**This is the STS Term Master Checklist for STS Term Verifications.**

**This STS Term Master Checklist must be read together with the PCS Procedures Manual and the PCS Term Evidentiary Standards Manual. This document is based upon the draft materials received by PCS as at the date of this document. Any references in this document are to the prospectus unless otherwise stated.**

**PCS comments in this STS Term Master Checklist are based on PCS' interpretation of the STS Regulation (the "Regulation") informed by (a) the text of the Regulation itself, (b) the EBA guidelines and recommendations issued in accordance with Article 19(2) of the Regulation (the "EBA Guidelines") and (c) any relevant national competent authorities interpretation of the STS criteria to the extent known to PCS.**

**It is important that the reader of this checklist reviews and understands the disclaimer referred to on the following page.**

**23 June 2021**

## STS Disclaimer

Neither an STS Verification, nor a CRR Assessment, nor an LCR Assessment is a recommendation to buy, sell or hold securities. None are investment advice whether generally or as defined under Markets in Financial Instruments Directive (2004/39/EC) and none are a credit rating whether generally or as defined under the Credit Rating Agency Regulation (1060/2009/EC).

PCS UK and PCS EU are authorised respectively by the UK Financial Conduct Authority and the French Autorité des Marchés Financiers as third parties verifying STS compliance pursuant to article 28 of the Regulation (EU) 2017/2402 of the European Parliament and of the Council of 12 December 2017 (the "STS Regulation").

Neither CRR Assessments or LCR Assessments are endorsed or regulated by any regulatory and/or supervisory authority nor, other than as set out above, are the PCS Association or either of its subsidiaries, PCS UK and PCS EU, regulated by any regulator and/or supervisory authority including the Belgian Financial Services and Markets Authority, the United Kingdom Financial Conduct Authority, the French Autorité des Marchés Financiers or the European Securities and Markets Authority.

By assessing the STS, CRR or LCR status of any securities or financing, neither the PCS Association nor PCS UK nor PCS EU express any views about the creditworthiness of these securities or financings or their suitability for any existing or potential investor or as to whether there will be a ready, liquid market for these securities or financings.

Equally, by completing (either positively or negatively) any STS, CRR or LCR status assessment of certain instruments, no statement of any kind is made as to the value or price of these instruments or the appropriateness of the interest rate they carry (if any).

In the provision of any STS Verification or CRR Assessment or LCR Assessment, PCS has based its decision on information provided directly and indirectly by the originator or sponsor of the relevant securitisation. Specifically, it has relied on statements made in the relevant prospectus or deal sheet, documentation and/or in certificates provided by, or on behalf of, the originator or sponsor in accordance with PCS' published procedures for the relevant PCS verification or assessment. You should make yourself familiar with these procedures to understand fully how any PCS service is completed. These can be found in the PCS website [www.pcsmarket.org](http://www.pcsmarket.org) (the "PCS Website"). Neither the PCS Association nor PCS UK nor PCS EU undertake their own direct verification of the underlying facts stated in the prospectus, deal sheet, documentation or certificates for the relevant instruments and the completion of any STS Verification or CRR Assessment or LCR Assessment is not a confirmation or implication that the information provided to it by or on behalf of the originator or sponsor is accurate or complete.

The PCS entities take reasonable measures to ensure the quality and accuracy of the information on the PCS Website. However, neither the PCS Association nor PCS UK nor PCS EU can be held liable in any way for the inaccuracy or incompleteness of any information that is available on or through the PCS Website. In addition, neither the PCS Association nor PCS UK nor PCS EU can in any way be held liable or responsible for the content of any other website linked to the PCS Website.

To understand the meaning and limitations of any STS Verification you must read the General Disclaimer that appears on the PCS Website.

When entering any of the "Transaction" sections of the PCS Website, you will be asked to declare that you are allowed to do so under the legislation of your country. The circulation and distribution of information regarding securitisation instruments (including securities) that is available on the PCS Website may be restricted in certain jurisdictions. Persons receiving any information or documents with respect to or in connection with instruments (including securities) available on the PCS Website are required to inform themselves of and to observe all applicable restrictions.

## Prime Collateralised Securities (PCS) STS Term Verification

Date of Assessment /Version	23 June 2021
<b>The transaction to be assessed (the “Transaction”)</b>	<b>GREEN APPLE 2021-I B.V.</b>
Issuer	<b>GREEN APPLE 2021-I B.V.</b>
Originator	Argenta Spaarbank N.V., acting through its Dutch branch
Arranger / Manager(s)	ABN AMRO / ABN AMRO and SOCIÉTÉ GÉNÉRALE
Transaction Legal Counsel	Simmons and Simmons LLP
Rating Agencies	DBRS and Moody’s
Stock Exchange	Luxembourg Stock Exchange
Closing Date	23 June 2021

<b>1</b>	<p><b>Legislative text</b></p> <p><b>Article 20 - Requirements relating to simplicity</b></p> <p>20.1. The title to the underlying exposures shall be acquired by the SSPE by means of a true sale or assignment or transfer with the same legal effect in a manner that is enforceable against the seller or any other third party. The transfer of the title to the SSPE shall not be subject to severe clawback provisions in the event of the seller's insolvency.</p>		
	<p><b>STS criteria</b></p> <p>1. The title to the underlying exposures shall be acquired by the SSPE by means of a true sale or assignment or transfer with the same legal effect in a manner that is enforceable against the seller or any other third party.</p>		
	<table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><b>Verified?</b></td> <td style="text-align: center;"><b>Yes</b></td> </tr> </table>	<b>Verified?</b>	<b>Yes</b>
<b>Verified?</b>	<b>Yes</b>		
	<p><b>PCS Comment</b></p> <p>Section 7.1 discusses the method by which legal title is transferred and Risk Factors – “Transfer of legal title to Mortgage Receivables - commingling risk <i>vis-à-vis</i> the Seller” discusses the risk issues further.</p> <p>Section 4.4 – STS Statements (a) provides additional information.</p> <p><b><i>PCS has been provided with and reviewed legal opinions issued by Simmons &amp; Simmons LLP as to matters of Belgian and Dutch laws, as applicable to the Transaction and the Originator and has reached sufficient confidence that this requirement is met.</i></b></p> <p>“True sale” is not a legal concept but a rating agency creation. The essence of a “true sale” is that the property in the securitised assets has legally moved from the originator/seller to the SSPE in such a way that the SSPE’s ownership will be recognised as a matter of law, including and especially in the case of the insolvency of the originator/seller. In a “true sale” the insolvency officer and creditors of the insolvent originator/seller are not able to satisfy the claims of the originator/seller’s creditor out of the proceeds of the securitised assets. Following a “true sale” there is no legal device by which the assets can automatically revert to the originator/seller’s ownership. Such automatic reversion is associated with security interests and anathema to a “true sale”.</p> <p>This is clearly stated in the wording of the Regulation (20.1). The expression “transfer to the same effect” indicates that, as long as the conditions in the preceding paragraph are met, the Regulation does not seek to limit the type of legal devices which can be used to effect such transfer of title.</p> <p>The issue of “true sale” is separate from the issue of “clawback”. “Clawback” refers to legal processes through which, in the insolvency of the seller of an asset, an insolvency officer is entitled to reverse the sale – even in cases where a “true sale” has taken place.</p> <p>All European jurisdictions, to PCS’ knowledge, have rules allowing for clawbacks. Clawbacks are usually rules to avoid a company heading towards insolvency from “defrauding” its existing creditors either by selling assets at very low prices (to friends and relations) or unfairly preferring certain creditors over others.</p> <p>The Regulation (20.1) therefore does not require STS “true sales” to be clawback-proof, since this would mean that no European securitisation could ever be STS. It does require the sale not to be subject to “severe clawback”. The Regulation does not define “severe clawback” but gives an example (20.2) where a clawback may occur.</p> <p>The Regulation (20.3) also explicitly excludes from the definition of “severe clawback” the traditional European basis for such devices which all come under the general category of “preferences”. PCS further notes that the examples (20.2 and 20.3) refer to the insolvency law of a jurisdiction and therefore believes that clawback risk is to be assessed on a jurisdictional basis rather than on a transactional basis.</p> <p>Finally, PCS does not believe and nor is there any evidence that the legislators or regulatory authorities are seeking to craft a higher standard than that which has been used for decades by the market and was the basis for the legislative text.</p> <p>Based on the above considerations, PCS believes that transfers from a jurisdiction meeting the following criteria – absent any other indications – shall not fall within the definition of “severe clawback”:</p> <ul style="list-style-type: none"> <li>• Clawback requires an unfair preference “defrauding” creditors</li> <li>• Clawback puts the burden of proof on the insolvency officer or creditors – in other words it cannot be automatic nor require the purchaser to prove their innocence</li> </ul>		

Since “severe clawback” is a jurisdictional concept, in analysing this issue PCS will therefore first seek to determine the Seller’s jurisdiction for the purposes of insolvency proceedings affecting the originator.

As confirmed in the above mentioned opinions, in principle the laws of Belgium would apply in the case of insolvency procedures affecting the Seller, since Belgium is the (regulatory) home member state of Argenta, which is a credit institution and only acts through its Dutch branch for the purpose of the Transaction.

On the basis of the Winding-up Directive, the administrative or judicial authorities of the home member state of the Seller, being Belgium, shall alone be empowered to decide on the implementation of one or more reorganisation measures in a bank, including branches in other member states, or the opening of winding-up proceedings concerning such bank.

Under certain circumstances, however, also Dutch law becomes relevant in the insolvency/winding-up of the Seller.

The second step would be to determine whether the laws of the relevant jurisdictions (in this case both Belgium and The Netherlands) contain severe claw back provisions in their insolvency legislation.

***In the case of the Transaction, title to the assets is transferred by a traditional Dutch assignment. The legal opinions from Simmons & Simmons LLP confirms that this assignment meets the definition of “true sale” outlined above.***

***Belgian and Dutch insolvency laws provide for clawback in the cases of preferences and transactions at an undervalue and require the insolvency officer to prove that case. Therefore, and as confirmed by the Opinions, the transfer is not, in our opinion, subject to “severe clawback”.***

#### **EBA Final non-ABCP STS Guidelines – statements on *background and rationale***

##### **True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))**

16. The criterion specified in Article 20(1) aims to ensure that the underlying exposures are beyond the reach of, and are effectively ring-fenced and segregated from, the seller, its creditors and its liquidators, including in the event of the seller’s insolvency, enabling an effective recourse to the ultimate claims for the underlying exposures.

22. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:

(a) how to substantiate the confidence of third parties with respect to compliance with Article 20(1): it is understood that this should be achieved by providing a legal opinion. While the guidance does not explicitly require the provision of a legal opinion in all cases, the guidance expects a legal opinion to be provided as a general rule, and omission to be an exception;

(b) the triggers to effect the perfection of the transfer if assignments are perfected at a later stage than at the closing of the transaction.

#### **EBA Final non-ABCP STS Guidelines**

#### **4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))**

***True sale, assignment or transfer with the same legal effect***<sup>10</sup>. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including t in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:

- (a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;
- (b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;
- (c) assessment of clawback risks and re-characterisation risks

11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.

12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.

#### **4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))**

##### ***True sale, assignment or transfer with the same legal effect***

10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:

- (a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;
- (b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;
- (c) assessment of clawback risks and re-characterisation risks.

11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.

12. The legal opinion referred to in paragraph 11 should be accessible and made available to any relevant third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402 and any relevant competent authority from among those referred to in Article 29 of that regulation.

<b>Legislative text</b>	
<b>Article 20 - Requirements relating to simplicity</b>	
<p>20.2. For the purpose of paragraph 1, any of the following shall constitute severe clawback provisions:</p> <p>(a) provisions which allow the liquidator of the seller to invalidate the sale of the underlying exposures solely on the basis that it was concluded within a certain period before the declaration of the seller's insolvency;</p> <p>(b) provisions where the SSPE can only prevent the invalidation referred to in point (a) if it can prove that it was not aware of the insolvency of the seller at the time of sale.</p>	
<b>STS criteria</b>	
<b>Verified?</b>	Yes
<b>PCS Comment</b>	
See point 2 above. Refer to Section 4.4, STS Statements (b). A legal opinion has been provided and has been reviewed.	
<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<b>True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</b>	
<p>17. The criterion in Article 20(2) is designed to ensure the enforceability of the transfer of legal title in the event of the seller's insolvency. More specifically, if the underlying exposures sold to the SSPE could be reclaimed for the sole reason that their transfer was effected within a certain period before the seller's insolvency, or if the SSPE could prevent the reclaim only by proving that it was unaware of the seller's insolvency at the time of transfer, such clauses would expose investors to a high risk that the underlying exposures would not effectively back their contractual claims. For this reason, Article 20(2) specifies that such clauses constitute severe clawback provisions, which may not be contained in STS securitisation.</p>	
<b>EBA Final non-ABCP STS Guidelines</b>	
<b>4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))</b>	
<b><i>True sale, assignment or transfer with the same legal effect</i></b>	
<p>10. For the purposes of Article 20(1) of Regulation (EU) 2017/2402 and in order to substantiate the confidence of third parties, including third parties verifying simple, transparent and standardised (STS) compliance in accordance with Article 28 of that Regulation and competent authorities meeting the requirements specified therein, all of the following should be provided:</p> <p>(a) confirmation of the true sale or confirmation that, under the applicable national framework, the assignment or transfer segregate the underlying exposures from the seller, its creditors and its liquidators, including in the event of the seller's insolvency, with the same legal effect as that achieved by means of true sale;</p> <p>(b) confirmation of the enforceability of the true sale, assignment or transfer with the same legal effect referred to in point (a) against the seller or any other third party, under the applicable national legal framework;</p> <p>(c) assessment of clawback risks and re-characterisation risks.</p> <p>11. The confirmation of the aspects referred to in paragraph 10 should be achieved by the provision of a legal opinion provided by qualified external legal counsel, except in the case of repeat issuances in standalone securitisation structures or master trusts that use the same legal mechanism for the transfer, including instances in which the legal framework is the same.</p> <p>12. <b>4</b>	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	<p>20.5. Where the transfer of the underlying exposures is performed by means of an assignment and perfected at a later stage than at the closing of the transaction, the triggers to affect such perfection shall, at least include the following events:</p> <p>(a) severe deterioration in the seller credit quality standing;</p> <p>(b) insolvency of the seller; and</p> <p>(c) unremedied breaches of contractual obligations by the seller, including the seller's default.</p>	
	<b>STS criteria</b>	
	<p>4. Where the transfer of the underlying exposures is performed by means of an assignment and perfected at a later stage than at the closing of the transaction, the triggers to effect such perfection shall, at least include the following events:</p> <p>(a) severe deterioration in the seller credit quality standing;</p> <p>(b) insolvency of the seller; and</p> <p>(c) unremedied breaches of contractual obligations by the seller, including the seller's default.</p>	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	<p>Notification is not applicable to perfect the transfer of legal title by means of an assignment and pledge.</p> <p>Criterion 4 requires two steps:</p> <ul style="list-style-type: none"> <li>- To determine whether the transfer of the assets is by means of an unperfected assignment; and</li> <li>- If it is, whether the transaction contains the requisite triggers.</li> </ul> <p>Although the transfer is not notified to the borrowers, the legal opinions confirm that such notification is not required to fully perfect the transfer of ownership in the mortgage loans to the SSPE. Accordingly, this transaction does not operate by way of an unperfected assignment and the issue of triggers does not arise.</p> <p>Registration of the relevant assignment deed is a requirement to obtain enforceability vis-à-vis third parties in the Netherlands. It is noted that the Issuer has undertaken in the Mortgage Receivables Purchase Agreement to register (a) the Initial Deed of Assignment on the Closing Date and (b) each Deed of Assignment in respect of Further Advance Receivables and Substitute Receivables on the relevant Notes Payment Date.</p>	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	

**True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))**

20. The objective of the criterion in Article 20(5) is to minimise legal risks related to unperfected transfers in the context of an assignment of the underlying exposures, by specifying a minimum set of events subsequent to closing that should trigger the perfection of the transfer of the underlying exposures.

22. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:

(a) how to substantiate the confidence of third parties with respect to compliance with Article 20(1): it is understood that this should be achieved by providing a legal opinion. While the guidance does not explicitly require the provision of a legal opinion in all cases, the guidance expects a legal opinion to be provided as a general rule, and omission to be an exception;

(b) the triggers to effect the perfection of the transfer if assignments are perfected at a later stage than at the closing of the transaction.

**EBA Final non-ABCP STS Guidelines**

**4.1 True sale, assignment or transfer with the same legal effect, representations and warranties (Article 20(1)-(6))**

***Severe deterioration in the seller credit quality standing***

13. For the purposes of Article 20(5) of Regulation (EU) 2017/2402, the transaction documentation should identify, with regard to the trigger of 'severe deterioration in the seller credit quality standing', credit quality thresholds that are objectively observable and related to the financial health of the seller.

***Insolvency of the seller***

14. For the purposes of Article 20(5) of Regulation (EU) 2017/2402, the trigger of 'insolvency of the seller' should refer, at least, to events of legal insolvency as defined in national legal frameworks.

5	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	20.6. The seller shall provide representations and warranties that, to the best of its knowledge, the underlying exposures included in the securitisation are not encumbered or otherwise in a condition that can be foreseen to adversely affect the enforceability of the true sale or assignment or transfer with the same legal effect.	
	<b>STS criteria</b>	
	5. The seller shall provide representations and warranties that, to the best of its knowledge, the underlying exposures included in the securitisation are not encumbered or otherwise in a condition that can be foreseen to adversely affect the enforceability of the true sale or assignment or transfer with the same legal effect.	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	Section 7.2 Representations and Warranties, points 2 and 3.  In case of a breach of R&W, the Seller must repurchase the affected Mortgage Receivables but, alternatively, can also offer substitute receivables, provided the Additional Purchase Conditions are met and the purchase price for the Substitute Receivables does not exceed the Substitute Available Amount.	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	21. The objective of the criterion in Article 20(6), which requires the seller to provide the representations and warranties confirming to the seller's best knowledge that the transferred exposures are neither encumbered nor otherwise in a condition that could potentially adversely affect the enforceability of the transfer of title, is to ensure that the underlying exposures are not only beyond the reach not only of the seller but equally of its creditors, and to allocate the commercial risk of the encumbrance of the underlying exposures to the seller.	
<b>EBA Final non-ABCP STS Guidelines</b>		

<b>6</b>	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	20.7. The underlying exposures transferred from, or assigned by, the seller to the SSPE shall meet pre-determined, clear and documented eligibility criteria which do not allow for active portfolio management of those exposures on a discretionary basis. For the purpose of this paragraph, substitution of exposures that are in breach of representations and warranties shall not be considered active portfolio management. Exposures transferred to the SSPE after the closing of the transaction shall meet the eligibility criteria applied to the initial underlying exposures.	
	<b>STS criteria</b>	
	6. The underlying exposures transferred from, or assigned by, the seller to the SSPE shall meet pre-determined, clear and documented eligibility criteria....	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	See Section 7.2, Representations and Warranties, including in particular point (5) regarding compliance with the Mortgage Loan Criteria as detailed in Section 7.3. The EBA Guidelines clarify that “clear” does not mean easily readable or comprehended by a non-expert. In the Regulation a criterion is “clear” when a court or tribunal could determine whether, presumably in all cases, the criterion is met for each asset. In the Regulation, “clear” is about certainty of determination. <b>PCS has read the eligibility criteria in the Prospectus. As they are mandatory, they meet the “predetermined” requirement. As they are in the Prospectus and the Mortgage Sale Agreement they meet the “documented” requirement. PCS has also concluded that they allow determination in each case and so meet the “clear” requirement.</b>	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</b>	
23. The objective of this criterion in Article 20(7) is to ensure that the selection and transfer of the underlying exposures in the securitisation is done in a manner which facilitates in a clear and consistent fashion the identification of which exposures are selected for/transferred into the securitisation, and to enable the investors to assess the credit risk of the asset pool prior to their investment decisions.		
<b>EBA Final non-ABCP STS Guidelines</b>		
<b>4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</b>		
<b>Clear eligibility criteria</b>		
17. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, the criteria should be understood to be ‘clear’ where compliance with them is possible to be determined by a court or tribunal, as a matter of law or fact or both.		

<b>7</b>	<p><b>Legislative text</b></p> <p><b>Article 20 - Requirements relating to simplicity</b></p> <p>20.7. The underlying exposures transferred from, or assigned by, the seller to the SSPE shall meet pre-determined, clear and documented eligibility criteria which do not allow for active portfolio management of those exposures on a discretionary basis. For the purpose of this paragraph, substitution of exposures that are in breach of representations and warranties shall not be considered active portfolio management. Exposures transferred to the SSPE after the closing of the transaction shall meet the eligibility criteria applied to the initial underlying exposures.</p>		
	<p><b>STS criteria</b></p> <p>7. Which do not allow for active portfolio management of those exposures on a discretionary basis. For the purpose of this paragraph, substitution of exposures that are in breach of representations and warranties shall not be considered active portfolio management.</p>		
	<table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><b>Verified?</b></td> <td style="text-align: center;">Yes</td> </tr> </table>	<b>Verified?</b>	Yes
<b>Verified?</b>	Yes		
	<p><b>PCS Comment</b></p> <p>See STS Statement (e) and Section 7.1: Repurchase of Mortgage Receivables.</p> <p>In case the Seller obtains an “Other Claim”, the Seller and the Issuer will both have a claim against the same Borrower, which is secured by the same Mortgage, which leads to a risk for the Issuer that the foreclosure value is insufficient and/or it cannot decide when and how to enforce the Mortgage. To mitigate this risk, the Seller will have the obligation to repurchase the affected Mortgage Receivable.</p> <p>The EBA Guidelines set out seven devices to repurchase securitised assets which are not to be considered indicative of “active portfolio management”. To the extent that a transaction only contains some or all of those seven devices and does not provide any other form of repurchase, then the STS criterion will be met.</p> <p>If the transaction should contain a repurchase device that is not included in the EBA’s list, then an analysis will need to be conducted as to whether this additional device offends against the principles set out in the EBA Guidelines (15.a and b) as defining “active portfolio management”</p> <p><b>PCS has reviewed all the repurchase devices set out in the Prospectus and the Mortgage Receivables Purchase Agreement and each one meets the EBA guidelines</b></p> <p><b>PCS also notes that there is an explicit affirmative statement in the Prospectus to the effect that the Transaction does not allow for “active portfolio management”.</b></p>		
	<p><b>EBA Final non-ABCP STS Guidelines – statements on background and rationale</b></p> <p><b>Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</b></p> <p>24. Consistently with this objective, the active portfolio management of the exposures in the securitisation should be prohibited, given that it adds a layer of complexity and increases the agency risk arising in the securitisation by making the securitisation’s performance dependent on both the performance of the underlying exposures and the performance of the management of the transaction. The payments of STS securitisations should depend exclusively on the performance of the underlying exposures.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines</b></p> <p><b>4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20(7))</b></p> <p><b>Active portfolio management</b></p> <p>15. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, active portfolio management should be understood as portfolio management to which either of the following applies:</p> <p>(a) the portfolio management makes the performance of the securitisation dependent both on the performance of the underlying exposures and on the performance of the portfolio management of the securitisation, thereby preventing the investor from modelling the credit risk of the underlying exposures without considering the portfolio management strategy of the portfolio manager;</p> <p>(b) the portfolio management is performed for speculative purposes aiming to achieve better performance, increased yield, overall financial returns or other purely financial or economic benefit.</p> <p>16. The techniques of portfolio management that should not be considered active portfolio management include:</p> <p>(a) substitution or repurchase of underlying exposures due to the breach of representations or warranties;</p>		

- (b) substitution or repurchase of the underlying exposures that are subject to regulatory dispute or investigation to facilitate the resolution of the dispute or the end of the investigation;
- (c) replenishment of underlying exposures by adding underlying exposures as substitutes for amortised or defaulted exposures during the revolving period;
- (d) acquisition of new underlying exposures during the 'ramp up' period to line up the value of the underlying exposures with the value of the securitisation obligations;
- (e) repurchase of underlying exposures in the context of the exercise of clean-up call options, in accordance with Article 244(3)(g) of Regulation (EU) 2017/2401;
- (f) repurchase of defaulted exposures to facilitate the recovery and liquidation process with respect to those exposures;
- (g) repurchase of underlying exposures under the repurchase obligation in accordance with Article 20(13) of Regulation (EU) 2017/2402.

8	<p><b>Legislative text</b></p> <p><b>Article 20 - Requirements relating to simplicity</b></p> <p>20.7. 	<p><b>STS criteria</b></p> <p>8. Exposures transferred to the SSPE after the closing of the transaction shall meet the eligibility criteria applied to the initial underlying exposures.</p>		
	<table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><b>Verified?</b></td> <td style="text-align: center;">Yes</td> </tr> </table>	<b>Verified?</b>	Yes
<b>Verified?</b>	Yes		
	<p><b>PCS Comment</b></p> <p>See 7.1 subsection: Purchase of Further Advance Receivables and Substitute Receivables; Section 7.2 Representation and Warranties; Section 7.3 Mortgage Loan Criteria.</p> <p>This criterion is a future event criterion. In other words, it cannot be either met or failed at the outset of the transaction. But if, at a later stage, it is not met, then the Originator will need to inform ESMA and the STS status of the securitisation will be lost.</p> <p>Therefore, as a technical matter, this criterion is not applicable at the closing of a transaction. However, PCS will nevertheless look to see if there is a covenant on the part of the originator to comply in the future with this requirement whilst noting at the same time that the absence of any such covenant – although possibly unsettling for some investors - would not invalidate the STS status of the transaction at closing.</p> <p><b>PCS has identified the existence of such a covenant in the Mortgage Sale Agreement.</b></p>		
	<p><b>EBA Final non-ABCP STS Guidelines – statements on background and rationale</b></p> <p><b>Eligibility criteria for the underlying exposures, active portfolio management (Article 20.7)</b></p> <p>25. Revolving periods and other structural mechanisms resulting in the inclusion of exposures in the securitisation after the closing of the transaction may introduce the risk that exposures of lesser quality can be transferred into the pool. For this reason, it should be ensured that any exposure transferred into the securitisation after the closing meets the eligibility criteria, which are no less strict than those used to structure the initial pool of the securitisation.</p> <p>26. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) the purpose of the requirement on the portfolio management, and the provision of examples of techniques which should not be regarded as active portfolio management: this criterion should be considered without prejudice to the existing requirements with respect to the similarity of the underwriting standards in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, which requires that all the underlying exposures in a securitisation be underwritten according to similar underwriting standards;</p> <p>(b) interpretation of the term 'clear' eligibility criteria;</p> <p>(c) clarification with respect to the eligibility criteria that need to be met with respect to the exposures transferred to the SSPE after the closing.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines</b></p> <p><b>4.2 Eligibility criteria for the underlying exposures, active portfolio management (Article 20.7)</b></p> <p><b>Eligibility criteria to be met for exposures transferred to the SSPE after the closing of the transaction</b></p> <p>18. For the purposes of Article 20(7) of Regulation (EU) 2017/2402, 'meeting the eligibility criteria applied to the initial underlying exposures' should be understood to mean eligibility criteria that comply with either of the following:</p> <p>(a) with regard to normal securitisations, they are no less strict than the eligibility criteria applied to the initial underlying exposures at the closing of the transaction;</p>		

(b) with regard to securitisations that issue multiple series of securities including master trusts, they are no less strict than the eligibility criteria applied to the initial underlying exposures at the most recent issuance, with the results that the eligibility criteria may vary from closing to closing, with the agreement of securitisation parties and in accordance with the transaction documentation.

19. Eligibility criteria to be applied to the underlying exposures in accordance with paragraph 18 should be specified in the transaction documentation and should refer to eligibility criteria applied at exposure level.

9	<p><b>Legislative text</b></p> <p><b>Article 20 - Requirements relating to simplicity</b></p> <p>20.8. The securitisation shall be backed by a pool of underlying exposures that are homogeneous in terms of asset type, taking into account the specific characteristics relating to the cash flows of the asset type including their contractual, credit risk and prepayment characteristics. A pool of underlying exposures shall only comprise one asset type. The underlying exposures shall contain obligations that are contractually binding and enforceable, with full recourse to debtors and, where applicable, guarantors.</p>		
	<p><b>STS criteria</b></p> <p>9. The securitisation shall be backed by a pool of underlying exposures that are homogeneous in terms of asset type, taking into account the specific characteristics relating to the cash flows of the asset type including their contractual, credit risk and prepayment characteristics. A pool of underlying exposures shall only comprise one asset type.</p>		
	<table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><b>Verified?</b></td> <td style="text-align: center;">Yes</td> </tr> </table>	<b>Verified?</b>	Yes
<b>Verified?</b>	Yes		
	<p><b>PCS Comment</b></p> <p>See STS Statements (f) and (g). Particularly see section 6.1 Stratification Tables, section 6.3 Origination and Servicing and section 7.2 (7) regarding homogeneity factor.</p> <p>The definition of “homogeneity” in the Regulation is to be the subject of a Regulatory Technical Standard (“RTS”). Being set out in an RTS, rather than a guideline or recommendation issued by the EBA, the definition of “homogeneity” will be legally binding on all regulatory authorities.</p> <p>The definition of “homogeneity” in the Regulation is to be the subject of a Regulatory Technical Standard (“RTS”). Being set out in an RTS, rather than a guideline or recommendation issued by the EBA, the definition of “homogeneity” will be legally binding on all regulatory authorities.</p> <p>Although a final draft of such RTS has been formally adopted by the European Commission, PCS notes that such RTS has not yet come into force. It is not necessary, as a technical legal matter, for the RTS to come into force before STS securitisations are issued. In the absence of the RTS, market participants must turn to the text of the Regulation to interpret what “homogeneity” means. In interpreting the expression, PCS has based itself on the text of the Regulation, its knowledge of the intent of the legislators – including, crucially, the legislators belief that the STS Regulation was justified by the excellent performance of most “plain vanilla” European securitisations and the draft RTS adopted by the European Commission.</p> <p>Based on the above, it seems clear to PCS that the Regulation would not seek to exclude from the STS category securitisations that have performed extremely well and are universally considered “homogenous” by market participants. This does not exonerate any transaction from being analysed against this criterion but does set the background for such analysis.</p> <p>Turning, for guidance, to the draft RTS adopted by the European Commission, four elements require examination: (a) “similar underwriting standards”, (b) “similar servicing standards”, (c) same asset class and (d) relevant risk factors.</p> <p>Until the RTS is finally approved and following the guiding principles of the EBA, we note that “similar underwriting standards” must mean something like the same type of underwriting approach, looking at the same types of data points to calculate the same type of credit risk. It cannot mean “exactly the same underwriting criteria”, since this would make it impossible for any securitisation ever to have a “homogenous” pool.</p> <p><b><i>In the Transaction, the mortgages were underwritten on a similar basis, they are being serviced by Argenta Spaarbank NV acting through its Dutch branch on the same platform, they are a single asset class – residential mortgages – and, based on the EBA’s suggested approach, the mortgages are all originated in the same jurisdiction.</i></b></p> <p><b><i>PCS also takes great comfort from the fact that transactions containing pools with similar characteristics have always been considered to be “homogenous” by a wide consensus of market participants.</i></b></p>		
	<p><b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b></p> <p><b>Homogeneity, obligations of the underlying exposures, periodic payment streams, no transferable securities (Article 20(8))</b></p> <p>27. The criterion on the homogeneity as specified in the first subparagraph of Article 20(8) has been further clarified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines</b></p>		

<b>10</b>	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	20.8. The securitisation shall be backed by a pool of underlying exposures that are homogeneous in terms of asset type, taking into account the specific characteristics relating to the cash flows of the asset type including their contractual, credit risk and prepayment characteristics. A pool of underlying exposures shall only comprise one asset type. The underlying exposures shall contain obligations that are contractually binding and enforceable, with full recourse to debtors and, where applicable, guarantors.

	<b>No resecuritisation (Article 20(9))</b>	
	<p>31. The objective of this criterion is to prohibit resecuritisation subject to derogations for certain cases or for resecuritisation as specified in Regulation (EU) 2017/2402. This is a lesson learnt from the financial crisis, when resecuritisations were structured into highly leveraged structures in which notes of lower credit quality could be re-packaged and credit enhanced, resulting in transactions whereby small changes in the credit performance of the underlying assets had severe impacts on the credit quality of the resecuritisation bonds. The modelling of the credit risk arising in these bonds proved very difficult, also due to high levels of correlations arising in the resulting structures.</p> <p>32. The criterion is deemed sufficiently clear and does not require any further clarification.</p>

	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<p><b>Underwriting standards (Article 20(10))</b></p> <p>37. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the term 'similar exposures', with reference to requirements specified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402;</p> <p>(b) the term 'no less stringent underwriting standards': independently of the guidance provided in these guidelines, it is understood that, in the spirit of restricting the 'originate-to-distribute' model of underwriting, where similar exposures exist on the originator's balance sheet, the underwriting standards that have been applied to the securitised exposures should also have been applied to similar exposures that have not been securitised, i.e. the underwriting standards should have been applied not solely to securitised exposures;</p>	
<b>EBA Final non-ABCP STS Guidelines</b>		
<p><b>4.4 Underwriting standards, originator's expertise (Article 20(10))</b></p> <p><b><i>No less stringent underwriting standards</i></b></p> <p>23. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the underwriting standards applied to securitised exposures should be compared to the underwriting standards applied to similar exposures at the time of origination of the securitised exposures.</p> <p>24. Compliance with this requirement should not require either the originator or the original lender to hold similar exposures on its balance sheet at the time of the selection of the securitised exposures or at the exact time of their securitisation, nor should it require that similar exposures were actually originated at the time of origination of the securitised exposures.</p>		

<b>18</b>	<b>Legislative text</b>
<b>Article 20 - Requirements relating to simplicity</b>	
The underwriting standards pursuant to which the underlying exposures are originated and any material changes from prior underwriting standards shall be fully disclosed to potential investors without undue delay.	
<b>STS criteria</b>	
18. The underwriting standards pursuant to which the underlying exposures are originated and any material changes from prior underwriting standards shall be fully disclosed to potential investors without undue delay.	
<b>Verified?</b>	Yes
<b>PCS Comment</b>	
Section 8 General (13)	
Although somewhat confusingly drafted, the EBA Guidelines make clear that the part of the criterion referring to changes from prior underwriting is a future event criterion. It applies changes in underwriting criteria that occur post-closing. In other words, it cannot be either met or failed at the outset of the transaction. But if, at a later stage, it is not met, then the Originator will need to inform ESMA and the STS status of the securitisation will be lost.	
Therefore, as a technical matter, this criterion is not applicable at the closing of a transaction.	
However, PCS will nevertheless look to see if there is a covenant on the part of the originator to comply in the future with this requirement whilst noting at the same time that the absence of any such covenant – although possibly unsettling for some investors – would not invalidate the STS status of the transaction at closing.	
<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<b>Underwriting standards (Article 20(10))</b>	
37 (c) clarification of the requirement to disclose material changes from prior underwriting standards to potential investors without undue delay: the guidance clarifies that this requirement should be forward-looking only, referring to material changes to the underwriting standards after the closing of the securitisation. The guidance clarifies the interactions with the requirement for similarity of the underwriting standards set out in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, which requires that all the underlying exposures in securitisation be underwritten according to similar underwriting standards;	
<b>EBA Final non-ABCP STS Guidelines</b>	
<b>4.4 Underwriting standards, originator's expertise (Article 20(10))</b>	
<b><i>Disclosure of material changes from prior underwriting standards</i></b>	
25. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, material changes to the underwriting standards that are required to be fully disclosed should be understood to be those material changes to the underwriting standards that are applied to the exposures that are transferred to, or assigned by, the SSPE after the closing of the securitisation in the context of portfolio management as referred to in paragraphs 15 and 16.	
26. Changes to such underwriting standards should be deemed material where they refer to either of the following types of changes to the underwriting standards:	
(a) changes which affect the requirement of the similarity of the underwriting standards further specified in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402;	
(b) changes which materially affect the overall credit risk or expected average performance of the portfolio of underlying exposures without resulting in substantially different approaches to the assessment of the credit risk associated with the underlying exposures.	

27. The disclosure of all changes to underwriting standards should include an explanation of the purpose of such changes.

28. With regard to trade receivables that are not originated in the form of a loan, reference to underwriting standards in Article 20(10) should be understood to refer to credit standards applied by the seller to short-term credit generally of the type giving rise to the securitised exposures and proposed to its customers in relation to the sales of its products and services.

<b>19</b>	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	In the case of securitisations where the underlying exposures are residential loans, the pool of loans shall not include any loan that was marketed and underwritten on the premise that the loan applicant or, where applicable intermediaries, were made aware that the information provided might not be verified by the lender.	
	<b>STS criteria</b>	
	19. In the case of securitisations where the underlying exposures are residential loans, the pool of loans shall not include any loan that was marketed and underwritten on the premise that the loan applicant or, where applicable intermediaries, were made aware that the information provided might not be verified by the lender.	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	Section 7.2 (37).	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>Underwriting standards (Article 20(10))</b>	
34. The objective of the criterion specified in the second subparagraph of Article 20(10) is to prohibit the securitisation of self-certified mortgages for STS purposes, given the moral hazard that is inherent in granting such types of loans.		
37 (d) the scope of the criterion with respect to the specific types of residential loans as referred to in the second subparagraph of Article 20(10) and to the nature of the information that should be captured by this criterion;		
<b>EBA Final non-ABCP STS Guidelines</b>		
<b>4.4 Underwriting standards, originator's expertise (Article 20(10))</b>		
<b>Residential loans</b>		
29. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the pool of underlying exposures should not include residential loans that were both marketed and underwritten on the premise that the loan applicant or intermediaries were made aware that the information provided might not be verified by the lender.		
30. Residential loans that were underwritten but were not marketed on the premise that the loan applicant or intermediaries were made aware that the information provided might not be verified by the lender, or become aware after the loan was underwritten, are not captured by this requirement.		
31. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, the 'information' provided should be considered to be only relevant information. The relevance of the information should be based on whether the information is a relevant underwriting metric, such as information considered relevant for assessing the creditworthiness of a borrower, for assessing access to collateral and for reducing the risk of fraud.		
32. Relevant information for general non-income-generating residential mortgages should normally be considered to constitute income, and relevant information for income-generating residential mortgages should normally be considered to constitute rental income. Information that is not useful as an underwriting metric, such as mobile phone numbers, should not be considered relevant information.		

<b>20</b>	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	The assessment of the borrower's creditworthiness shall meet the requirements set out in Article 8 of Directive 2008/48/EC or paragraphs 1 to 4, point (a) of paragraph 5, and paragraph 6 of Article 18 of Directive 2014/17/EU or, where applicable, equivalent requirements in third countries.	
	<b>STS criteria</b>	
	20. The assessment of the borrower's creditworthiness shall meet the requirements set out in Article 8 of Directive 2008/48/EC or paragraphs 1 to 4, point (a) of paragraph 5, and paragraph 6 of Article 18 of Directive 2014/17/EU or, where applicable, equivalent requirements in third countries.	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	Section 7.2 (13), Representation and warranties. The criterion requires consumer loans or mortgages to have been underwritten in accordance with one of two European Directives. European Directives, in contrast to Regulations, do not have direct effect but must be implemented into national law country by country. Therefore, if the assets concerned, as in the case of the Transaction, are residential mortgages, the relevant Directive is 2014/17/EU. The next step is to determine which Dutch law transcribed this Directive into local law. PCS assumes, although the Regulation and the EBA Guidelines are silent on this point, that the requirement for mortgages and consumer loans to have been underwritten in compliance with the Directives only applies to assets underwritten after these Directives were transcribed into national law. This was done in The Netherlands via the new Civil Code implementing Directive No. 2014/17/EU of the European Parliament and of the Council of 4 February 2014 on credit agreements for consumers with regard to residential immovable property and amending Directives 2008/48/EC and 2013/36/EU and Regulation (EU) No. 1093/2010 (PbEU 2014, L 60/34) issued in 2016. The originator has provided a representation that this criterion is met.	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>Underwriting standards (Article 20(10))</b>	
35. The objective of the criterion specified in the third subparagraph of Article 20(10) is to ensure that the assessment of the borrower's creditworthiness is based on robust processes. It is expected that the application of this article will be limited in practice, given that the STS is limited to originators based in the EU, and the criterion is understood to cover only exposures originated by the EU originators to borrowers in non-EU countries. 37 (e) clarification of the criterion with respect to the assessment of a borrower's creditworthiness based on equivalent requirements in third countries;		
<b>EBA Final non-ABCP STS Guidelines</b>

	<b>Article 20 - Requirements relating to simplicity</b>	
	The originator or original lender shall have expertise in originating exposures of a similar nature to those securitised.	
	<b>STS criteria</b>	
	21. The originator or original lender shall have expertise in originating exposures of a similar nature to those securitised.	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	STS Statement (i) and Section "The Seller". "for the purpose of compliance with Article 20(10) of the EU Securitisation Regulation, the Seller has the required expertise in originating residential mortgage loans which are of a similar nature as the Mortgage Loans (taking the EBA STS Guidelines Non-ABCP Securitisations into account), as (i) the Seller is a duly licensed Belgian credit institution, its licence having been passported to the Netherlands and is under the supervision of the NBB for prudential matters and the Belgian Financial Services and Markets Authority with regard to conduct of business rules and financial market supervision and the AFM with regard to conduct of business rules in respect of Mortgage Loans originated by its Dutch Branch and the ECB with regard to certain banking regulations and has a minimum of five (5) years' experience in originating mortgage loans similar to the Mortgage Loans;"	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>Underwriting standards(Article 20(10))</b>	
36. The objective of the criterion specified in the fourth subparagraph of Article 20(10) is for the originator or original lender to have an established performance history of credit claims or receivables similar to those being securitised, and for an appropriately long period of time.		
37 (f) identification of criteria on which the expertise of the originator or the original lender should be determined:		
(i) when assessing if the originator or the original lender has the required expertise, some general principles should be set out against which the expertise should be assessed. The general principles have been designed to allow a robust qualitative assessment of the expertise. One of these principles is the regulatory authorisation: this is to allow for more flexibility in such qualitative assessments of the expertise if the originator or the original lender is a prudentially regulated institution which holds regulatory authorisations or permissions that are relevant with respect to origination of similar exposures. The regulatory authorisation in itself should, however, not be a guarantee that the originator or original lender has the required expertise;		
(ii) irrespective of such general principles, specific criteria should be developed, based on specifying a minimum period for an entity to perform the business of originating similar exposures, compliance with which would enable the entity to be considered to have a sufficient expertise. Such expertise should be assessed at the group level, so that possible restructuring at the entity level would not automatically lead to non-compliance with the expertise criterion. It is not the intention of such specific criteria to form an impediment to the entry of new participants to the market. Such entities should also be eligible for compliance with the expertise criterion, as long as their management body and senior staff with managerial responsibility for origination of similar exposures, have sufficient experience over a minimum specified period.		
38. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.		
<b>EBA Final non-ABCP STS Guidelines</b>		
<b>4.4 Underwriting standards, originator's expertise (Article 20(10))</b>		
<b>Similar exposures</b>		
22. For the purposes of Article 20(10) of Regulation (EU) 2017/2402, exposures should be considered to be similar when one of the following conditions is met:		
(a) the exposures belong to one of the following asset categories referred to in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402:		
(i) residential loans secured with one or several mortgages on residential immovable property, or residential loans fully guaranteed by an eligible protection provider among those referred to in		

Article 201(1) of Regulation (EU) No 575/2013 qualifying for credit quality step 2 or above as set out in Part Three, Title II, Chapter 2 of that regulation;

(ii) commercial loans secured with one or several mortgages on commercial immovable property or other commercial premises;

(iii) credit facilities provided to individuals for personal, family or household consumption purposes;

(iv) auto loans and leases;

(v) credit card receivables;

(vi) trade receivables;

(b) the exposures fall under the asset category of credit facilities provided to micro-, small-, medium-sized and other types of enterprises and corporates including loans and leases, as referred to in Article 2(d) of the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous in accordance with Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, as underlying exposures of a certain type of obligor;

(c) where they do not belong to any of the asset categories referred to in points (a) and (b) of this paragraph and as referred to in the Delegated Regulation further specifying which underlying exposures are deemed to be homogeneous for the purposes of Articles 20(8) and 24(15) of Regulation (EU) 2017/2402, the underlying exposures share similar characteristics with respect to the type of obligor, ranking of security rights, type of immovable property and/or jurisdiction.

***Criteria for determining the expertise of the originator or original lender***

34. For the purposes of determining whether an originator or original lender has expertise in originating exposures of a similar nature to those securitised in accordance with Article 20(10) of Regulation (EU) 2017/2402, both of the following should apply:

(a) the members of the management body of the originator or original lender and the senior staff, other than the members of the management body, responsible for managing the originating of exposures of a similar nature to those securitised should have adequate knowledge and skills in the origination of exposures of a similar nature to those securitised;

(b) any of the following principles on the quality of the expertise should be taken into account:

(i) the role and duties of the members of the management body and the senior staff and the required capabilities should be adequate;

(ii) the experience of the members of the management body and the senior staff gained in previous positions, education and training should be sufficient;

(iii) the involvement of the members of the management body and the senior staff within the governance structure of the function of originating the exposures should be appropriate;

(iv) in the case of a prudentially regulated entity, the regulatory authorisations or permissions held by the entity should be deemed relevant to origination of exposures of a similar nature to those securitised.

35. An originator or original lender should be deemed to have the required expertise when either of the following applies:

(a) the business of the entity, or of the consolidated group to which the entity belongs for accounting or prudential purposes, has included the originating of exposures similar to those securitised, for at least five years;

(b) where the requirement referred to in point (a) is not met, the originator or original lender should be deemed to have the required expertise where they comply with both of the following:

(i) at least two of the members of the management body have relevant professional experience in the origination of exposures similar to those securitised, at a personal level, of at least five years;

(ii) senior staff, other than members of the management body, who are responsible for managing the entity's originating of exposures similar to those securitised, have relevant professional experience in the origination of exposures of a similar nature to those securitised, at a personal level, of at least five years.

36. For the purposes of demonstrating the number of years of professional experience, the relevant expertise should be disclosed in sufficient detail and in accordance with the applicable confidentiality requirements to permit investors to carry out their obligations under Article 5(3)(c) of Regulation (EU) 2017/2402.

<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<b>No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))</b>	
39. The objective of the criterion in Article 20(11) is to ensure that STS securitisations are not characterised by underlying exposures whose credit risk has already been affected by certain negative events such as disputes with credit-impaired debtors or guarantors, debt restructuring processes or default events as identified by the EU prudential regulation. Risk analysis and due diligence assessments by investors become more complex whenever the securitisation includes exposures subject to certain ongoing negative credit risk developments. For the same reasons, STS securitisations should not include underlying exposures to credit-impaired debtors or guarantors that have an adverse credit history. In addition, significant risk of default normally rises as rating grades or other scores are assigned that indicate highly speculative credit quality and high likelihood of default, i.e. the possibility that the debtor or guarantor is not able to meet its obligations becomes a real possibility. Such exposures to credit-impaired debtors or guarantors should therefore also not be eligible for STS purposes.	
40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:	
(a) Interpretation of the term 'exposures in default': given the differences in interpretation of the term 'default', the interpretation of this criterion should refer to additional guidance on this term provided in the existing delegated regulations and guidelines developed by the EBA, while taking into account the limitation of scope of that additional guidance to certain types of institutions;	
<b>EBA Final non-ABCP STS Guidelines</b>	
<b>4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))</b>	
<b><i>Exposures in default</i></b>	
37. For the purposes of the first subparagraph of Article 20(11) of Regulation (EU) 2017/2402, the exposures in default should be interpreted in the meaning of Article 178(1) of Regulation (EU) 575/2013, as further specified by the Delegated Regulation on the materiality threshold for credit obligations past due developed in accordance with Article 178 of that Regulation, and by the EBA Guidelines on the application of the definition of default developed in accordance with Article 178(7) of that regulation.	
38. Where an originator or original lender is not an institution and is therefore not subject to Regulation (EU) 575/2013, the originator or original lender should comply with the guidance provided in the previous paragraph to the extent that such application is not deemed to be unduly burdensome. In that case, the originator or original lender should apply the established processes and the information obtained from debtors on origination of the exposures, information obtained from the originator in the course of its servicing of the exposures or in the course of its risk management procedure or information notified to the originator by a third party.

	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	<p>Section 7.2 (31)</p> <p>"as at the relevant Cut-Off Date, the Mortgage Receivable is not in default within the meaning of Article 178(1) of the CRR and the relevant Borrower is not a credit-impaired obligor or guarantor who, to the best of its knowledge, has been declared insolvent or had a court grant his creditors a final non-appealable right of enforcement or material damages as a result of a missed payment within three years prior to the date of origination or has undergone a debt-restructuring process with regard to his non-performing exposures within three years prior to the Closing Date, or in respect of a Further Advance Receivable or a Substitute Receivable, the relevant Notes Payment Date, or has a credit assessment or a credit score indicating that the risk of contractually agreed payments not being made is significantly higher than for comparable mortgage receivables originated by it which are not sold and assigned to the Issuer under the Mortgage Receivables Purchase Agreement, within the meaning of Article 20(11) of the EU Securitisation Regulation;"</p> <p>Although the text of the STS Regulation is quite vague, the EBA guidelines on defining "credit impaired" debtors are very helpful.</p> <p>For PCS, the key points of the EBA guidelines on this issue are:</p> <p>a. first that the three listed conditions of credit impaired status (set out in article 20.11 (a) to (c) of the Regulation) amount to a full definition of what it means to be "credit impaired". So that it is not necessary to reflect at what the term "credit impaired" could mean above and beyond those three items.</p> <p>b. Secondly, in relation to entries in a credit registry, the EBA is very clear that the criterion should not be interpreted as excluding debtors with any entry on a credit registry. Providing further guidance, the example given in the EBA Guidelines of a credit registry entry that would not be indicative of a "credit impaired" debtor is the example of a failure to pay that can "reasonably be ignored" for the purposes of credit assessment.</p> <p>Therefore, the criterion, to be met, does not require the elimination from the pool of all debtors with any negative entry in a credit registry but only those whose entries it would not be reasonable to ignore for the purposes of credit assessments.</p> <p>Absent any further clarification from the EBA or a national competent authority regarding what it is reasonable to ignore, a judgement would still be necessary in cases where the originator does include in the pool some debtors with some negative entries in a credit registry.</p> <p>In making this judgement, PCS takes comfort from the intent of the legislators – including, crucially, the legislators' belief that the STS Regulation was justified by the excellent performance of most "plain vanilla" European securitisation. It is clear to PCS that the "credit impaired" prohibition is driven by the desire of legislators to exclude from the STS category deals generally coming under the definition of "sub-prime". Therefore, it is unreasonable to refuse STS status to a transaction considered by universal consensus to be a "prime/plain vanilla" transaction with no "sub-prime" aspects. Indeed, this approach seems to be the rationale behind the EBA Guidelines on this matter.</p> <p>To determine whether this requirement is met, PCS has discussed this matter with the originator and uses its knowledge of the market and market stakeholders as well as the explicit statements made in the prospectus and transaction documentation.</p> <p>c. Thirdly, the EBA Guidelines on guaranteed obligations make it clear that the criterion is met so long as either the debtor or the guarantor are not "credit impaired".</p>	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	

**No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))**

39. The objective of the criterion in Article 20(11) is to ensure that STS securitisations are not characterised by underlying exposures whose credit risk has already been affected by certain negative events such as disputes with credit-impaired debtors or guarantors, debt-restructuring processes or default events as identified by the EU prudential regulation. Risk analysis and due diligence assessments by investors become more complex whenever the securitisation includes exposures subject to certain ongoing negative credit risk developments. For the same reasons, STS securitisations should not include underlying exposures to credit-impaired debtors or guarantors that have an adverse credit history. In addition, significant risk of default normally rises as rating grades or other scores are assigned that indicate highly speculative credit quality and high likelihood of default, i.e. the possibility that the debtor or guarantor is not able to meet its obligations becomes a real possibility. Such exposures to credit-impaired debtors or guarantors should therefore also not be eligible for STS purposes.

40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:

(b) Interpretation of the term 'exposures to a credit-impaired debtor or guarantor': the interpretation should also take into account the interpretation provided in recital 26 of Regulation (EU) 2017/2402, according to which the circumstances specified in points (a) to (c) of Article 24(9) of that regulation are understood as specific situations of credit-impairedness to which exposures in the STS securitisation may not be exposed. Consequently, other possible circumstances of credit-impairedness that are not captured in points (a) to (c) should be outside the scope of this requirement. Moreover, taking into account the role of the guarantor as a risk bearer, it should be clarified that the requirement to exclude 'exposures to a credit-impaired debtor or guarantor' is not meant to exclude (i) exposures to a credit-impaired debtor when it has a guarantor that is not credit impaired; or (ii) exposures to a non-credit-impaired debtor when there is a credit-impaired guarantor;

(c) Interpretation of the term 'to the best knowledge of': the interpretation should follow the wording of recital 26 of Regulation (EU) 2017/2402, according to which an originator or original lender is not required to take all legally possible steps to determine the debtor's credit status but is only required to take those steps that the originator/original lender usually takes within its activities in terms of origination, servicing, risk management and use of information that is received from third parties. This should not require the originator or original lender to check publicly available information, or to check entries in at least one credit registry where an originator or original lender does not conduct such checks within its regular activities in terms of origination, servicing, risk management and use of information received from third parties, but rather relies, for example, on other information that may include credit assessments provided by third parties. Such clarification is important because corporates that are not subject to EU financial sector regulation and that are acting as sellers with respect to STS securitisation may not always check entries in credit registries and, in line with the best knowledge standard, should not be obliged to perform additional checks at origination of any exposure for the purposes of later fulfilling this criterion in terms of any credit-impaired debtors or guarantors;

**EBA Final non-ABCP STS Guidelines**

**4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))**

***Exposures to a credit-impaired debtor or guarantor***

39. For the purposes of Article 20(11) of Regulation (EU) 2017/2402, the circumstances specified in points (a) to (c) of that paragraph should be understood as definitions of credit-impairedness. Other possible circumstances of credit-impairedness that are not captured in points (a) to (c) should be considered to be excluded from this requirement.

40. The prohibition of the selection and transfer to SSPE of underlying exposures 'to a credit-impaired debtor or guarantor' as referred to in Article 20(11) of Regulation (EU) 2017/2402 should be understood as the requirement that, at the time of selection, there should be a recourse for the full securitised exposure amount to at least one non-credit-impaired party, irrespective of whether that party is a debtor or a guarantor. Therefore, the underlying exposures should not include either of the following:

- (a) exposures to a credit-impaired debtor, when there is no guarantor for the full securitised exposure amount;
- (b) exposures to a credit-impaired debtor who has a credit-impaired guarantor.

***To the best of the originator's or original lender's knowledge***

41. For the purposes of Article 20(11) of Regulation (EU) 2017/2402, the 'best knowledge' standard should be considered to be fulfilled on the basis of information obtained only from any of the following combinations of sources and circumstances:

- (a) debtors on origination of the exposures;
- (b) the originator in the course of its servicing of the exposures or in the course of its risk management procedures;
- (c) notifications to the originator by a third party;
- (d) publicly available information or information on any entries in one or more credit registries of persons with adverse credit history at the time of origination of an underlying exposure, only to the extent that this information had already been taken into account in the context of (a), (b) and (c), and in accordance with the applicable regulatory and supervisory requirements, including with respect

	to sound credit granting criteria as specified in Article 9 of Regulation (EU) 2017/2402. This is with the exception of trade receivables that are not originated in the form of a loan, with respect to which credit-granting criteria do not need to be met.

<p>Section 7.2 (31)</p> <p>"as at the relevant Cut-Off Date, the Mortgage Receivable is not in default within the meaning of Article 178(1) of the CRR and the relevant Borrower is not a credit-impaired obligor or guarantor who, to the best of its knowledge, has been declared insolvent or had a court grant his creditors a final non-appealable right of enforcement or material damages as a result of a missed payment within three years prior to the date of origination or has undergone a debt-restructuring process with regard to his non-performing exposures within three years prior to the Closing Date, or in respect of a Further Advance Receivable or a Substitute Receivable, the relevant Notes Payment Date, or has a credit assessment or a credit score indicating that the risk of contractually agreed payments not being made is significantly higher than for comparable mortgage receivables originated by it which are not sold and assigned to the Issuer under the Mortgage Receivables Purchase Agreement, within the meaning of Article 20(11) of the EU Securitisation Regulation"</p>	
<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	

**No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))**

40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:

(d) Interpretation of the criterion with respect to the debtors and guarantors found on the credit registry: it is important to interpret this requirement in a narrow sense to ensure that the existence of a debtor or guarantor on the credit registry of persons with adverse credit history should not automatically exclude the exposure to that debtor/guarantor from compliance with this criterion. It is understood that this criterion should relate only to debtors and guarantors that are, at the time of origination of the exposure, considered entities with adverse credit history. Existence on a credit registry at the time of origination of the exposure for reasons that can be reasonably ignored for the purposes of the credit risk assessment (for example due to missed payments which have been resolved in the next two payment periods) should not be captured by this requirement. Therefore, this criterion should not automatically exclude from the STS framework exposures to all entities that are on the credit registries, taking into account that this would unintentionally exclude a significant number of entities given that different practices exist across EU jurisdictions with respect to entry requirements of such credit registries, and the fact that credit registries in some jurisdictions may contain both positive and negative information about the clients;

**EBA Final non-ABCP STS Guidelines****4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))*****Exposures to credit-impaired debtors or guarantors that have undergone a debt-restructuring process***

42. For the purposes of Article 20(11)(a) of Regulation (EU) 2017/2402, the requirement to exclude exposures to credit-impaired debtors or guarantors who have undergone a debt-restructuring process with regard to their non-performing exposures should be understood to refer to both the restructured exposures of the respective debtor or guarantor and those of its exposures that were not themselves subject to restructuring. For the purposes of this Article, restructured exposures which meet the conditions of points (i) and (ii) of that Article should not result in a debtor or guarantor becoming designated as credit-impaired.

**No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))**

40. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:

(e) Interpretation of the term 'significantly higher risk of contractually agreed payments not being made for comparable exposures': the term should be interpreted with a similar meaning to the requirement aiming to prevent adverse selection of assets referred to in Article 6(2) of Regulation (EU) 2017/2402, and further specified in the Article 16(2) of the Delegated Regulation specifying in greater detail the risk retention requirement in accordance with Article 6(7) of Regulation (EU) 2017/2402, given that in both cases the requirement (i) aims to prevent adverse selection of underlying exposures and (ii) relates to the comparison of the credit quality of exposures transferred to the SSPE and comparable exposures that remain on the originator's balance sheet. To facilitate the interpretation, a list is given of examples of how to achieve compliance with the requirement.

**EBA Final non-ABCP STS Guidelines****4.5 No exposures in default and to credit-impaired debtors/guarantors (Article 20(11))*****Risk of contractually agreed payments not being made being significantly higher than for comparable exposures***

44. For the purposes of Article 20(11)(c) of Regulation (EU) 2017/2402, the exposures should not be considered to have a 'credit assessment of a credit score indicating that the risk of contractually agreed payments not being made is significantly higher than for comparable exposures held by the originator which are not securitised' when the following conditions apply:

- (a) the most relevant factors determining the expected performance of the underlying exposures are similar;
- (b) as a result of the similarity referred to in point (a) it could reasonably have been expected, on the basis of indications such as past performance or applicable models, that, over the life of the transaction or over a maximum of four years, where the life of the transaction is longer than four years, their performance would not be significantly different.

45. The requirement in the previous paragraph should be considered to have been met where either of the following applies:

- (a) the underlying exposures do not include exposures that are classified as doubtful, impaired, non-performing or classified to the similar effect under the relevant accounting principles;
- (b) the underlying exposures do not include exposures whose credit quality, based on credit ratings or other credit quality thresholds, significantly differs from the credit quality of comparable exposures that the originator originates in the course of its standard lending operations and credit risk strategy.

<b>31</b>	<b>Legislative text</b>	
	<b>Article 20 - Requirements relating to simplicity</b>	
	20.12. The debtors shall at the time of transfer of the exposures, have made at least one payment, except in the case of revolving securitisations backed by exposures payable in a single instalment or having a maturity of less than one year, including without limitation monthly payments on revolving credits.	
	<b>STS criteria</b>	
	31. The debtors shall at the time of transfer of the exposures, have made at least one payment, except in the case of revolving securitisations backed by exposures payable in a single instalment or having a maturity of less than one year, including without limitation monthly payments on revolving credits.	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	Section 7.3 (n) "in respect of each Mortgage Loan at least one (interest) payment has been received prior to the date the related Mortgage Receivable is sold and assigned by the Seller to the Issuer;	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>At least one payment made (Article 20(12))</b>	
41. STS securitisations should minimise the extent to which investors are required to analyse and assess fraud and operational risk. At least one payment should therefore be made by each underlying borrower at the time of transfer, since this reduces the likelihood of the loan being subject to fraud or operational issues, unless in the case of revolving securitisations in which the distribution of securitised exposures is subject to constant changes because the securitisation relates to exposures payable in a single instalment or with an initial legal maturity of an exposure of below one year.		
42. To facilitate consistent interpretation of this criterion, its scope and the types of payments referred to therein should be further clarified.		
<b>EBA Final non-ABCP STS Guidelines</b>		
<b>4.6 At least one payment made (Article 20(12))</b>		
<b>Scope of the criterion</b>		
46. For the purposes of Article 20(12) of Regulation (EU) 2017/2402, further advances in terms of an exposure to a certain borrower should not be deemed to trigger a new 'at least one payment' requirement with respect to such an exposure.		
<b>At least one payment</b>		
47. For the purposes of Article 20(12) of Regulation (EU) 2017/2402, the payment referred to in the requirement according to which 'at least one payment' should have been made at the time of transfer should be a rental, principal or interest payment or any other kind of payment.		

<b>32</b>	<p><b>Legislative text</b></p> <p><b>Article 20 - Requirements relating to simplicity</b></p> <p>20.13. The repayment of the holders of the securitisation positions shall not have been structured to depend predominantly on the sale of assets securing the underlying exposures. This shall not prevent such assets from being subsequently rolled-over or refinanced.</p> <p>The repayment of the holders of the securitisation positions whose underlying exposures are secured by assets the value of which is guaranteed or fully mitigated by a repurchase obligation by the seller of the assets securing the underlying exposures or by another third party shall not be considered to depend on the sale of assets securing those underlying exposures.</p>
<b>STS criteria</b>	
32. The repayment of the holders of the securitisation positions shall not have been structured to depend predominantly on the sale of assets securing the underlying exposures.	
<b>Verified?</b>	Yes
<b>PCS Comment</b>	
<p>STS Statements (k). Also. reference to Section 6.2 Description of Mortgage Loans.</p> <p><b><i>Although there was some uncertainty over the status of interest-only mortgages, this has been definitively cleared up by the EBA Guidelines specific statement that this criterion was not designed to capture these products.</i></b></p> <p><b><i>Accordingly, none of the assets in the pool display any predominant reliance on the sale of the assets.</i></b></p>	
<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<p><b>No predominant dependence on the sale of assets (Article 20(13))</b></p> <p>43. Dependence of the repayment of the holders of the securitisation positions on the sale of assets securing the underlying exposures increases the liquidity risks, market risks and maturity transformation risks to which the securitisation is exposed. It also makes the credit risk of the securitisation more difficult for investors to model and assess.</p> <p>44. The objective of this criterion is to ensure that the repayment of the principal balance of exposures at the contract maturity – and therefore repayment of the holders of the securitisation positions – is not intended to be predominantly reliant on the sale of assets securing the underlying exposures, unless the value of the assets is guaranteed or fully mitigated by a repurchase obligation.</p> <p>45. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the term 'predominant dependence' on the sale of assets securing the underlying exposures should be further interpreted:</p> <p>(i) when assessing whether the repayment of the holders of the securitisation positions is or is not predominantly dependent on the sale of assets, the following three aspects should be taken into account: (i) the principal balance at contract maturity of underlying exposures that depend on the sale of assets securing those underlying exposures to repay the balance; (ii) the distribution of maturities of such exposures across the life of the transaction, which aims to reduce the risk of correlated defaults due to idiosyncratic shocks; and (iii) the granularity of the pool of exposures, which aims to promote sufficient distribution in sale dates and other characteristics that may affect the sale of the underlying exposures.</p> <p>(i) no types of securitisations should be excluded ex ante from the compliance with this criterion and from the STS securitisation as long as they meet all the requirements specified in the guidance. For example, this criterion does not aim to exclude leasing transactions and interest-only residential mortgages from STS securitisation, provided they comply with the guidance provided and all other applicable STS requirements. However, it is expected that commercial real estate transactions, or securitisations where the assets are commodities (e.g. oil, grain, gold), or bonds whose maturity dates fall after the maturity date of the securitisation, would not meet these requirements, as in all these cases it is expected that the repayment is predominantly reliant on the sale of the assets, that other possible ways to repay the securitisation positions are substantially limited, and that the granularity of the portfolio is low.</p> <p>46. With respect to the exemption provided in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402, it should be ensured that the entity providing the guarantee or the repurchase obligation of the assets securing the underlying exposures is not an empty-shell or defaulted entity, so that it has sufficient loss absorbency to exercise the guarantee of the repurchase of the assets.</p>	

## **EBA Final non-ABCP STS Guidelines**

### **4.7 No Predominant dependence on the sale of assets**

#### ***Predominant dependence on the sale of assets***

48. For the purposes of Article 20(13) of Regulation (EU) 2017/2402, transactions where all of the following conditions apply, at the time of origination of the securitisation in cases of amortising securitisation or during the revolving period in cases of revolving securitisation, should be considered not predominantly dependent on the sale of assets securing the underlying exposures, and therefore allowed:

- (a) the contractually agreed outstanding principal balance, at contract maturity of the underlying exposures that depend on the sale of the assets securing those underlying exposures to repay the principal balance, corresponds to no more than 50% of the total initial exposure value of all securitisation positions of the securitisation;
- (b) the maturities of the underlying exposures referred to in point (a) are not subject to material concentrations and are sufficiently distributed across the life of the transaction;
- (c) the aggregate exposure value of all the underlying exposures referred to in point (a) to a single obligor does not exceed 2% of the aggregate exposure value of all underlying exposures in the securitisation.

49. Where there are no underlying exposures in the securitisation that depend on the sale of assets to repay their outstanding principal balance at contract maturity, the requirements in paragraph 48 should not apply.

#### ***Exemption provided in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402***

50. The exemption referred to in the second subparagraph of Article 20(13) of Regulation (EU) 2017/2402 with regard to the repayment of holders of securitisation positions whose underlying exposures are secured by assets, the value of which is guaranteed or fully mitigated by a repurchase obligation of either the assets securing the underlying exposures or of the underlying exposures themselves by another third party or parties, the seller or the third parties should meet both of the following conditions:

- (a) they are not insolvent;
- (b) there is no reason to believe that the entity would not be able to meet its obligations under the guarantee or the repurchase obligation.

<b>Verified?</b>	Yes
<b>PCS Comment</b>	
<p>See STS Statement (I), 1.4. RISKS RELATING TO INTEREST RATE RISK AND HEDGING, 5.4 Hedging and due diligence materials received.</p> <p>Clearly and explicitly, “appropriate” hedging does not require “perfect” hedging. This is confirmed by the EBA Guidelines which require the hedges to cover a “major share” of the risk from an “economic perspective”. However, the definition of “appropriate” hedging or a “major share” of the risk will always contain an element of subjectivity and must be analysed on a case by case basis.</p> <p>The fact that the Regulation was crafted by the legislators to recognise existing high-quality European securitisations rather than raise the bar to a level not previously encountered, together with the common-sense approach of the EBA, leads to the conclusion that transactions considered adequately hedges by common investor and rating agency consensus should be held to meet this criterion.</p> <p>This still requires an analysis of the matter. Since PCS is not a quantitative analysis provider or a credit rating agency, our verification is based on a second-hand analysis which focuses on:</p> <ul style="list-style-type: none"> <li>- A statement in the Prospectus or other document setting out the boundary conditions of the hedging. This should state in effect how far the hedging stretches and under what scenario's it will break. For example, if interbank rates rise above X%. This will provide a common-sense feel for whether, at first glance, the hedging is reasonable.</li> <li>- Risk Factors section of the prospectus to check that no statements refer to the risks of “unhedged positions”. This is based on the legal requirement to disclose any relevant information to investors. If the originator or its advisers believed that the hedging in a transaction was unusually light, this should be disclosed in the Risk Section.</li> <li>- The “pre-sale” report from a recognised credit rating agency (if used) so as to identify any issues with hedging. Again, rating agencies as credit specialists should highlight in their analysis any substantial and unusual hedging risks.”.</li> </ul> <p>In the case of the Transaction, interest rate risks are partly hedged to the first optional redemption date due to the interest rate cap. Post the first optional redemption date, the potential mismatch between the interest received on the Mortgage Loans and the interest due on the Class A Notes is mitigated by a combination of factors including the subordination (but above the Class B Notes) of Class A interest above a certain percentage, the quantum of the Class B and C Notes.. This risk is further partly mitigated by the Issuer being able to use (i) excess spread (if any), (ii) the Reserve Fund, (iii) drawings under the Cash Advance Facility Agreement and (iv) Available Principal Funds, to the extent available after payment of higher ranking items in the relevant Priorities of Payments, for the payment of interest payable on the Class A Notes.</p> <p>Currency hedging is not relevant as all assets and liabilities are denominated in Euros.</p>	
<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<b>Appropriate mitigation of interest-rate and currency risks (Article 21 (2))</b>	
49. The objective of this criterion is to reduce any payment risk arising from different interest-rate and currency profiles of assets and liabilities. Mitigating or hedging interest-rate and currency risks arising in the transaction enhances the simplicity of the transaction, since it helps investors to model those risks and their impact on the credit risk of the securitisation investment.	
50. It should be clarified that hedging (through derivative instruments) is only one possible way of addressing the risks mentioned. Whichever measure is applied for the risk mitigation, it should, however, be subject to specific conditions so that it can be considered to appropriately mitigate the risks mentioned.	
51. One of these conditions aims to prohibit derivatives that do not serve the purpose of hedging interest-rate or currency risk from being included in the pool of underlying exposures or entered into by the SSPE, given that derivatives add to the complexity of the transaction and to the complexity of the risk and due diligence analysis to be carried out by the investor. Derivatives hedging interest-rate or currency risk enhance the simplicity of the transaction, since hedged transactions do not require investors to engage in the modelling of currency and interest-rate risks.	
52. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:	

- (a) conditions that the measures should comply with so that they can be considered to appropriately mitigate the interest-rate and currency risks;
- (b) clarification with respect to the scope of derivatives that should and should not be captured by this criterion;
- (c) clarification of the term 'common standards in international finance'.

#### **EBA Final non-ABCP STS Guidelines**

##### **5.1 Appropriate mitigation of interest-rate and currency risks (Article 21(2))**

###### ***Appropriate mitigation of interest-rate and currency risks***

51. For the purposes of Article 21(2) of Regulation (EU) 2017/2402 in order for the interest-rate and currency risks arising from the securitisation to be considered 'appropriately mitigated', it should be sufficient that a hedge or mitigation is in place, on condition that it is not unusually limited with the effect that it covers a major share of the respective interest-rate or currency risks under relevant scenarios, understood from an economic perspective. Such a mitigation may also be in the form of derivatives or other mitigating measures including reserve funds, over collateralisation, excess spread or other measures.

52. Where the appropriate mitigation of interest-rate and currency risks is carried out through derivatives, all of the following requirements should apply:

- (a) the derivatives should be used only for genuine hedging of asset and liability mismatches of interest rates and currencies, and should not be used for speculative purposes;
- (b) the derivatives should be based on commonly accepted documentation, including International Swaps or Derivatives Association (ISDA) or similar established national documentation standards;
- (c) the derivative documentation should provide, in the event of the loss of sufficient creditworthiness of the counterparty below a certain level, measured either on the basis of the credit rating or otherwise, that the counterparty is subject to collateralisation requirements or makes a reasonable effort for its replacement or guarantee by another counterparty.

53. Where the mitigation of interest-rate and currency risks referred to in Article 21(2) of Regulation (EU) 2017/2402 is carried out not through derivatives but by other risk-mitigating measures, those measures should be designed to be sufficiently robust. When such risk-mitigating measures are used to mitigate multiple risks at the same time, the disclosure required by Article 21(2) of Regulation (EU) 2017/2402 should include an explanation of how the measures hedge the interest-rate risks and currency risks on one hand, and other risks on the other hand.

40. Any referenced interest payments under the securitisation assets and liabilities shall be based on generally used market interest rates, or generally used sectoral rates reflective of the cost of funds and shall not reference complex formulae or derivatives.	
<b>Verified?</b>	Yes
<b>PCS Comment</b>	
<p>STS Statement (m).</p> <p>Assets: Section 6.2 Description of Mortgage Loans.</p> <p>Liabilities: 4.1, Terms and Conditions, Euribor Conditions 4 (c).</p>	
<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<b>Referenced interest payments (Article 21 (3))</b>	
<p>53. The objective of this criterion is to prevent securitisations from making reference to interest rates that cannot be observed in the commonly accepted market practice. The credit risk and cash flow analysis that investors must be able to carry out should not involve atypical, complex or complicated rates or variables that cannot be modelled on the basis of market experience and practice.</p> <p>54. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:</p> <p>(a) the scope of the criterion (by specifying the common types and examples of interest rates captured by this criterion);</p> <p>(b) the term ‘complex formulae or derivatives’.</p>	
<b>EBA Final non-ABCP STS Guidelines</b>	
<b>5.2 Referenced interest payments (Article 21 (3))</b>	
<b>Referenced rates</b>	
<p>57. For the purposes of Article 21(3) of Regulation (EU) 2017/2402, interest rates that should be considered to be an adequate reference basis for referenced interest payments should include all of the following:</p> <p>(a) interbank rates including the Libor, Euribor and other recognised benchmarks;</p> <p>(b) rates set by monetary policy authorities, including FED funds rates and central banks’ discount rates;</p> <p>(c) sectoral rates reflective of a lender’s cost of funds, including standard variable rates and internal interest rates that directly reflect the market costs of funding of a bank or a subset of institutions, to the extent that sufficient data are provided to investors to allow them to assess the relation of the sectoral rates to other market rates.</p>	
<b>Complex formulae or derivatives</b>	
<p>58. For the purposes of Article 21(3) of Regulation (EU) 2017/2402, a formula should be considered to be complex when it meets the definition of an exotic instrument by the Global Association of Risk Professionals (GARP), which is a financial asset or instrument with features that make it more complex than simpler, plain vanilla, products. A complex formula or derivative should not be deemed to exist in the case of the mere use of interest-rate caps or floors.</p>	

<b>41</b>	<p><b>Legislative text</b></p> <p><b>Article 21 - Requirements relating to standardisation</b></p> <p>21.4. <b>Verified?</b>	Yes		
	<p><b>PCS Comment</b></p> <p>STS Statements (n).</p> <p>"for the purpose of compliance with Article 21(4) of the EU Securitisation Regulation, after the delivery of an Enforcement Notice, no amount of cash is trapped in the Issuer in accordance with the Transaction Documents and the Notes will amortise sequentially (see also section 5 (<i>Credit Structure</i>) and in particular section 5.2 (<i>Priorities of Payments</i>) and no automatic liquidation for market value of the Mortgage Receivables is required under the Transaction Documents (see also Conditions 10 (<i>Event of Default</i>) and 11 (<i>Enforcement</i>) and section 7.1 (<i>Purchase, Repurchase an Sale</i>));"</p> <p>There is no cash trapping.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b></p> <p><b>Requirements in case of enforcement or delivery of an acceleration notice (Article 21(4))</b></p> <p>55. The objective of this criterion is to prevent investors from being subjected to unexpected repayment profiles and to provide appropriate legal comfort regarding their enforceability, for instances where an enforcement or an acceleration notice has been delivered.</p> <p>56. STS securitisations should be such that the required investor's risk analysis and due diligence do not have to factor in complex structures of the payment priority that are difficult to model, nor should the investor be exposed to complex changes in such structures throughout the life of the transaction. Therefore, it should be ensured that junior noteholders do not have inappropriate payment preference over senior noteholders that are due and payable.</p> <p>57. In addition, taking into account that market risk on the underlying collateral constitutes an element of complexity in the risk and due diligence analysis to be carried out by investors, the objective is also to ensure that the performance of STS securitisations does not rely, due to contractual triggers, on the automatic liquidation at market price of the underlying collateral.</p> <p>58. To facilitate consistent interpretation of this criterion, the scope and operational functioning of conditions specified under letters (a), (b) and (d) of Article 21(4) should be specified further.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines</b></p> <p><b>5.3 Requirements in the event of enforcement or delivery of an acceleration notice (Article 21(4))</b></p> <p><b>Exceptional circumstances</b></p> <p>59. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, a list of 'exceptional circumstances' should, to the extent possible, be included in the transaction documentation.</p>		

60. Given the nature of 'exceptional circumstances' and in order to allow some flexibility with respect to potential unusual circumstances requiring that cash be trapped in the SSPE in the best interests of investors, where a list of 'exceptional circumstances' is included in the transaction documentation in accordance with paragraph 59, such a list should be non-exhaustive.

***Amount trapped in the SSPE in the best interests of investors***

61. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, the amount of cash to be considered as trapped in the SSPE should be that agreed by the trustee or other representative of the investors who is legally required to act in the best interests of the investors, or by the investors in accordance with the voting provisions set out in the transaction documentation.

62. For the purposes of Article 21(4)(a) of Regulation (EU) 2017/2402, it should be permissible to trap the cash in the SSPE in the form of a reserve fund for future use, as long as the use of the reserve fund is exclusively limited to the purposes set out in Article 21(4)(a) of Regulation (EU) 2017/2402 or to orderly repayment to the investors.

<b>42</b>	<b>Legislative text</b>	
	<b>Article 21 - Requirements relating to standardisation</b>	
	<p>21.4. Where an enforcement or an acceleration notice has been delivered:</p> <p>(a) no amount of cash shall be trapped in the SSPE beyond what is necessary to ensure the operational functioning of the SSPE or the orderly repayment of investors in accordance with the contractual terms of the securitisation, unless exceptional circumstances require that amount is trapped in order to be used, in the best interests of investors, for expenses in order to avoid the deterioration in the credit quality of the underlying exposures;</p> <p>(b) Principal receipts from the underlying exposures shall be passed to investors via sequential amortisation of the securitisation positions, as determined by the seniority of the securitisation position;</p>	
	<b>STS criteria</b>	
	42. Principal receipts from the underlying exposures shall be passed to investors via sequential amortisation of the securitisation positions, as determined by the seniority of the securitisation position;	
	<b>Verified?</b>	Yes
	<b>PCS Comment</b>	
	<p>STS Statements (n).</p> <p>"for the purpose of compliance with Article 21(4) of the EU Securitisation Regulation, after the delivery of an Enforcement Notice, no amount of cash is trapped in the Issuer in accordance with the Transaction Documents and the Notes will amortise sequentially (see also section 5 (<i>Credit Structure</i>) and in particular section 5.2 (<i>Priorities of Payments</i>) and no automatic liquidation for market value of the Mortgage Receivables is required under the Transaction Documents (see also Conditions 10 (<i>Event of Default</i>) and 11 (<i>Enforcement</i>) and section 7.1 (<i>Purchase, Repurchase an Sale</i>));"</p>	
	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>Requirements in case of enforcement or delivery of an acceleration notice (Article 21(4))</b>	
	<p>55. The objective of this criterion is to prevent investors from being subjected to unexpected repayment profiles and to provide appropriate legal comfort regarding their enforceability, for instances where an enforcement or an acceleration notice has been delivered.</p> <p>56. STS securitisations should be such that the required investor's risk analysis and due diligence do not have to factor in complex structures of the payment priority that are difficult to model, nor should the investor be exposed to complex changes in such structures throughout the life of the transaction. Therefore, it should be ensured that junior noteholders do not have inappropriate payment preference over senior noteholders that are due and payable.</p> <p>57. In addition, taking into account that market risk on the underlying collateral constitutes an element of complexity in the risk and due diligence analysis to be carried out by investors, the objective is also to ensure that the performance of STS securitisations does not rely, due to contractual triggers, on the automatic liquidation at market price of the underlying collateral.</p> <p>58. To facilitate consistent interpretation of this criterion, the scope and operational functioning of conditions specified under letters (a), (b) and (d) of Article 21(4) should be specified further.</p>	
	<b>EBA Final non-ABCP STS Guidelines</b>	
	<b>5.3 Requirements in the event of enforcement or delivery of an acceleration notice (Article 21(4))</b>	
	<b>Repayment</b>	
	63. The requirements in Article 21(4)(b) of Regulation (EU) 2017/2402 should be understood as covering only the repayment of the principal, without covering the repayment of interest.	

	64. For the purposes of Article 21(4)(b) of Regulation (EU) 2017/2402, non-sequential payments of principal in a situation where an enforcement or an acceleration notice has been delivered should be prohibited. Where there is no enforcement or acceleration event, principal receipts could be allowed for replenishment purposes pursuant to Article 20(12) of that Regulation.

<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
<b>EBA Final non-ABCP STS Guidelines</b>	
<b>5.3 Requirements in the event of enforcement or delivery of an acceleration notice (Article 21(4))</b>	
<b><i>Liquidation of the underlying exposures at market value</i></b>	
65. For the purposes of Article 21(4)(d) of Regulation (EU) 2017/2402, the investors' decision to liquidate the underlying exposures at market value should not be considered to constitute an automatic liquidation of the underlying exposures at market value.	

<b>45</b>	<p><b>Legislative text</b></p> <p><b>Article 21 - Requirements relating to standardisation</b></p> <p>21.5. Transactions which feature non-sequential priority of payments shall include triggers relating to the performance of the underlying exposures resulting in the priority of payments reverting to sequential payments in order of seniority. Such performance-related triggers shall include at least the deterioration in the credit quality of the underlying exposures below a pre-determined threshold.</p>
<p><b>STS criteria</b></p> <p>45. Transactions which feature non-sequential priority of payments shall include triggers relating to the performance of the underlying exposures resulting in the priority of payments reverting to sequential payments in order of seniority. Such performance-related triggers shall include at least the deterioration in the credit quality of the underlying exposures below a pre-determined threshold.</p>	
<p><b>Verified?</b></p> <p style="text-align: right;">Yes</p>	
<p><b>PCS Comment</b></p> <p>Not applicable as transaction is sequential pay. The Notes will amortise sequentially (see also section 5 <i>Credit Structure</i> particularly section 5.2. <i>Priority of Payments</i>).</p> <p>The first step in analysing this criterion is to determine whether the transaction features non-sequential priorities of payment.</p> <p>The Transaction does not have such non-sequential priorities and so no examination of triggers is required.</p>	
<p><b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b></p>	
<p><b>Non-sequential priority of payments (Article 21(5))</b></p> <p>59. The objective of this criterion is to ensure that non-sequential (pro rata) amortisation should be used only in conjunction with clearly specified contractual triggers that determine the switch of the amortisation scheme to a sequential priority, safeguarding the transaction from the possibility that credit enhancement is too quickly amortised as the credit quality of the transaction deteriorates, thereby exposing senior investors to a decreasing amount of credit enhancement.</p> <p>60. To facilitate consistent interpretation of this criterion, a non-exhaustive list of examples of performance-related triggers that may be included is provided in the guidance.</p>	
<p><b>EBA Final non-ABCP STS Guidelines</b></p>	
<p><b>5.4 Non-sequential priority of payments (Article 21(5))</b></p> <p><b>Performance-related triggers</b></p> <p>66. For the purposes of Article 21(5) of Regulation (EU) 2017/2402, the triggers related to the deterioration in the credit quality of the underlying exposures may include the following:</p> <p>(a) with regard to underlying exposures for which a regulatory expected loss (EL) can be determined in accordance with Regulation (EU) 575/2013 or other relevant EU regulation, cumulative losses that are higher than a certain percentage of the regulatory one-year EL on the underlying exposures and the weighted average life of the transaction;</p> <p>(b) cumulative non-matured defaults that are higher than a certain percentage of the sum of the outstanding nominal amount of tranche held by the investors and the tranches that are subordinated to them;</p> <p>(c) the weighted average credit quality in the portfolio decreasing below a given pre-specified level or the concentration of exposures in high credit risk (probability of default) buckets increasing above a pre-specified level.</p>

	<b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b>	
	<b>Expertise of the Servicer (Article 21 (8))</b>	
	65. The objective of this criterion is to ensure that all the conditions are in place for the proper functioning of the servicing function, taking into account the crucial importance of servicing in securitisation and the central nature of this function within any securitisation transaction.	
	66. To facilitate consistent interpretation of this criterion, the following aspects should be further clarified:	
	(a) criteria for determining the expertise of the servicer;	
	(b) criteria for determining well-documented and adequate policies, procedures and risk management controls of the servicer.	
	67. The criteria for the expertise of the servicer should correspond to those for the expertise of the originator or the original lender. Newly established entities should be allowed to perform the tasks of servicing, as long as the back-up servicer has the appropriate experience. It is expected that information on the assessment of the expertise is provided in sufficient detail in the STS notification.	
	<b>EBA Final non-ABCP STS Guidelines</b>	
	<b>5.8 Expertise of the servicer (Article 21 (8))</b>	
	<b>Criteria for determining the expertise of the servicer</b>	
	68. For the purposes of determining whether a servicer has expertise in servicing exposures of a similar nature to those securitised in accordance with Article 21(8) of Regulation (EU) 2017/2402, both of the following should apply:	

- (a) the members of the management body of the servicer and the senior staff, other than members of the management body, responsible for servicing exposures of a similar nature to those securitised should have adequate knowledge and skills in the servicing of exposures similar to those securitised;
- (b) any of the following principles on the quality of the expertise should be taken into account in the determination of the expertise:
- (i) the role and duties of the members of the management body and the senior staff and the required capabilities should be adequate;
  - (ii) the experience of the members of the management body and the senior staff gained in previous positions, education and training should be sufficient;
  - (iii) the involvement of the members of the management body and the senior staff within the governance structure of the function of servicing the exposures should be appropriate;
  - (iv) in the case of a prudentially regulated entity, the regulatory authorisations or permissions held by the entity should be deemed relevant to the servicing of similar exposures to those securitised.

69. A servicer should be deemed to have the required expertise where either of the following applies:

- (a) the business of the entity, or of the consolidated group, to which the entity belongs, for accounting or prudential purposes, has included the servicing of exposures of a similar nature to those securitised, for at least five years;
- (b) where the requirement referred to in point (a) is not met, the servicer should be deemed to have the required expertise where they comply with both of the following:
  - (i) at least two of the members of its management body have relevant professional experience in the servicing of exposures of a similar nature to those securitised, at personal level, of at least five years;
  - (ii) senior staff, other than members of the management body, who are responsible for managing the entity's servicing of exposures of a similar nature to those securitised, have relevant professional experience in the servicing of exposures of a similar nature to those securitised, at a personal level, of at least five years;
  - (iii) the servicing function of the entity is backed by the back-up servicer compliant with point (a).

70. For the purpose of demonstrating the number of years of professional experience, the relevant expertise should be disclosed in sufficient detail and in accordance with the applicable confidentiality requirements to permit investors to carry out their obligations under Article 5(3)(c) of Regulation (EU) 2017/2402.

***Exposures of similar nature***

71. For the purposes of Article 21(8) of Regulation (EU) 2017/2402, interpretation of the term 'exposures of similar nature' should follow the interpretation provided in paragraph 23 above.

<b>55</b>	<b>Legislative text</b>	
	<b>Article 21 - Requirements relating to standardisation</b>	
	21.8. The servicer shall have expertise in servicing exposures of a similar nature to those securitised and shall have well documented and adequate policies, procedures and risk management controls relating to the servicing of exposures.	
	<b>STS criteria</b>	
	55. And shall have well documented and adequate policies, procedures and risk management controls relating to the servicing of exposures.

	<b>Expertise of the Servicer (Article 21 (8))</b>	
	<b><i>Well-documented and adequate policies, procedures and risk management controls</i></b>	
	72. For the purposes of Article 21(8) of Regulation (EU) 2017/2402, the servicer should be considered to have well documented and adequate policies, procedures and risk management controls relating to servicing of exposures' where either of the following conditions is met:	
	(a) The servicer is an entity that is subject to prudential and capital regulation and supervision in the Union and such regulatory authorisations or permissions are deemed relevant to the servicing;	
	(b) The servicer is an entity that is not subject to prudential and capital regulation and supervision in the Union, and a proof of existence of well-documented and adequate policies and risk management controls is provided that also includes a proof of adherence to good market practices and reporting capabilities. The proof should be substantiated by an appropriate third party review, such as by a credit rating agency or external auditor.

<b>Sample of the underlying exposures subject to external verification</b>		
78. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, the underlying exposures that should be subject to verification prior to the issuance should be a representative sample of the provisional portfolio from which the securitised pool is extracted and which is in a reasonably final form before issuance.		
<b>Party executing the verification</b>		
79. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, an appropriate and independent party should be deemed to be a party that meets both of the following conditions:		
(a) it has the experience and capability to carry out the verification;		
(b) it is none of the following:		

- (i) a credit rating agency;
- (ii) a third party verifying STS compliance in accordance with Article 28 of Regulation (EU) 2017/2402;
- (iii) an entity affiliated to the originator.

***Scope of the verification***

80. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, the verification to be carried out based on the representative sample, applying a confidence level of at least 95%, should include both of the following:

- (a) verification of the compliance of the underlying exposures in the provisional portfolio with the eligibility criteria that are able to be tested prior to issuance;
- (b) verification of the fact that the data disclosed to investors in any formal offering document in respect of the underlying exposures is accurate.

***Confirmation of the verification***

81. For the purposes of Article 22(2) of Regulation (EU) 2017/2402, confirmation that this verification has occurred and that no significant adverse findings have been found should be disclosed.

<b>69</b>	<p><b>Legislative text</b></p> <p><b>Article 22 - Requirements relating to transparency</b></p> <p>22.3. The originator or the sponsor shall, before the pricing of the securitisation, make available to potential investors a liability cash flow model which precisely represents the contractual relationship between the underlying exposures and the payments flowing between the originator, sponsor, investors, other third parties and the SSPE, and shall, after pricing, make that model available to investors on an ongoing basis and to potential investors upon request.</p>		
	<p><b>STS criteria</b></p> <p>69. The originator or the sponsor shall, before the pricing of the securitisation, make available to potential investors a liability cash flow model which precisely represents the contractual relationship between the underlying exposures and the payments flowing between the originator, sponsor, investors, other third parties and the SSPE.</p>		
	<table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><b>Verified?</b></td> <td style="text-align: center;">Yes</td> </tr> </table>	<b>Verified?</b>	Yes
<b>Verified?</b>	Yes		
	<p><b>PCS Comment</b></p> <p>See Section 4.4. Disclosure Requirements second paragraph (c) and also see 8. General (13) – undertaking to provide liability cash flow model pre and post pricing.</p> <p>The criterion requires an accurate liability model to be circulated to prospective investors pre-pricing.</p> <p>To verify this criterion, PCS will require to see the model. It will then require a statement by the originator that the model was circulated as required by the criterion.</p> <p>PCS is not a modelling firm nor has any modelling expertise. Therefore, it will not verify the model's accuracy or perform any due diligence whatsoever on the model. However, it will seek to satisfy itself indirectly as to the likelihood of the model's accuracy by requesting details of the individuals (if employed by the originator) or the firms (if the model is outsourced) responsible for the model. PCS will then assess whether, in its sole opinion, the model was put together by persons or firms with a reputation and a track-record in such models.</p> <p><b><i>Having seen the model, read a statement in the prospectus that the model will be made available in accordance with the requirements of the criteria, and assessed the firm responsible for the model, PCS is prepared to verify this criterion.</i></b></p>		
	<p><b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b></p> <p><b>Liability cashflow model (Article 22(3))</b></p> <p>76. The objective of this criterion is to assist investors in their ability to appropriately model the cash flow waterfall of the securitisation on the liability side of the SSPE.</p> <p>77. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) interpretation of the term 'precise' representation of the contractual relationships;</p> <p>(b) implications when the model is provided by third parties.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines</b></p> <p><b>Liability cash flow model (Article 22(3))</b></p> <p><b>Precise representation of the contractual relationship</b></p> <p>82. For the purposes of Article 22(3) of Regulation (EU) 2017/2402, the representation of the contractual relationships between the underlying exposures and the payments flowing among the originator, sponsor, investors, other parties and the SSPE should be considered to have been done 'precisely' where it is done accurately and with an amount of detail sufficient to allow investors to model payment obligations of the SSPE and to price the securitisation accordingly. This may include algorithms that permit investors to model a range of different scenarios that will affect cash flows, such as different prepayment or default rates.</p>		

**Third parties**

83. For the purposes of Article 22(3) of Regulation (EU) 2017/2402, where the liability cash flow model is developed by third parties, the originator or sponsor should remain responsible for making the information available to potential investors.

<b>70</b>	<p><b>Legislative text</b></p> <p><b>Article 22 - Requirements relating to transparency</b></p> <p>22.3. The originator or the sponsor shall, before the pricing of the securitisation, make available to potential investors a liability cash flow model which precisely represents the contractual relationship between the underlying exposures and the payments flowing between the originator, sponsor, investors, other third parties and the SSPE, and shall, after pricing, make that model available to investors on an ongoing basis and to potential investors upon request.</p>		
	<p><b>STS criteria</b></p> <p>70. And shall, after pricing, make that model available to investors on an ongoing basis and to potential investors upon request.</p>		
	<table border="1" style="width: 100%;"> <tr> <td style="background-color: #ffff00;"><b>Verified?</b></td> <td style="background-color: #c6efce; text-align: center;">Yes</td> </tr> </table>	<b>Verified?</b>	Yes
<b>Verified?</b>	Yes		
	<p><b>PCS Comment</b></p> <p>See Section 4.4. Disclosure Requirements second paragraph (c), see STS Statements (v) and 8. General (13) - undertaking to provide liability cash flow model pre and post pricing.</p> <p>Although technically covering the period between pricing and close, this is primarily a future event criterion. In other words, it cannot be either met or failed at the outset of the transaction. But if, at a later stage, it is not met, then the Originator will need to inform ESMA and the STS status of the securitisation will be lost.</p> <p>Therefore, as a technical matter, this criterion is not applicable at the closing of a transaction.</p> <p>However, PCS will nevertheless look to see if there is a covenant on the part of the originator to comply in the future with this requirement whilst noting at the same time that the absence of any such covenant – although possibly unsettling for some investors - would not invalidate the STS status of the transaction at closing.</p> <p><b>PCS notes the existence of such covenant in the Prospectus.</b></p>		
	<p><b>EBA Final non-ABCP STS Guidelines – statements on <i>background and rationale</i></b></p> <p><b>Liability cashflow model (Article 22(3))</b></p> <p>76. The objective of this criterion is to assist investors in their ability to appropriately model the cash flow waterfall of the securitisation on the liability side of the SSPE.</p> <p>77. To facilitate consistent interpretation of this criterion, the following aspects should be clarified:</p> <p>(a) interpretation of the term 'precise' representation of the contractual relationships;</p> <p>(b) implications when the model is provided by third parties.</p>		
	<p><b>EBA Final non-ABCP STS Guidelines</b></p> <p><b>Liability cash flow model (Article 22(3))<i>Precise representation of the contractual relationship</i></b></p> <p>82. ## Definitions:

**“AUP”**: the agreed upon procedures through which an external firm verifies certain aspects of the asset pool.

**“COMI”**: centre of main interest – broadly, the legal jurisdiction where the insolvency of the seller of assets will be primarily determined.

**“Issuer Notification”**: the notification provided by the originator or sponsor pursuant to article 27 of the STS Regulation.

**“Jurisdiction List”**: the list of jurisdictions where it has been determined that severe clawback provisions do not apply.

**“Legal Opinion”**: an opinion signed by a law firm qualified in the relevant jurisdiction and acting for the originator or the arranger where the law firm sets out the reasons why, in its opinion and subject to customary assumptions and qualifications, the assets are transferred in such a way as to meet the STS Criterion for “true sale” or the same type of opinion for prior sales together with an opinion on the enforceability of the underlying assets.

**“Marketing Documents”**: Documents prepared by or on behalf of the originator and used in the marketing of the transaction with potential investors.

**“Model”**: a liability cash flow model which precisely represents the contractual relationship between the underlying exposures and the payments flowing between the originator, sponsor, investors, other third parties and the SSPE.

**“Prospectus/Deal Sheet”**: the prospectus, or for a deal where no prospectus needs to be drawn up, the deal sheet envisaged by article 7.1(c) of the STS Regulation.

**“Transaction Document”**: a document entered into in relation to the transaction binding on one or more parties connected to the transaction.
