;

(b) rates set by monetary policy authorities, including FED funds rates and central banks' discount rates;

(c) sectoral rates reflective of a lender's cost of funds, including standard variable rates and internal interest rates that directly reflect the market costs of funding of a bank or a subset of institutions, to the extent that sufficient data are provided to investors to allow them to assess the relation of the sectoral rates to other market rates.

Complex formulae or derivatives

58. For the purposes of Article 21(3) of Regulation (EU) 2017/2402, a formula should be considered to be complex when it meets the definition of an exotic instrument by the Global Association of Risk Professionals (GARP), which is a financial asset or instrument with features that make it more complex than simpler, plain vanilla, products. A complex formula or derivative should not be deemed to exist in the case of the mere use of interest-rate caps or floors.

EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Requirements in case of enforcement or delivery of an acceleration notice (Article 21(4))		
<p>55. The objective of this criterion is to prevent investors from being subjected to unexpected repayment profiles and to provide appropriate legal comfort regarding their enforceability, for instances where an enforcement or an acceleration notice has been delivered.</p> <p>56. STS securitisations should be such that the required investor's risk analysis and due diligence do not have to factor in complex structures of the payment priority that are difficult to model, nor should the investor be exposed to complex changes in such structures throughout the life of the transaction. Therefore, it should be ensured that junior noteholders do not have inappropriate payment preference over senior noteholders that are due and payable.</p> <p>57. In addition, taking into account that market risk on the underlying collateral constitutes an element of complexity in the risk and due diligence analysis to be carried out by investors, the objective is also to ensure that the performance of STS securitisations does not rely, due to contractual triggers, on the automatic liquidation at market price of the underlying collateral.</p> <p>58. To facilitate consistent interpretation of this criterion, the scope and operational functioning of conditions specified under letters (a), (b) and (d) of Article 21(4) should be specified further.</p>		
EBA Final non-ABCP STS Guidelines		
5.3 Requirements in the event of enforcement or delivery of an acceleration notice (Article 21(4))		
<i>Exceptional circumstances</i>		
<p>59. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, a list of 'exceptional circumstances' should, to the extent possible, be included in the transaction documentation.</p>		

60. Given the nature of 'exceptional circumstances' and in order to allow some flexibility with respect to potential unusual circumstances requiring that cash be trapped in the SSPE in the best interests of investors, where a list of 'exceptional circumstances' is included in the transaction documentation in accordance with paragraph 59, such a list should be non-exhaustive.

Amount trapped in the SSPE in the best interests of investors

61. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, the amount of cash to be considered as trapped in the SSPE should be that agreed by the trustee or other representative of the investors who is legally required to act in the best interests of the investors, or by the investors in accordance with the voting provisions set out in the transaction documentation.

62. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, it should be permissible to trap the cash in the SSPE in the form of a reserve fund for future use, as long as the use of the reserve fund is exclusively limited to the purposes set out in Article 21(4)(a) of Regulation (EU) 2017/2402 or to orderly repayment to the investors.

Article 21 - Requirements relating to standardisation		
21.5. Transactions which feature non-sequential priority of payments shall include triggers relating to the performance of the underlying exposures resulting in the priority of payments reverting to sequential payments in order of seniority. Such performance-related triggers shall include at least the deterioration in the credit quality of the underlying exposures below a pre-determined threshold.		
STS criteria		
45. Transactions which feature non-sequential priority of payments shall include triggers relating to the performance of the underlying exposures resulting in the priority of payments reverting to sequential payments in order of seniority. Such performance-related triggers shall include at least the deterioration in the credit quality of the underlying exposures below a pre-determined threshold.		
Verified?		Yes
PCS Comment		
<p>The first step in analysing this criterion is to determine whether the transaction features non-sequential priorities of payment in relation to the amortisation of the Notes.</p> <p>This is not the case – Terms and Conditions of the notes point 4 (a).</p> <p>Notes are sequential pay. This criterion is therefore met.</p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Non-sequential priority of payments (Article 21(5))		
<p>59. The objective of this criterion is to ensure that non-sequential (pro rata) amortisation should be used only in conjunction with clearly specified contractual triggers that determine the switch of the amortisation scheme to a sequential priority, safeguarding the transaction from the possibility that credit enhancement is too quickly amortised as the credit quality of the transaction deteriorates, thereby exposing senior investors to a decreasing amount of credit enhancement.</p> <p>60. To facilitate consistent interpretation of this criterion, a non-exhaustive list of examples of performance-related triggers that may be included is provided in the guidance.</p>		
EBA Final non-ABCP STS Guidelines		
5.4 Non-sequential priority of payments (Article 21(5))		
Performance-related triggers		
<p>66. For the purposes of Article 21(5) of Regulation (EU) 2017/2402, the triggers related to the deterioration in the credit quality of the underlying exposures may include the following:</p> <p>(a) with regard to underlying exposures for which a regulatory expected loss (EL) can be determined in accordance with Regulation (EU) 575/2013 or other relevant EU regulation, cumulative losses that are higher than a certain percentage of the regulatory one-year EL on the underlying exposures and the weighted average life of the transaction;</p> <p>(b) cumulative non-matured defaults that are higher than a certain percentage of the sum of the outstanding nominal amount of tranche held by the investors and the tranches that are subordinated to them;</p> <p>(c) the weighted average credit quality in the portfolio decreasing below a given pre-specified level or the concentration of exposures in high credit risk (probability of default) buckets increasing above a pre-specified level.</p>

Expertise of the Servicer (Article 21 (8))		
65. The objective of this criterion is to ensure that all the conditions are in place for the proper functioning of the servicing function, taking into account the crucial importance of servicing in securitisation and the central nature of this function within any securitisation transaction.		
66. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:		
(a) criteria for determining the expertise of the servicer;		
(b) criteria for determining well-documented and adequate policies, procedures and risk management controls of the servicer.		
67. The criteria for the expertise of the servicer should correspond to those for the expertise of the originator or the original lender. Newly established entities should be allowed to perform the tasks of servicing, as long as the back-up servicer has the appropriate experience. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.		
EBA Final non-ABCP STS Guidelines		
5.8 Expertise of the servicer (Article 21 (8))		
Criteria for determining the expertise of the servicer		
68. For the purposes of determining whether a servicer has expertise in servicing exposures of a similar nature to those securitised in accordance with Article 21(8) of Regulation (EU) 2017/2402, both of the following should apply:		
(a) the members of the management body of the servicer and the senior staff, other than members of the management body, responsible for servicing exposures of a similar nature to those securitised should have adequate knowledge and skills in the servicing of exposures similar to those securitised;		
(b) any of the following principles on the quality of the expertise should be taken into account in the determination of the expertise:		

- (i) the role and duties of the members of the management body and the senior staff and the required capabilities should be adequate;
 - (ii) the experience of the members of the management body and the senior staff gained in previous positions, education and training should be sufficient;
 - (iii) the involvement of the members of the management body and the senior staff within the governance structure of the function of servicing the exposures should be appropriate;
 - (iv) in the case of a prudentially regulated entity, the regulatory authorisations or permissions held by the entity should be deemed relevant to the servicing of similar exposures to those securitised.
69. A servicer should be deemed to have the required expertise where either of the following applies:
- (a) the business of the entity, or of the consolidated group, to which the entity belongs, for accounting or prudential purposes, has included the servicing of exposures of a similar nature to those securitised, for at least five years;
 - (b) where the requirement referred to in point (a) is not met, the servicer should be deemed to have the required expertise where they comply with both of the following:
 - (i) at least two of the members of its management body have relevant professional experience in the servicing of exposures of a similar nature to those securitised, at personal level, of at least five years;
 - (ii) senior staff, other than members of the management body, who are responsible for managing the entity's servicing of exposures of a similar nature to those securitised, have relevant professional experience in the servicing of exposures of a similar nature to those securitised, at a personal level, of at least five years;
 - (iii) the servicing function of the entity is backed by the back-up servicer compliant with point (a).
70. For the purpose of demonstrating the number of years of professional experience, the relevant expertise should be disclosed in sufficient detail and in accordance with the applicable confidentiality requirements to permit investors to carry out their obligations under Article 5(3)(c) of Regulation (EU) 2017/2402.
- Exposures of similar nature*
71. For the purposes of Article 21(8) of Regulation (EU) 2017/2402, interpretation of the term 'exposures of similar nature' should follow the interpretation provided in paragraph 23 above.

Terms and Conditions of the Notes (and Note Trust Deed) and OVERVIEW OF RIGHTS OF NOTEHOLDERS RIGHTS		
a) the method for calling meetings; as for method Condition 14		
(b) the maximum timeframe for setting up a meeting: see– OVERVIEW OF RIGHTS OF NOTEHOLDERS RIGHTS– Convening a meeting: Notice Periods and location.		
(c) the required quorum: Condition 14		
(d) the minimum threshold of votes to validate such a decision, with clear differentiation between the minimum thresholds for each type of decision Condition 14		
(e) where applicable, a location for the meetings which should be in the United Kingdom: see OVERVIEW OF RIGHTS OF NOTEHOLDERS– Convening a meeting: Notice Periods and location states location as United Kingdom		
Although the wording of the Regulation as to what constitutes the “facilitation of timely resolution of conflicts” is very vague, the EBA Guidelines have helpfully set out the five minimum requirements that the documents should contain to meet this criterion.		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Resolution of conflicts between different classes of investors		
70. The objective of this criterion is to help ensure clarity for securitisation noteholders of their rights and ability to control and enforce on the underlying credit claims or receivables. This should make the decision-making process more effective, for instance in circumstances where enforcement rights on the underlying assets are being exercised.		
71. To facilitate consistent interpretation of this criterion, the term ‘clear provisions that facilitate the timely resolution of conflicts between different classes of investors’ should be further interpreted.		
EBA Final non-ABCP STS Guidelines		
5.8 Resolution of conflicts between different classes of investors (Article 20 (10))		
Clear provisions facilitating the timely resolution of conflicts between different classes of investors		
73. For the purposes of Article 21(10) of Regulation (EU) 2017/2402, provisions of the transaction documentation that ‘facilitate the timely resolution of conflicts between different classes of investors’, should include provisions with respect to all of the following:		
(a) the method for calling meetings or arranging conference calls;		
(b) the maximum timeframe for setting up a meeting or conference call;		
(c) the required quorum;		
(d) the minimum threshold of votes to validate such a decision, with clear differentiation between the minimum thresholds for each type of decision;		
(e) where applicable, a location for the meetings which should be in the Union.		
74. For the purposes of Article 21(10) of Regulation (EU) 2017/2402, where mandatory statutory provisions exist in the applicable jurisdiction that set out how conflicts between investors have to be resolved, the transaction documentation may refer to these provisions.

For the purposes of Article 22(1) of Regulation (EU) 2017/2402, where the seller cannot provide data in line with the data requirements contained therein, external data that are publicly available or are provided by a third party, such as a rating agency or another market participant, may be used, provided that all of the other requirements of that article are met.

Substantially similar exposures

76. For the purposes of Article 22(1) of Regulation (EU) 2017/2402, the term 'substantially similar exposures' should be understood as referring to exposures for which both of the following conditions are met:

- (a) the most relevant factors determining the expected performance of the underlying exposures are similar;
- (b) as a result of the similarity referred to in point (a) it could reasonably have been expected, on the basis of indications such as past performance or applicable models, that, over the life of the transaction, or over a maximum of four years, where the life of the transaction is longer than four years, their performance would not be significantly different.

77. The substantially similar exposures should not be limited to exposures held on the balance sheet of the originator.

65	Legislative text Article 22 - Requirements relating to transparency	BACK TO TABLE OF CONTENTS
<p>22.1. The originator and the sponsor shall make available data on static and dynamic historical default and loss performance, such as delinquency and default data, for substantially similar exposures to those being securitised, and the sources of those data and the basis for claiming similarity, to potential investors before pricing. Those data shall cover a period no shorter than five years.</p>

<p>Section REGULATORY CONSIDERATIONS</p> <p>1. Securitisation Regulation requirements</p> <p>d) STS status</p> <p>The Transferor confirms that prior to the issuance of a Note Series which is to be an STS Securitisation, a representative sample of the relevant Securitised Portfolio will be the subject of external verification by an appropriate and independent third party. This verification will extend to both compliance with certain lending criteria and verification of certain data set out herein.</p> <p>See the Final Terms dated 28 July 2020, section Receivables Information</p> <p>Verification of data The Transferor has caused a sample of the Receivables (including the data disclosed in respect of those Receivables) to be externally verified by an appropriate and independent third party. The Securitised Portfolio as at the Cut-Off Date has been subject to an agreed upon procedures review on a representative sample of Receivables selected from the Securitised Portfolio as at the Cut-Off Date (as well as an agreed upon procedures review, amongst other things, of the conformity of Receivables in the Portfolio with certain of the eligibility criteria (where applicable)) conducted by a third-party and completed on 28 July 2020 with respect to the Securitised Portfolio as at the Cut-Off Date (the AUP Report). The independent third party has verified that the stratification tables disclosed in these final terms in respect of the Receivables are accurate. The Transferor has reviewed the reports of such independent third parties and is of the opinion that there were no adverse findings in such reports. The third parties undertaking such reviews only have obligations to the parties to the engagement letters governing the performance of the agreed upon procedures subject to the limitations and exclusions contained therein.</p> <p>PCS is not an auditing firm, nor has it or has it sought access to the underlying information which was the basis of the AUP. However, it has read the AUP with the aim of determining whether, on its face, it appears to cover the items required by the criterion.</p> <p>Based solely on the words of the AUP and without any additional due diligence or interaction with the auditing firm responsible for the AUP or sight of the instructions to such firm, PCS has concluded that the AUP appears to meet the requirements of the criterion.</p>		
EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i>		
Verification of a sample of the underlying exposures (Article 22 (2))		
74. The objective of the criterion is to provide a level of assurance that the data on and reporting of the underlying credit claims or receivables is accurate and that the underlying exposures meet the eligibility criteria, by ensuring checks on the data to be disclosed to the investors by an external entity not affected by a potential conflict of interest within the transaction.		
75. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:		
(a) requirements on the sample of the underlying exposures subject to external verification;		
(b) requirements on the party executing the verification;		
(c) scope of the verification;		

(d) requirement on the confirmation of the verification.

EBA Final non-ABCP STS Guidelines

6.2 Verification of a sample of the underlying exposures (Article 22 (2))

Sample of the underlying exposures subject to external verification

78. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, the underlying exposures that should be subject to verification prior to the issuance should be a representative sample of the provisional portfolio from which the securitised pool is extracted and which is in a reasonably final form before issuance.

Party executing the verification

79. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, an appropriate and independent party should be deemed to be a party that meets both of the following conditions:

- (a) it has the experience and capability to carry out the verification;
- (b) it is none of the following:
 - (i) a credit rating agency;
 - (ii) a third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402;
 - (iii) an entity affiliated to the originator.

Scope of the verification

80. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, the verification to be carried out based on the representative sample, applying a confidence level of at least 95%, should include both of the following:

- (a) verification of the compliance of the underlying exposures in the provisional portfolio with the eligibility criteria that are able to be tested prior to issuance;
- (b) verification of the fact that the data disclosed to investors in any formal offering document in respect of the underlying exposures is accurate.

Confirmation of the verification

81. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, confirmation that this verification has occurred and that no significant adverse findings have been found should be disclosed.

Compliance with the Securitisation Regulation

Each of the reports, documents and other information described in paragraphs (a) to (d) above shall be published online on the European DataWarehouse GmbH's website at <https://editor.eurodw.eu/esma/viewdeal?edcode=CREMUK000535100120131> or such other website which conforms with the requirements set out in Article 7(2) of the Securitisation Regulation (the Reporting Website) pursuant to Article 7(2) of the Securitisation Regulation at least in the frequency and by the dates specified in the Securitisation Regulation. If and when a securitisation repository is established in accordance with the Securitisation Regulation, the Servicer shall assist the Transferor with publication on the website of the securitisation repository.

EBA Final non-ABCP STS Guidelines – statements on *background and rationale*

EBA Final non-ABCP STS Guidelines

Definitions:

“AUP”: the agreed upon procedures through which an external firm verifies certain aspects of the asset pool.

“COMI”: centre of main interest – broadly, the legal jurisdiction where the insolvency of the seller of assets will be primarily determined.

“Issuer Notification”: the notification provided by the originator or sponsor pursuant to article 27 of the STS Regulation.

“Jurisdiction List”: the list of jurisdictions where it has been determined that severe clawback provisions do not apply.

“Legal Opinion”: an opinion signed by a law firm qualified in the relevant jurisdiction and acting for the originator or the arranger where the law firm sets out the reasons why, in its opinion and subject to customary assumptions and qualifications, the assets are transferred in such a way as to meet the STS Criterion for “true sale” or the same type of opinion for prior sales together with an opinion on the enforceability of the underlying assets.

“Marketing Documents”: Documents prepared by or on behalf of the originator and used in the marketing of the transaction with potential investors.

“Model”: a liability cash flow model which precisely represents the contractual relationship between the underlying exposures and the payments flowing between the originator, sponsor, investors, other third parties and the SSPE.

“Prospectus/Deal Sheet”: the prospectus, or for a deal where no prospectus needs to be drawn up, the deal sheet envisaged by article 7.1(c) of the STS Regulation.

“Transaction Document”: a document entered into in relation to the transaction binding on one or more parties connected to the transaction.
